Amended
Scholarship Trust Fund
(Sub-Policy)

STATEMENT OF INVESTMENT OBJECTIVES, GUIDELINES AND PROCEEDURES

A. General. This statement governs the investment of Scholarship Trust Fund (Fund) as a sub-policy of the Navajo Nation Master Investment Policies.

This statement is set forth in order that the Navajo Nation Council, the Budget & Finance Committee, the Investment Committee, Staff, its investment advisor and its investment managers and others entitled to such information may be made aware of the Policy of Scholarship Trust Fund with regard to the investment of its assets and the expectations and requirements of the Investment Committee with respect to the ongoing management of the investments. The purpose of this document is to establish the investment policies, standards of prudence and performance expectations for the Fund. The Investment Committee is responsible for the fiduciary oversight of the investments and has chosen these policies as its statement of intent for achieving the investment objectives described below.

B. The Fund. Briefly, the Scholarship Trust Fund was established to account for certain assets budgeted to provide scholarships to members of the Navajo Nation for educational purposes. The Fund includes the Graduate and TG&E trusts.

All amounts of money deposited in the Fund shall be invested as soon as practical in accordance with Investment Objectives and Investment Policies of the Navajo Nation as formally adopted by the Budget and Finance Committee of the Navajo Nation Council.

The Fund is expected to be available in perpetuity so it will be invested with a long-term perspective. It is important to follow coordinated policies regarding spending and investment decisions, which will protect the principal and produce reasonable total returns.

To assure that the integrity of these assets shall be maintained to the maximum extent feasible, the Investment Committee has established the following Policies:

- To be invested in accord with The Master Investment Policy and Procedures approved by the Budget & Finance Committee.
- To preserve the purchasing power of the investments while at the same time increasing the size of the corpus in order to support growth in Scholarship Trust Fund. Preservation of principal is of high priority and essential over the long term.

C. Investment Objectives.

The primary objective of the Fund shall be:

- preservation of capital in real terms;
- obtain maximum returns within reasonable and acceptable levels of risk.

Financial objectives of the Scholarship Trust Fund have been established in conjunction with a comprehensive review of the current and projected financial requirements of the Fund. The targeted rate of return is 4% ~~about~~ above Consumer Price Index. While there cannot be complete assurance that the defined objectives will be realized, it is believed that the likelihood of their realization is reasonably high, based on the investment policy of the Fund.

The achievement of the investment objectives of the Fund will be reviewed on an annual basis. This review will focus on the continued feasibility of achieving the objectives and the continued appropriateness of the investment policy. It is not expected that the policy will change frequently; in particular, short-term changes in the financial markets should generally not require an adjustment in the policy.

D. The Investment Committee Responsibilities. The Investment Committee will have the responsibility and authority to oversee the investments of the Fund. The Investment Committee and its designated investment advisor will then select the specific asset mix reflecting judgments as to the investment environment as well as the specific needs of the Fund. The Investment Committee will discharge their duties with prudence and ethics as stated in Section 3 of the Navajo Nation Master Investment Policies.

E. Investment Policy Guidelines. The Budget & Finance Committee does not expect the Investment Committee to be reactive to short-term investment developments, recognizing that the needs for payout are long term and that investment competence must be measured normally over a meaningful period of time. While the quantitative assessment of managerial competence will be measured normally over a complete market cycle, the Budget & Finance Committee anticipates that the Investment Committee will make interim qualitative judgments. Specific qualitative factors which will be reviewed by the Investment Committee on an ongoing basis.

Asset Allocation

The most important component of an investment strategy is the asset mix, or the resource allocation among the various classes of securities available to the Scholarship Trust Fund investments. The Investment Committee will be responsible for target and actual asset allocation for the investments that will best meet the needs of the Fund, taking into

consideration the appropriate level of portfolio volatility. The Investment Committee will then submit to the Budget & Finance Committee the long-term asset allocation ranges.

Long term

The risk/return profile shall be maintained by describing a long-term "target" strategic asset allocation and is set forth below.

Investment Time Horizon

In making investment strategy decisions for the Fund, the focus shall be on a long-term investment time horizon that encompasses a complete business cycle (usually three to five years). Interim evaluation will be required if a significant change in fees, manager personnel, strategy or manager ownership occurs.

Allocation of Assets

It shall be the policy of the Fund to be invested in accordance with the maximum and minimum range for each asset class as stated below:

Target Asset Allocation			
	Minimum	Target	Maximum
U.S. Equity	22%	30%	38%
Large Cap	20%	25%	30%
Small / Mid Cap	2%	5%	8%
International Equity	1410%	1815%	2220%
Core / Core Plus Fixed Income	2025%	30%	4035%
Core Real Estate	0%	8%	110%
Absolute Return /GTAA	110%	149%	1712%
Cash Equivalents <u>Bank Loans</u>	0%	80%	115%

The asset allocation ranges established by this investment policy represent the long-term perspective. As such, rapid unanticipated market shifts may cause the asset mix to fall outside the policy ranges. Any divergence should be of a short-term nature. Staff will review the asset allocation of the Fund on a quarterly basis and rebalance to within policy ranges as necessary.

F. Performance Expectations. The measurement period for complete evaluation will be trailing twelve quarter periods and complete market cycles. Market cycles are defined to include both a rising and a declining leg. Therefore, a minimum period of evaluation shall be typically three to five years.

The most important performance expectation is the achievement of investment results that are consistent with the Fund's investment objective statement. Performance will be monitored against a custom index of both the target allocation and the current allocation.
