

RESOLUTION OF THE
RESOURCES AND DEVELOPMENT COMMITTEE
23rd Navajo Nation Council --- Fourth Year, 2018

AN ACTION

RELATING TO RESOURCES AND DEVELOPMENT COMMITTEE; APPROVING THE
GRANT OF RIGHT-OF-WAY TO WILLIAMS FOUR CORNERS, LLC, FOR THE
KUTZ GATHERING SYSTEM TO CONTINUE OPERATING AND MAINTAINING
EXISTING PIPELINES AND ANCILLARY FACILITIES ON, OVER, AND ACROSS
NAVAJO NATION LANDS WITHIN THE NAVAJO INDIAN IRRIGATION PROJECT
LANDS (SAN JUAN COUNTY, NEW MEXICO)

BE IT ENACTED:

SECTION ONE. AUTHORITY

Pursuant to 2 N.N.C. § 501 (B)(2), the Resources and Development Committee of the Navajo Nation Council has the authority to grant final approval for all land withdrawals, non-mineral leases, permits, licenses, rights-of-way, surface easements and bonding requirements on Navajo Nation lands and unrestricted (fee) land. This authority shall include subleases, modifications, assignments, leasehold encumbrances, transfers, renewals, and terminations.

SECTION TWO. FINDINGS

- A. Williams Four Corners, LLC, has submitted rights-of-way applications to continue operating and maintaining a pre-existing natural gas pipeline gathering system on Navajo Nation Fee and Trust Lands, San Juan County, New Mexico. The applications are attached hereto and incorporated herein as **Exhibits A-1 and A-2**.
- B. The proposed rights-of-way are described in **Exhibits A-1, A-2 and B** attached hereto.
- C. A Resource Management Plan has been prepared in lieu of environmental and archaeological studies and is attached hereto as **Exhibit C**.
- D. Williams Four Corners, LLC, and the Navajo Nation have negotiated the terms and conditions, **Exhibit D**, of the rights

of way in good faith and request a waiver of appraisal report pursuant to 25 C.F.R. 169.110 (a) (1), (2) and (3); and that the waiver of valuation is in the best interest of the Navajo Nation.

- E. Williams Four Corners, LLC, shall post a \$75,000 surety/reclamation bond pursuant to 25 C.F.R. 169.103 (a) (1) naming the Navajo Nation as a beneficiary. This bond shall be designated to cover liabilities on the Navajo Nation Trust and Fee lands.
- F. The application for the rights-of-way as submitted by Williams Four Corners, LLC, has been reviewed by the Fish and Wildlife; Historic Preservation; Minerals; Navajo Nation Environmental Protection; Division of Natural Resources and the Department of Justice and "Approved" or found "Sufficient". See **Exhibit E**.

SECTION THREE. APPROVAL

- A. The Resources and Development Committee of the Navajo Nation Council hereby approves the Grant of Right-of-Way to Williams Four Corners, LLC, to continue operating and maintaining a pre-existing natural gas pipeline gathering system on Navajo Nation Fee and Trust Lands, San Juan County, New Mexico. The location is more particularly described on the survey map attached hereto as **Exhibits A-1, A-2 and B**.
- B. The Resources and Development Committee of the Navajo Nation Council hereby approves the waiver of valuation as being in the best interest of the Navajo Nation pursuant to 25 C.F.R. 169.110 (a) (1), (2) and (3).
- C. The Resources and Development Committee of the Navajo Nation Council hereby approves the right-of-way subject to, but not limited to, the following terms and conditions incorporated herein and attached as **Exhibit D**.
- D. The Resources and Development Committee of the Navajo Nation Council hereby authorizes the President of the Navajo Nation to execute any and all documents necessary to affect the intent and purpose of this resolution.

CERTIFICATION

I, hereby, certify that the following resolution was duly considered by the Resources and Development Committee of the 23rd Navajo Nation Council at a duly called meeting at Twin Arrows Public Safety Building, Twin Arrows, Navajo Nation (Arizona), at which a quorum was present and that same was passed by a vote of 3 in favor, 0 opposed, 1 abstained on this 25th day of April 2018.

Alton Joe Shepherd, Chairperson
Resources and Development Committee
of the 23rd Navajo Nation Council

Motion: Honorable Davis Filfred
Second: Honorable Leonard Pete

APPLICATION FOR GRANT OF EASEMENT FOR RIGHT-OF-WAY

RIGHT-OF-WAY APPLICATION MUST IDENTIFY [§169.102(a)]:

1. Applicant Name and Address: Williams Four Corners LLC
1755 Arroyo Dr., Bloomfield, NM 87413
2. Tract(s) or parcel(s) affected by the right-of-way: Sec. 7, 16, 23, 26, 32 & 33 T27N R11W,
Sec. 10 & 13 T27N R12W San Juan County NM (See Exhibit "A")
3. General location (easement description): See Exhibit "A" and Survey Plats
Said ROW is to be: See Exhibit "A" for detail
4" in size 30,353.42 feet in length; 30 feet in width, 27.614 in acres, & 1,839.60 in rods
6" in size 5,420.390 feet in length; 30 feet in width, 3.733 in acres, & 328.508 in rods
8" in size; 12,485.90 feet in length; 30 feet in width, 11.465 in acres, & 756.72 in rods
Cathodic in size 36.55 feet in length; 30 feet in width; & .034 in acres, & 2.215 in rods

Total PL & Cathodic 48,296.26 feet 42.846 acres 2,927.05 rods
4. Purpose: This pipeline is part of the Kutz Gathering System and was built in the 1950s
under Fee and BLM rights granted by owners at that time. The Navajo Nation acquired
the property for NAPI and is requiring a Navajo right-of-way for future use.
5. Term (Renewal, if applicable): 20 years
6. Identify ownership of permanent improvements associated with the right-of-way and the responsibility for constructing, operating, maintaining, and managing; or removal of permanent improvements under §169.105: Williams Four Corners LLC owns all
improvements located on the right-of-way

REQUIRED SUPPORTING DOCUMENTS [§169.102(b)]:

1. Accurate legal description of the right-of-way, its boundaries, and parcels associated with the right-of way;

EXHIBIT "A1"

2. A map of definite location of the right-of-way; (25 CFR 169.102((b)(2); survey plat signed by professional surveyor or engineer showing the location, size, and extent of the ROW and other related parcels, with respect to each affected parcel of individually owned land, tribal land, or BIA land and with reference to the public surveys under 25 U.S.C. § 176, 43 U.S.C. § 2 AND § 1764, and showing existing facilities adjacent to the proposed project.)
3. Bond(s), insurance, and/or other security meeting the requirements of §169.103;
4. Record of notice that the right-of-way was provided to all Indian landowners;
5. Record of consent that the right-of-way meets the requirements of §169.107, or a statement documenting a request for a right-of-way without consent under §169.107(b);
6. If applicable, a valuation meeting the requirements of §§ 169.110, 112, 114;
7. With each application, if the applicant is a corporation, limited liability company, partnership, joint venture, or other legal entity, except a tribal entity, information such as organizational documents, certificates, filing records, and resolutions, demonstrating that:
 - a. The representative has authority to execute the application;
 - b. The right-of-way will be enforceable against the applicant; and
 - c. The legal entity is in good standing and authorized to conduct business in the jurisdiction where the land is located.
8. Current environmental and archaeological reports, surveys, and site assessments, as needed to facilitate compliance with applicable Federal and tribal environmental and land use requirements;
9. If required, a statement from the appropriate tribal authority that the proposed right-of-way is in conformance with applicable tribal law.

THE APPLICANT FURTHER STIPULATES AND EXPRESSLY AGREES AS FOLLOWS:

To conform and to abide by all applicable requirements with respect to the right-of-way herein applied for. The applicant agrees to conform to and abide by the rules, regulations, and requirements contained in the *Code of Federal Regulations*, Title 25 Indians, Part 169, as amended, and by reference includes such rules, regulations and requirements as a part of this application to the same effect as if the same were herein set out in full.

SECTION 7, TOWNSHIP 27 NORTH, RANGE 11 WEST, N.M.P.M.,
SAN JUAN COUNTY, NEW MEXICO**

A strip of land 40 feet wide across a portion of Section 7, Township 27 North, Range 11 West, N.M.P.M., San Juan County, New Mexico, being 20 feet on both sides of the following described survey line:

Beginning at a point located in the Northeast Quarter of the Southwest Quarter of said Section 7. Said point bears North 51°05'58" East, a distance of 2432.61 feet from a found 1911 G.L.O. brass cap for the Southwest corner of said Section 7;

Thence North 1°20'30" East, a distance of 19.61 feet;

Thence North 71°05'36" West, a distance of 4.67 feet;

Thence North 70°26'32" West, a distance of 258.25 feet to the end of the line at a point located in said Northeast Quarter of the Southwest Quarter of Section 7. Said point bears South 24°09'48" East, a distance of 3996.78 feet from a found 1911 G.L.O. brass cap for the Northwest corner of said Section 7.

The above described tract of land contains 0.259 acre(s), more or less, and is allocated by 40-acre tracts as follows:

Section 7	NE 1/4	SW 1/4	0.259 Acre(s)
		Total	0.259 Acre(s)

Dwg. No. 799.4-X-489

R/W No.

BASIS OF BEARING: BEARINGS AND DISTANCES IN THIS DESCRIPTION ARE BASED ON THE NEW MEXICO COORDINATE SYSTEM, WEST ZONE, NAD 83, AS MEASURED BETWEEN THE SOUTHWEST CORNER AND THE NORTHWEST CORNER OF SECTION 7, TOWNSHIP 27 NORTH, RANGE 11 WEST, N.M.P.M., SAN JUAN COUNTY, NEW MEXICO. BEARS: NORTH 00°06'22" EAST, A DISTANCE OF 5281.77 FEET.

SURVEYOR'S CERTIFICATION

I, MARSHALL LINDEEN, BEING A PROFESSIONAL SURVEYOR IN THE STATE OF NEW MEXICO, DO HEREBY CERTIFY THAT THE SURVEY REPRESENTED BY THIS DESCRIPTION WAS MADE UNDER MY DIRECT SUPERVISION AND THAT THIS DESCRIPTION ACCURATELY REPRESENTS THIS SURVEY TO THE BEST OF MY KNOWLEDGE AND BELIEF.

WILLIAMS FOUR CORNERS, LLC
TORRE ALTA GATHERING SYSTEM
FEDERAL 33-44
APPLICATION FOR RIGHT OF WAY ACROSS
NAVAJO TRIBAL LANDS
BOOK 730, PAGE 187
SECTION 33, TOWNSHIP 27 NORTH, RANGE 11 WEST, N.M.P.M.,
SAN JUAN COUNTY, NEW MEXICO

A strip of land 40 feet wide across portions of Section 33, Township 27 North, Range 11 West, N.M.P.M., San Juan County, New Mexico, being 20 feet on both sides of the following described survey line:

Beginning at a point located in the Southeast Quarter of the Southwest Quarter of said Section 33. Said point bears North 40°34'39" West, a distance of 1650.26 feet from a found 1911 U.S.G.L.O. brass cap for the South Quarter corner of said Section 33;

Thence South 76°47'21" East, a distance of 999.94 feet;

Thence South 80°50'51" East, a distance of 102.37 feet to the end of this description at a point located on the East line of the Southwest Quarter of said Section 33. Said point bears North 00°03'43" East, a distance of 1008.61 feet from said found 1911 U.S.G.L.O. brass cap for the South Quarter corner of Section 33.

The above described tract of land contains 1.012 acre(s), more or less, and is allocated by 40-acre tracts as follows:

Section 33	SE 1/4	SW 1/4	1.012 Acre(s)
		Total	1.012 Acre(s)

Dwg. No. 799.4-X-521 Sheet 1 of 2
R/W No.

BASIS OF BEARING: BEARINGS AND DISTANCES IN THIS DESCRIPTION ARE BASED ON THE NEW MEXICO COORDINATE SYSTEM, WEST ZONE, NAD 83, AS MEASURED ALONG THE SOUTH LINE OF THE SOUTHEAST QUARTER OF SECTION 33, TOWNSHIP 27 NORTH, RANGE 11 WEST, N.M.P.M., SAN JUAN COUNTY, NEW MEXICO.
BEARS: NORTH 89°58'25" WEST, A DISTANCE OF 2638.27 FEET.

APPLICATION FOR GRANT OF EASEMENT FOR RIGHT-OF-WAY

RIGHT-OF-WAY APPLICATION MUST IDENTIFY [§169.102(a)]:

1. Applicant Name and Address: Williams Four Corners LLC
1755 Arroyo Dr. Bloomfield, NM 87413
2. Tract(s) or parcel(s) affected by the right-of-way: Sec. 6,8,15,17,18,22,27,28,29,
30, 33, T27N R11W & Sec. 1,2,3,11,12 T27N R12W, San Juan County NM
(See Exhibit "A")
3. General location (easement description): See Exhibit "A" and Plats
Said Pipeline ROW is to be: See Exhibit "A" for detail
4" in size, 73,124.88 feet in length; 30 feet in width; & 67.15 in acres, & 4,431.815 in rods
8" in size 17,411.85 feet in length; 30 feet in width; & 15.989 in acres, & 1,055.265 in rods
Cathodic in size 184.11 feet in length; 30 feet in width; & .169 in acres, & 11.158 in rods

Total PL & Cathodic	90,720.84 feet	83.31 acres	5,498.238 rods
--------------------------------	-----------------------	--------------------	-----------------------
4. Purpose: This pipeline was built in the 1950s under Fee and BLM rights granted by owners
at that time. The Navajo Nation acquired the property for NAPI and is requiring a Navajo
right-of-way for future use.
5. Term (Renewal, if applicable): 20 years
6. Identify ownership of permanent improvements associated with the right-of-way and
the responsibility for constructing, operating, maintaining, and managing; or removal
of permanent improvements under §169.105: Williams Four Corners LLC owns all
improvements located on the right-of-way

REQUIRED SUPPORTING DOCUMENTS [§169.102(b)]:

1. Accurate legal description of the right-of-way, its boundaries, and parcels associated with the
right-of way;

EXHIBIT "A2"

2. A map of definite location of the right-of-way; (25 CFR 169.102((b)(2); survey plat signed by professional surveyor or engineer showing the location, size, and extent of the ROW and other related parcels, with respect to each affected parcel of individually owned land, tribal land, or BIA land and with reference to the public surveys under 25 U.S.C. § 176, 43 U.S.C. § 2 AND § 1764, and showing existing facilities adjacent to the proposed project.)
3. Bond(s), insurance, and/or other security meeting the requirements of §169.103;
4. Record of notice that the right-of-way was provided to all Indian landowners;
5. Record of consent that the right-of-way meets the requirements of §169.107, or a statement documenting a request for a right-of-way without consent under §169.107(b);
6. If applicable, a valuation meeting the requirements of §§ 169.110, 112, 114;
7. With each application, if the applicant is a corporation, limited liability company, partnership, joint venture, or other legal entity, except a tribal entity, information such as organizational documents, certificates, filing records, and resolutions, demonstrating that:
 - a. The representative has authority to execute the application;
 - b. The right-of-way will be enforceable against the applicant; and
 - c. The legal entity is in good standing and authorized to conduct business in the jurisdiction where the land is located.
8. Current environmental and archaeological reports, surveys, and site assessments, as needed to facilitate compliance with applicable Federal and tribal environmental and land use requirements;
9. If required, a statement from the appropriate tribal authority that the proposed right-of-way is in conformance with applicable tribal law.

THE APPLICANT FURTHER STIPULATES AND EXPRESSLY AGREES AS FOLLOWS:

To conform and to abide by all applicable requirements with respect to the right-of-way herein applied for. The applicant agrees to conform to and abide by the rules, regulations, and requirements contained in the *Code of Federal Regulations*, Title 25 Indians, Part 169, as amended, and by reference includes such rules, regulations and requirements as a part of this application to the same effect as if the same were herein set out in full.

TORRE ALTA GATHERING SYSTEM
MUDGE A #8
APPLICATION FOR RIGHT OF WAY ACROSS
THE NAVAJO INDIAN RESERVATION
SECTION 6, TOWNSHIP 27 NORTH, RANGE 11 WEST, N.M.P.M.,
SAN JUAN COUNTY, NEW MEXICO**

A strip of land 40 feet wide across a portion of Section 6, Township 27 North, Range 11 West, N.M.P.M., San Juan County, New Mexico, being 20 feet on both sides of the following described survey line:

Beginning at a point located on the West line of the Northwest Quarter of said Section 6. Said point bears North 00°30'53" East, a distance of 1537.43 feet from a found 1911 U.S.G.L.O. brass cap for the West Quarter corner of said Section 6;

Thence North 84°02'39" East, a distance of 157.13 feet;

Thence North 83°00'41" East, a distance of 516.00 feet;

Thence South 52°07'30" East, a distance of 16.32 feet;

Thence North 83°32'26" East, a distance of 140.01 feet;

Thence North 4°25'41" West, a distance of 5.12 feet;

Thence North 81°12'57" East, a distance of 156.97 feet to the end of the line at a point located in the Northwest Quarter of the Northwest Quarter of said Section 6. Said point bears North 30°55'09" East, a distance of 1924.79 feet from said found 1911 U.S.G.L.O. brass cap for the West Quarter corner of Section 6.

The above described tract of land contains 0.911 acre(s), more or less, and is allocated by 40-acre tracts as follows:

Section 6	NW 1/4	NW 1/4	0.911 Acre(s)
		Total	0.911 Acre(s)

WHITLEY A #2
APPLICATION FOR RIGHT OF WAY ACROSS
THE NAVAJO INDIAN RESERVATION
SECTION 17, TOWNSHIP 27 NORTH, RANGE 11 WEST, N.M.P.M.,
SAN JUAN COUNTY, NEW MEXICO**

A strip of land 40 feet wide across portions of Section 17, Township 27 North, Range 11 West, N.M.P.M., San Juan County, New Mexico, being 20 feet on both sides of the following described survey line:

Beginning at a point located in the Northeast Quarter of the Northwest Quarter of said Section 17. Said point bears North $41^{\circ}02'46''$ East, a distance of 2850.81 feet from a found 1913 G.L.O. brass cap for the West Quarter corner of said Section 17;

Thence South $20^{\circ}33'14''$ West, a distance of 756.00 feet;

Thence South $13^{\circ}09'55''$ West, a distance of 157.37 feet;

Thence South $11^{\circ}18'05''$ West, a distance of 2759.49 feet;

Thence South $13^{\circ}25'34''$ West, a distance of 106.90 feet;

Thence South $6^{\circ}41'54''$ West, a distance of 102.86 feet to the end of the line at a point located in the Southwest Quarter of the Southwest Quarter of said Section 17. Said point bears North $44^{\circ}20'19''$ East, a distance of 1424.51 feet from a found 1913/1979 G.L.O. brass cap for the Southwest corner of said Section 17.

The above described tract of land contains 3.565 acre(s), more or less, and is allocated by 40-acre tracts as follows:

Section 17	NE 1/4	NW 1/4	0.811 Acre(s)
	SE 1/4	NW 1/4	1.207 Acre(s)
	SW 1/4	NW 1/4	0.029 Acre(s)
	NW 1/4	SW 1/4	1.236 Acre(s)
	SW 1/4	SW 1/4	0.282 Acre(s)
	Total		3.565 Acre(s)

Dwg. No. 799.4-X-501

R/W No.

BASIS OF BEARING: BEARINGS AND DISTANCES IN THIS DESCRIPTION ARE BASED ON THE NEW MEXICO COORDINATE SYSTEM, WEST ZONE, NAD 83, AS MEASURED ALONG THE WEST LINE OF THE SOUTHWEST QUARTER OF SECTION 17, TOWNSHIP 27 NORTH, RANGE 11 WEST, N.M.P.M., SAN JUAN COUNTY, NEW MEXICO.
BEARS: NORTH $00^{\circ}03'09''$ EAST, A DISTANCE OF 2642.05 FEET.

TORRE ALTA GATHERING SYSTEM
FEDERAL 30-41
APPLICATION FOR RIGHT OF WAY ACROSS
THE NAVAJO INDIAN RESERVATION
SECTION 29, TOWNSHIP 27 NORTH, RANGE 11 WEST, N.M.P.M.,
SAN JUAN COUNTY, NEW MEXICO**

A strip of land 40 feet wide across a portion of Section 29, Township 27 North, Range 11 West, N.M.P.M., San Juan County, New Mexico, being 20 feet on both sides of the following described survey line:

Beginning at a point located in the Southwest Quarter of the Northwest Quarter of said Section 29. Said point bears North $60^{\circ}19'36''$ East, a distance of 1239.30 feet from a found 1913 G.L.O. brass cap for the West Quarter corner of said Section 29;

Thence North $61^{\circ}24'15''$ West, a distance of 63.05 feet;

Thence North $64^{\circ}12'07''$ West, a distance of 1132.11 feet to the end of this description at a point located on the West line of the Southwest Quarter of the Northwest Quarter of said Section 29. Said point bears South $00^{\circ}06'30''$ West, a distance of 1504.84 feet from a found 1913/1975 U.S.G.L.O. brass cap for the Northwest corner of said Section 29.

The above described tract of land contains 1.097 acre(s), more or less, and is allocated by 40-acre tracts as follows:

Section 29	SW 1/4	NW 1/4	1.097 Acre(s)
		Total	1.097 Acre(s)

Dwg. No. 799.4-X-507 Sheet 1 of 2
R/W No.

BASIS OF BEARING: BEARINGS AND DISTANCES IN THIS DESCRIPTION ARE BASED ON THE NEW MEXICO COORDINATE SYSTEM, WEST ZONE, NAD 83, AS MEASURED ALONG THE WEST LINE OF THE NORTHWEST QUARTER OF SECTION 29, TOWNSHIP 27 NORTH, RANGE 11 WEST, N.M.P.M., SAN JUAN COUNTY, NEW MEXICO.
BEARS: NORTH $00^{\circ}06'30''$ EAST, A DISTANCE OF 2641.24 FEET.

WILLIAMS FOUR CORNERS, LLC
TORRE ALTA GATHERING SYSTEM
HANCOCK #11
APPLICATION FOR RIGHT OF WAY ACROSS
THE NAVAJO INDIAN RESERVATION
SECTION 2, TOWNSHIP 27 NORTH, RANGE 12 WEST, N.M.P.M.,
SAN JUAN COUNTY, NEW MEXICO

A strip of land 40 feet wide across a portion of Section 2, Township 27 North, Range 12 West, N.M.P.M., San Juan County, New Mexico, being 20 feet on both sides of the following described survey line:

Beginning at a point located on the South line of the Southwest Quarter of said Section 2. Said point bears South 89°48'58" East, a distance of 710.60 feet from a found 1911-1975 U.S.G.L.O. brass cap for the Southwest corner of said Section 2;

Thence North 32°25'17" West, a distance of 1323.50 feet to the end of this description at a point located on the West line of the Southwest Quarter of said Section 2. Said point bears South 00°03'06" West, a distance of 1527.73 feet from a found 1911-1975 U.S.G.L.O. brass cap for the West Quarter corner of said Section 2.

The above described tract of land contains 1.215 acre(s), more or less, and is allocated by 40-acre tracts as follows:

Section 2	SW 1/4	SW 1/4	1.215 Acre(s)
		Total	1.215 Acre(s)

Dwg. No. 799.4-X-513 Sheet 2 of 3
R/W No.

BASIS OF BEARING: BEARINGS AND DISTANCES IN THIS DESCRIPTION ARE BASED ON THE NEW MEXICO COORDINATE SYSTEM, WEST ZONE, NAD 83, AS MEASURED ALONG THE WEST LINE OF THE NORTHWEST QUARTER OF SECTION 2, TOWNSHIP 27 NORTH, RANGE 12 WEST, N.M.P.M., SAN JUAN COUNTY, NEW MEXICO.
BEARS: NORTH 00°04'27" EAST, A DISTANCE OF 2641.25 FEET.

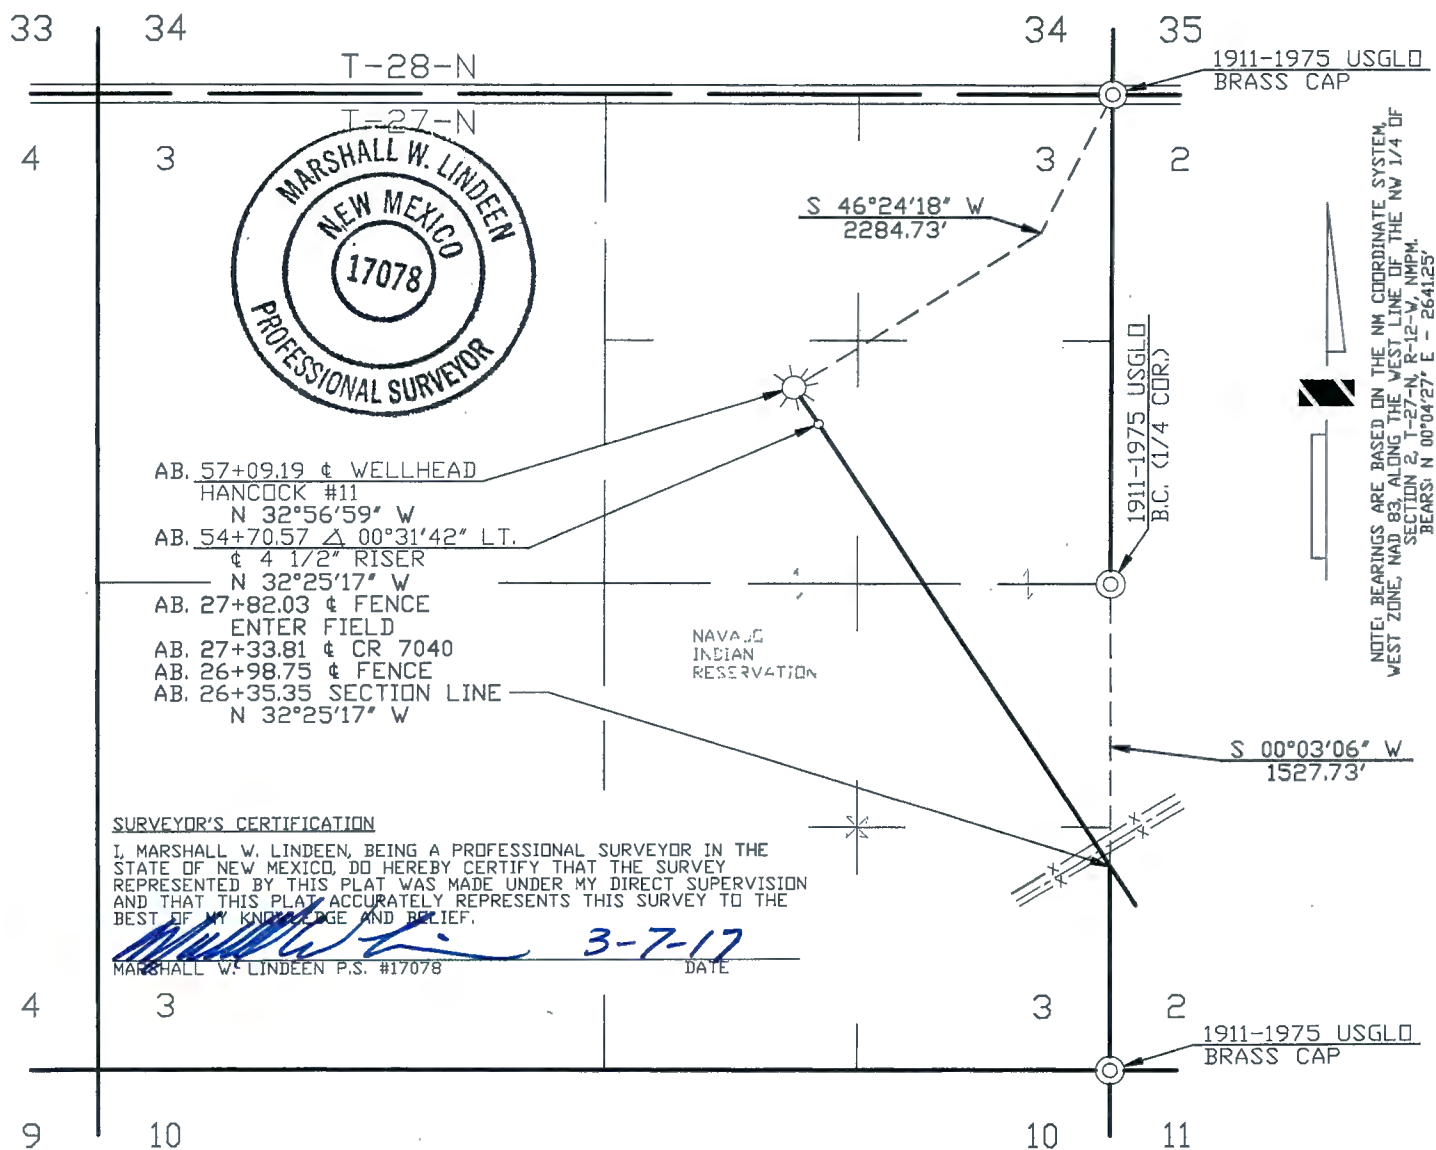

SURVEYOR'S CERTIFICATION

I, MARSHALL LINDEEN, BEING A PROFESSIONAL SURVEYOR IN THE STATE OF NEW MEXICO, DO HEREBY CERTIFY THAT THE SURVEY REPRESENTED BY THIS DESCRIPTION WAS MADE UNDER MY DIRECT SUPERVISION AND THAT THIS DESCRIPTION ACCURATELY REPRESENTS THIS SURVEY TO THE BEST OF MY KNOWLEDGE AND BELIEF.

LATERAL M-1
APPLICATION FOR RIGHT OF WAY ACROSS
THE NAVAJO INDIAN RESERVATION
SECTION 12, TOWNSHIP 27 NORTH, RANGE 12 WEST, N.M.P.M.,
SAN JUAN COUNTY, NEW MEXICO**

A strip of land 40 feet wide across a portion of Section 12, Township 27 North, Range 12 West, N.M.P.M., San Juan County, New Mexico, being 20 feet on both sides of the following described survey line:

Beginning at a point located on the East line of the Northeast Quarter of said Section 12. Said point bears South 00°06'22" West, a distance of 1253.15 feet from a found 1911 U.S.G.L.O. brass cap for the Northeast corner of said Section 12;

Thence North 37°35'16" West, a distance of 1585.78 feet to the end of this description at a point located on the North line of said Northeast Quarter of Section 12. Said point bears South 89°47'44" East, a distance of 4312.48 feet from a found 1911 U.S.G.L.O. brass cap for the Northwest corner of said Section 12.

The above described tract of land contains 1.456 acre(s), more or less, and is allocated by 40-acre tracts as follows:

Section 12	NE 1/4	NE 1/4	1.456 Acre(s)
		Total	1.456 Acre(s)

1. INTRODUCTION

1.1. Background and Purpose

Williams Four Corners, LLC (Williams), acquired Kutz Natural Gas Pipeline Gathering System, natural gas-processing facilities, and other associated facilities on Navajo Nation Tribal Trust and Navajo Tribal Fee lands within the Navajo Nation beginning in the 1990s. The majority of the associated natural gas lines and facilities were originally installed in the early 1950s, with additional lines constructed in the decades following. The latest addition made to the system was in 2011. These existing facilities have been maintained and operated by Williams for many years in accordance with all agreements with the Navajo Nation and the Bureau of Indian Affairs (BIA), and in accordance with 25 Code of Federal Regulations (CFR) 169 (Rights-of-Way over Indian Lands).

Williams has filed applications with the BIA's Navajo Regional Office to renew the rights-of-way (ROWs) corridors for all of the aforementioned facilities. The renewal of the ROWs corridors would include the authorization of ongoing operational activities within the entire existing natural gas pipeline ROWs corridors (hereafter referred to as the Renewal Area). The Navajo Nation Historic Preservation Department (NNHPD), Navajo Natural Heritage Program (NNHP) - Navajo Nation Department of Fish and Wildlife (NNDFW), and BIA will use this Resource Management Plan (RMP) to determine if the Renewal would comply with the National Historic Preservation Act (NHPA), Endangered Species Act (ESA), Bald and Golden Eagle Protection Act (BGEPA), Migratory Bird Treaty Act (MBTA), and Navajo Nation regulations.

This RMP will describe the following:

- Williams' facilities within the Renewal Area,
- Williams' activities that may occur within the Renewal Area,
- Cultural resources known to occur within or near the Renewal Area,
- Sensitive species known to occur or that have the potential to occur within or near the Renewal Area (for the purposes of this RMP, "sensitive species" will refer to species protected under the Endangered Species Act, the Bald and Golden Eagle Protection Act, the Migratory Bird Treaty Act, and/or Navajo Nation sensitive species),
- Procedures that will be followed to protect cultural resources and sensitive biological resources when Williams' activities occur, and
- When and how the RMP and associated data will be updated.

The purpose of this RMP is to outline the resource-protection procedures that would be followed when Williams' activities occur within the Renewal Area, thereby streamlining the Navajo Nation and BIA approval processes, ensuring compliance with U.S. and Navajo Nation laws and regulations, and minimizing impacts to cultural resources and sensitive species. This RMP addresses ongoing operational activities within the Renewal Area; it does not address new construction activities, abandonment activities, or activities outside of the Renewal Area (see Appendix A.1 Vicinity Map and Appendix A.2 Aerial – Surface Ownership Map).

1.2. Pertinent Laws, Regulations, and Guidelines

1.2.1. National Environmental Policy Act

The purpose of the National Environmental Policy Act (NEPA; 42 U.S. Code [USC] 4321 et sequences [et seq.]) is to ensure that, before Federal actions are taken, information is available to the public regarding the environmental impacts of any proposed actions. Under NEPA, Federal agencies analyze Federal

actions via one of three methods: preparing an Environmental Impact Statement, preparing an Environmental Assessment, or applying a Categorical Exclusion.

The Renewal is a BIA action regulated under NEPA. To decide which method of analysis will be required for the Renewal, the BIA must determine the potential impacts of the action to environmental resources. The BIA and NNHPD would determine if this RMP along with the associated Class I in-depth electronic records search of cultural resources data in the vicinity of the Renewal Area provides the information necessary to determine the Renewal's potential impacts to cultural resources and sensitive species.

1.2.2. National Historic Preservation Act

The purpose of the NHPA (16 USC 470 et seq.) is to preserve archaeological and historic sites within the U.S. under Section 106 of the NHPA, Federal agencies are required to evaluate the impact of Federal actions on historic properties that are listed on or eligible for listing on the National Register of Historic Places (NRHP).

The Renewal is a BIA action regulated under the NHPA. The NNHPD and BIA would determine if this RMP along with the associated Class I in-depth electronic records search of cultural resources data in the vicinity of the Renewal Area provides the information necessary to determine the potential impacts of the Renewal on historic properties listed or eligible for listing on the NRHP (see Appendix B Cultural Resources Methodology & Findings and Appendix C List of Cultural Sites).

1.2.3. Endangered Species Act

The purpose of the ESA (16 USC 1531 et seq.) is to protect and recover imperiled species and the ecosystems upon which they depend. Under Section 7 of the ESA, Federal agencies are required to evaluate the impacts of Federal actions on endangered and/or threatened species and their designated critical habitats if present within project areas.

The Renewal is a BIA action regulated under the ESA. The NNHP and BIA would determine if this RMP provides the information necessary to determine the potential impacts of the Renewal on endangered and threatened species and their habitats.

1.2.4. Bald and Golden Eagle Protection Act

The BGEPA (16 USC 668 et seq.) prohibits anyone without a Federal permit from "taking" (pursuing, shooting, shooting at, poisoning, wounding, killing, capturing, trapping, collecting, molesting, or disturbing) bald or golden eagles or their parts, nests, or eggs.

The NNHP and BIA would determine if this RMP provides the information necessary to determine the potential impacts of the Renewal on bald eagles (*Haliaeetus leucocephalus*) and golden eagles (*Aquila chrysaetos*).

1.2.5. Migratory Bird Treaty Act

The MBTA (16 USC 703 et seq.) prohibits the hunting, killing, capturing, possession, sale, transportation, and exportation of some birds and their feathers, eggs, and nests.

The NNHP and BIA would determine if this RMP provides the information necessary to determine the potential impacts of the Renewal on birds protected under the MBTA.

1.2.6. U.S. Fish and Wildlife Service's and Navajo Nation's Black-Footed Ferret Survey Guidelines

The black-footed ferret (*Mustela nigripes*) is federally endangered and protected under the ESA. The Black-Footed Ferret Survey Guidelines (U.S. Fish and Wildlife Service [USFWS] 1989) details procedures developed by the USFWS to help agencies, private organizations, or individuals determine the presence

of black-footed ferrets within a prairie dog (*Cynomys spp.*) colony. The Black-Footed Ferret Guidelines for the Navajo Indian Reservation (NNDFW 1985) provide additional guidance for surveys on the Navajo Nation.

Williams Four Corners, LLC would follow the procedures listed in the aforementioned documents to determine when black-footed ferret surveys are required and would conduct such surveys and report any positive species identification or sign.

1.2.7. Navajo Endangered Species Regulations

Under 17 Navajo Nation Code (NNC) 507 (Endangered Species), the Navajo Resources Committee developed the Navajo Endangered Species List (NESL), which includes indigenous species determined to be endangered within the Navajo Nation (Resolution RCS-41-08). This list is reviewed and updated every two years. Under this regulation, it is unlawful to 'take' any species on the NESL.

The Renewal Area is located within the Navajo Nation. All Navajo Nation regulations, including those regarding NESL-listed species, would apply to the Renewal NNHP Data Response for the associated species list for the Renewal Area, issued to NCI in October 2016 (see Appendix D).

1.2.8. Navajo Nation Ferruginous Hawk Management Guidelines

The NNHP developed the Navajo Nation Ferruginous Hawk Management Guidelines (Mikesic 2014) to protect ferruginous hawk nests from activities that may cause temporary or permanent disturbance. The document lists mitigation that must occur when a ferruginous hawk nest, nesting territory, or potential nesting habitat is identified near a proposed action.

Williams would adhere to the Navajo Nation Ferruginous Hawk Management Guidelines within the Renewal Area.

1.2.9. Navajo Nation Golden and Bald Eagle Nest Protection Regulations

The Navajo Nation's Golden and Bald Eagle Nest Protection Regulations (NNHP 2008a) were developed to provide protection to golden eagles, bald eagles, and eagle nests by regulating human activities within close proximity to nests. The regulations establish buffers around nests, limit human activity within the buffers during breeding season, and control the types of permanent structures that can be constructed within the buffers.

Williams would adhere to the Navajo Nation Golden and Bald Eagle Nest Protection Regulations which may limit activities within the Renewal Area, seasonally.

1.2.10. Biological Resource Land Use Clearance Policies and Procedures

The purpose of the Biological Resource Land Use Clearance Policies and Procedures (RCP; RCS-44-08) is to assist the Navajo Nation government in ensuring compliance of projects with Federal and Navajo laws which protect plant and wildlife resources and their habitats. Under the RCP, the NNHP has mapped the entire Navajo Nation in terms of habitat sensitivity for NESL-listed species. The mapping has resulted in six classification areas, referred to as RCP Wildlife Areas (RCP Areas).

Although the RCP Area classifications were established to guide development activities, rather than maintenance of existing facilities, the RCP Area designations would be referenced by Williams to identify areas where NESL-listed species habitat may be most likely to occur. Williams' procedures would not differ based on the RCP Area classification of an activity location. See Appendix A.3 RCP Area Maps, for a visual of the RCP Area Levels within the Renewal Area.

2. RENEWAL AREA

The Renewal Area consists of the ROW corridors associated with Williams' natural gas pipelines within the Navajo Nation. Located within an approximately 6-by-7-square mile area within San Juan County, New Mexico, these ROW corridors (the Renewal Area) cross Navajo Nation Tribal Trust and Navajo Tribal Fee lands with some short segments on land withdrawn to the Bureau of Reclamation as well as some private lands (See Appendix A.2 Aerial – Surface Ownership Map). The Renewal Area is located immediately west of U.S. Highway 550. The Renewal Area is south of Bloomfield, New Mexico and the town of Farmington is located to the northwest. Please refer to Appendix A.1 for the Vicinity Map of the Renewal Area. The majority of the Renewal Area is contained within the Navajo Indian Irrigation Project (NIIP). NIIP was established to satisfy a treaty between the Navajo Nation and the U.S. Federal Government.

The Renewal Area and immediately adjacent lands consists of dry uplands, and ephemeral tributaries and sub-tributaries to the San Juan River, including Gallegos Canyon. Uplands are vegetated by desert scrub, sagebrush shrubland, grassland, and piñon-juniper vegetation communities, and agricultural areas.

All of the natural gas lines are subsurface and extend from one lateral, (M-1, see Appendix A.2 Aerial Map) from the northwest to the southeast. Most of the Renewal Area parallels existing roads. In addition, over time, most of the ROW corridors within the Renewal Area have been used regularly by vehicles (associated with residents, personnel of other companies in the area, etc.) and have eventually turned into unmaintained access roads or two-track roads.

3. WILLIAMS' ROW CORRIDORS, FACILITIES, AND ACTIVITIES

3.1. ROW corridors

The ROWs corridors within the Renewal Area are described in the below table. It is estimated that there are approximately 88.75 acres of ROWs corridors within the Renewal Area. Williams' ROWs corridors include all existing natural gas pipelines and facilities.

Table 1. Williams' ROW corridors on Navajo Nation Tribal Trust, Navajo Tribal Fee Lands and Other Surface

Facility	Total Length (ft.)	As Built	ROW Corridor Width = 30 feet			Total Segment Acreage
			Navajo Tribal Trust Surface (ft.)	Navajo Tribal Fee (ft.)	BOR and Private (ft.)	
Lateral M-1	30,220.80	1950	28,084.71	1,550.86	BOR 585.23	20.81 acres
Hancock #5R Well Line	183.33	2001	183.33			0.13 acres
Hancock #10 Well Line	2,608.25	1952	2,608.25			1.80 acres
Hancock #9 Well Line	1,019.37	1952	1,019.37			0.70 acres
Hancock #12 Well Line	4,398.98	1952	4,398.98			3.03 acres
Hancock #11 Well Line	5,702.06	1952	5,702.06			3.93 acres
Hancock #6 Well Line	3,650.76	1952	3,650.76			2.51 acres
Hancock #13 CDP Well Line	2,615.89	1952	2,615.89			1.80 acres

Douthit C Federal #2E	5,335.75	1981	2,005.94	2,776.97	Private 552.84	3.67 acres
Total	128,914.83		105,188.15	17,569.97	6,156.71	88.75 acres

3.2. Facilities

Aboveground Williams' facilities within the Renewal Area include the following:

- Electric Powerlines and
- Within natural gas pipeline ROW corridors:
 - Compressor stations,
 - Cathodic-protection stations with a possible solar panel and/or small wind generator,
 - Meter sites,
 - Valve sites,
 - Doglegs,
 - Launchers,
 - Receivers,

- Tank sites, and
- Pump stations.

3.3. Activities

The following operational activities would occur within the Renewal Area. All activities would meet standards set forth by the Occupational Safety and Health Administration.

3.3.1. Non-Emergency Activities

Non-emergency related activities within the Renewal Area are pre-planned. Such activities include inspections, maintenance, and repairs.

Non-Ground-Disturbing Activities

During non-ground-disturbing activities, Williams would drive pick-up trucks on existing roads and within the Renewal Area. Williams would not drive cross-country over any existing vegetation during these activities. No excavation would occur.

Inspections

Natural gas pipeline ROWs corridors within the Renewal Area would be regularly inspected. During inspections, Williams would visually check for facility issues (such as leaks or damage) and general ROW corridor issues (such as erosion, washouts, and unauthorized activities).

Cathodic-Protection System Monitoring

The cathodic-protection system associated with the natural gas pipeline controls the corrosion of the pipe. This system involves the use of "sacrificial metal rods" which act as anodes, along the metal pipeline; the sacrificial metal rods corrode instead of the pipe. These rods would be monitored periodically. To monitor the rods, Williams would measure the charge on the pipeline at dedicated locations.

Vegetation Maintenance

Occasionally, it may be necessary to trim woody vegetation within the Renewal Area to prevent the blockage of drainages. Herbicide spraying by a licensed applicator may also occur around aboveground facilities.

Ground-Disturbing Activities

During ground-disturbing activities, Williams would drive pick-up trucks on existing roads within the Renewal Area. Additional equipment would likely be required, and equipment may dig into the surface of the ground. Potential equipment used and potential ground disturbance is described in detail below.

For any of the below activities, if Williams would need to disturb ground outside of the Renewal Area, Williams would contact the Navajo Nation and BIA to discuss the need for a temporary work space (TWS).

Access Maintenance

Occasionally, it may be necessary to maintain existing access roads within the Renewal Area. Maintenance would generally be required in the case of erosion or washouts within roads. Activities may include regrading, replacing/installing culverts, and replacing/installing rock. A backhoe, grader, and/or front-end loader may be used. These activities would generally be completed in one to three days.

ROW Corridor Maintenance

Soil erosion may periodically result in the need to re-stabilize the ROW corridor area. Activities may include re-grading the ROW corridor; modifying the terrain within the ROW corridor area (such as

installing swales or berms) to better manage water flow; and/or installing culverts, rocks, or other protective materials. A backhoe, grader, front-end loader, and/or dump truck may be used. These activities would generally take one to seven days and would be able to be completed within the existing ROW corridor.

Signage Installation/Maintenance

Existing signage, such as pipeline markers, may occasionally require updating. New signage may be installed within the Renewal Area if there is external development in the area. These activities, which would generally take less than one day, may require a powered augering tool.

Pipeline Repairs

Occasionally, anomalies (such as corrosion) would be identified along the natural gas pipelines. In such a case, repair may be merited. Such activities generally require a 50- to 100-foot-wide workspace; a slightly smaller workspace may be utilized if only recoating is required. Due to the width of the ROW corridors (30 feet), a TWS would likely be needed for many of these activities.

To properly identify and evaluate the anomaly, the pipeline trench would be excavated to expose the pipe; during this activity, work would occur on one side of the trench, while soil is placed on the opposite side. Trenching would continue until the anomaly location is identified. Williams would then determine the method of repair. Repairs may include installing a composite or full-encirclement sleeve, recoating the pipe, or removing/replacing a section of the pipe. If replacement occurs, the new pipe section would be recoated with a substance that would inhibit corrosion. After the section of pipe is repaired or replaced, the associated stockpiled soil would be returned to the trench from which it was removed and the ROW corridor would be restored to as near as practicable to pre-existing conditions.

Backhoes, side booms, water trucks, and/or welding trucks may be used during these activities. Each section of pipe generally takes one to five days to repair; recoating generally takes less time than other repairs. Repairs/replacements are often grouped geographically, with several specialized crews responsible for each of the aforementioned construction tasks. In such a case, the completion time for each section of pipe may be longer than five days. Activities requiring a TWS would require Navajo Nation and/or BIA approval prior to any repair activity.

Cathodic-Protection System Repairs

If monitoring indicates that a sacrificial metal rod is corroding within the natural gas pipeline's cathodic-protection system, the rod would need to be replaced. A powered auger and/or backhoe may be used for this activity. Less than one day would be required to complete this replacement, should it be necessary.

3.3.2. Emergency Activities

Emergency activities within the Renewal Area would involve little or no advance warning. The following situations are examples of emergencies that may potentially arise within the Renewal Area:

- A pipe suffers damage from a third party,
- A severe pipe anomaly is identified, or
- A pipe has been exposed by erosion and is at risk of becoming damaged.

The objective of emergency activities would be to protect life, property, and the environment. Emergency activities may include evacuating natural gas from a portion of a pipeline, repairing/replacing pipeline facilities, and/or stabilizing ROW corridor(s) within the Renewal Area. These activities may involve a range of equipment, including backhoes, front-end loaders, dump trucks, graders, digger derrick trucks, crew trucks, and/or pickup trucks. Completion times would vary. The Navajo Nation Division of Public Safety may be involved with such activities. Appropriate offices within the BIA and the Navajo Nation would be contacted as soon as possible.

4. CULTURAL RESOURCES, TRADITIONAL CULTURAL PROPERTIES AND SENSITIVE SPECIES

4.1. Cultural Resources

4.1.1. Methodology

Western Cultural Resource Management, Inc. (WCRM), requested an in-depth electronic records search from the New Mexico State database (Archaeological Records Management System [ARMS]) and conducted a physical records search at NNHPD for cultural resources data in the vicinity of the Renewal Area. Data obtained included locations and dates of previous cultural surveys and locations, and NRHP eligibility of identified cultural sites within 75 meters (250 feet) beyond the centerlines (hereafter referred to as the cultural buffer zone). WCRM's methodology, including consultations with NNHPD, is described in detail in Appendix B (Cultural Resources Methodology and Findings).

As discussed in Chapter 6 (Updating the RMP and Associated Shapefiles), Williams would update shapefiles and maps regularly as future cultural surveys are completed within the Renewal Area.

4.1.2. Results

Available data indicated that approximately 22.34 miles of the 24.54 total miles of pipeline will not require survey at present but a request for *Archaeological and Historical Clearance* form must be submitted with NIIP before final clearance is granted for any Williams' work to proceed. Within the cultural buffer zone, six NNHPD sites and eight ARMS sites requiring protection had been identified. Due to variations between ARMS's and NNHPD's site-labeling systems, differences in ARMS's and NNHPD's locational recording methods, and repeated data transfers, it is possible that a few of the sites listed in these two databases may be duplicates of one another. Identified cultural sites are listed in Appendix C (List of Cultural Sites). Anytime Williams is working in proximity to a known cultural site, notification would be submitted to NNHPD for guidance.

A Cultural Map is provided in Appendix A.4. This map displays the location of recorded cultural sites within the cultural buffer zone. In addition, the map shows which portions of the cultural buffer zone have been previously surveyed and which are in need of survey. WCRM's results are described in greater detail in Appendix B (Cultural Resources Methodology and Findings).

4.2. Traditional Cultural Properties

4.2.1. Methodology

Refer to Section 4.1.1, Cultural Resources, Methodology.

4.2.2. Results

At present, there are no known Traditional Cultural Properties (TCPs) documented within the project area. There are however, there are six TCPs within five miles. These locations have been mapped in relation to the project area and will be presented to NNHPD in WCRM's Appendix A.

Should any new survey be required then a search of the known TCPs will be performed at the NNHPD Traditional Cultural Properties Office and interviews conducted with local residents about the existence of any community/local traditional cultural places. As is the policy with all new surveys, copies of the interviews, as well as maps showing the TCP locations, will be sent to the NNHPD TCP Office to add to their database of known sacred places.

4.3. Sensitive Species

4.3.1. Methodology

NNHP (Zoologist Chad Smith and GIS Specialist Dexter Prall) consulted with each other as well as NCI beginning in October 2016 when the NESL was received. NNDFW contributed species shapefiles and information to the development of this RMP. NNHP provided NCI with the following data:

- A shapefile of all of the RCP Wildlife Sensitivity Areas within the Renewal Area (see section below for further description),
- A Data Response (DR; Appendix D), which is a list of species included on the NESL that are known to occur or that have the potential to occur within proximity to the Renewal Area, and
- Shapefiles of the Potential Occurrence Areas (POAs; areas where there have been known occurrences of an NESL-listed species or where there is potentially suitable habitat for the species) for the species included on the DR

As discussed in Chapter 6 (Updating the RMP and Associated Shapefiles), Williams would update shapefiles and maps regularly as future biological surveys (habitat and species surveys) are completed within the Renewal Area.

4.3.2. Results

RCP Areas

The purpose of the Biological Resource Land Use Clearance Policies and Procedures (RCP) is to assist the Navajo Nation government and Chapters with compliance with federal and Navajo Laws which protect wildlife resources, including plants, and their habitat. The RCP ensures compliance and results in an expedited land use clearance process. All portions of the Navajo Nation are within one of six RCP Areas. The Renewal Area is located within RCP Areas 1 and 3. These areas are described below.

- **RCP Area 1: Highly Sensitive**

This area contains the best habitat for sensitive species, and the highest concentration of these species on the Navajo Nation. The purpose of this area is to protect these valuable and sensitive biological resources to the maximum extent possible.

The general rule for this area is no activity or development that is going to result in significant impact to wildlife resources. All development requires the preparation of a Biological Evaluation (BE).

- **RCP Area 3: Less Sensitive**

Contains a low, fragmented concentration of sensitive species; sensitive species may be locally abundant on "islands" of habitat, but these islands are relatively small, limited in number, and well-spaced.

The Navajo Nation recognizes that lands within Area 3 may not be completely surveyed for the potential occurrence of sensitive species or habitat. All development requires the preparation of a BE. Generally, the need to avoid sensitive habitats should be less frequent in this area.

An RCP Map is provided in Appendix A.3. For a complete list of RCP areas and their descriptions, please see the following website <http://www.nndfw.org/clup.htm>.

Although Williams' procedures would not differ based on the RCP Area in which an activity is located, this information would assist biological surveyors in determining the likelihood of encountering sensitive species or their habitats within portions of the Renewal Area.

Sensitive Species

Federally Listed Species

U.S. Fish and Wildlife Service (USFWS) federally listed species that are known to occur or have the potential to occur within the Navajo Nation are included on the NESL and are discussed in the following section.

NESL-Listed Species

Under Resources Committee Resolution No. RCS-41-08, the term "endangered" refers to a "species or subspecies whose prospects of survival or recruitment within the Navajo Nation are in jeopardy or are likely in the foreseeable future to become so." Species listed on the NESL are classified as follows:

- Group 1 (G1): No longer occur on the Navajo Nation,
- Group 2 (G2): Prospects of survival or recruitment are in jeopardy,
- Group 3 (G3): Prospects of survival or recruitment are likely to be in jeopardy in the foreseeable future, or
- Group 4 (G4): Not sufficient information to be listed in G2 or G3, but have reason to be considered; the conservation of G4 species is voluntary and at the request of NNHP.

A list of the NESL-listed species known to occur or with the potential to occur within the Renewal Area is provided in Appendix E (Species Protection Table). Habitat descriptions for each NESL-listed species can be found in the NNHP Species Accounts (Mikesic and Roth 2008).

Species included on the NESL which have potential to occur within the *entire* Renewal Area include:

- Aztec gilia, *Aliciella formosa*
- San Juan milkweed, *Asclepias sanjuanensis*
- Brack's fishhook cactus, *Sclerocactus cloveriae* ssp. *Brackii*
- Northern leopard frog, *Lithobates pipiens*
- Burrowing owl, *Athene cunicularia*
- Ferruginous hawk, *Buteo regalis*
- Golden eagle, *Aquila chrysaetos*
- Mountain plover, *Charadrius montanus*, and
- Southwest willow flycatcher, *Empidonax traillii extimus*

For the remaining species on the NESL, peregrine falcon (*Falco peregrinus*), black-footed ferret (*Mustela nigripes*), Parish's alkali grass (*Puccinellia parishii*), and kit fox (*Vulpes macrotis*), Potential Occurrence Area Maps, which display an overview of individual species' potential habitat occurrence areas, are provided in Appendix A.5.

Eagles

Bald and golden eagles, which are protected under the BGEPA, are known to occur within the vicinity of the Renewal Area. Golden eagles are one of the species listed on the NESL and are therefore included in the above section.

Migratory Birds

A list of birds protected under the MBTA can be found on the USFWS website (USFWS 2016). Many of these birds, particularly those associated with sagebrush shrubland, desert scrub, piñon-juniper woodland, and agricultural areas, may be found within the Renewal Area. Due to the proximity of the San Juan River to the Renewal Area, and because of the NIIP irrigation, some species associated with riparian habitats may also occur within or near the Renewal Area.

5. RESOURCE-PROTECTION PROCEDURES

In the case of an emergency activity, Williams would notify NNHPD and NNHP within 48 hours of the emergency. The below procedures would occur when a non-emergency activity is anticipated within the Renewal Area.

5.1. Protection of Cultural Resources

Cultural resources protection procedures (including notification) would apply only to ground-disturbing activities. Step-by-step instructions are provided in the Cultural Resources Protection Guide (Appendix F); this guideline would ensure that potential impacts to cultural resources are identified and mitigated. The Cultural Resources Protection Guide refers users to additional resources to help determine whether cultural resources may potentially be affected by an action; these resources include the Cultural Maps (Appendix A.4), Cultural Surveys shapefile (provided with this RMP), and Cultural Sites shapefile provided with this RMP (Appendix G). Williams would be responsible for completing surveys and mitigation as outlined in the Cultural Resources Protection Guide. Williams would also be responsible for updating shapefiles and maps based on survey results (as discussed in Chapter 6) and notifying NNHPD of cultural survey results.

5.2. Protection of NESL-Listed Species

NESL-listed species-protection procedures (including notification) would apply only to ground-disturbing activities and activities that involve vegetation maintenance. Step-by-step instructions are provided in the Species Protection Guide (Appendix H); these guidelines would ensure that potential impacts to NESL-listed species are identified and mitigated. The Species Protection Guide refers users to additional resources to help determine which species may potentially be affected by an action; these resources include the POA Species Maps (Appendix A.5), the POA shapefiles (provided with this RMP), and the Species Protection Table (Appendix E). Williams would be responsible for completing surveys and mitigation as outlined in the Species Protection Guide. Williams would also be responsible for updating shapefiles and maps based on survey results (as discussed in Chapter 6) and notifying NNHP of positive species survey results.

5.3. Permitting of Temporary Workspaces

If a TWS is needed, it would be authorized as described in Section 3.3.1 (Non-Emergency Activities). Williams would ensure that the TWS is evaluated for cultural resources and sensitive species in a manner similar to the adjacent Renewal Area (as described in Sections 5.1 and 5.2). The results of the evaluations of the TWS would be provided to NNHPD, NNHP, and BIA (if necessary) along with the results of the evaluations of the adjacent Renewal Area. The activity within the TWS would only proceed after NNHPD and/or BIA written approval is received.

Mitigation within a TWS would be the same as described for the adjacent Renewal Area (as described in Sections 5.1 and 5.2).

TWS boundaries would be marked with flagging, fencing, or other materials. Vehicles, equipment, and material stockpiles would not travel/be placed outside of the TWS boundary.

5.4. Minimization of Disturbance

During activities, vehicle parking and material stockpiles would be located within previously disturbed areas within the Renewal Area or permitted TWS. Ground disturbance would be limited to the minimum required area, taking into consideration terrain, existing facilities, equipment, public health and safety, and other factors. Previously undisturbed areas within the Renewal Area would be avoided as much as possible. Roads would not be widened. Any special habitat features, such as burrows or riparian areas, would be avoided if possible.

5.5. Signage and Road Restrictions

Williams would use signage to warn the public of any potentially hazardous activities near roads. Open trenches would be flagged or otherwise identified. If activities are potentially hazardous to the public, access to the activity location would be restricted. If a primary road to one or more residences would be closed during an activity, the resident(s) would be notified prior to the closure, and an alternate access route would be provided. Closed roads would be barricaded in such a manner that drivers would not be able to drive off-road to travel around the activity location. Turnarounds (located within previously disturbed portions of the Renewal Area) would be provided when necessary.

5.6. Revegetation (Ground-Disturbing Activities Only)

If the activity would result in more than one acre of ground disturbance, post-activity revegetation would occur. Williams' Revegetation Plan is provided in Appendix I. If there is a known occurrence of a listed plant species within 500 feet of the activity location, the NNHP botanist would be notified prior to revegetation activities.

5.7. Bird Nest Surveys and Monitoring (Ground-Disturbing Activities Only)

If the activity would be ground-disturbing and would occur during migratory bird breeding season (March 1 to August 15), Williams personnel would survey the activity location for sightings of passerines, as well as existing large trees, cliffs, or overhead powerline or transmission line structures (or other potential raptor nest sites) that may contain active bird nests. If an active nest may be impacted by the activity, Williams would delay the activity until the nest is no longer active; if this is not possible, Williams would contact NNHP for alternatives. Williams would arrange to monitor any active nests by a qualified biologist if the nest is within a specific distance from each activity. NNHP would determine the distances for which monitoring would be required.

5.8. Protection of Wildlife

When trenches or holes are excavated, Williams would construct periodic earthen ramps within the trench to allow for entrapped wildlife to escape. Any trenches or holes that are left open overnight would be barricaded to prevent fall injuries to ungulates. Trenches, holes, and open-ended pipes would be inspected regularly for wildlife. Immediately prior to backfilling, open trenches would be inspected for wildlife. If wildlife is discovered within a trench or pipe, Williams would ensure that wildlife are safely removed or would immediately contact NNHP for guidance.

6. UPDATING THE RMP AND ASSOCIATED SHAPEFILES

Williams would manage the Cultural Surveys, Cultural Sites, and POA shapefiles associated with this RMP. If new, relevant cultural and/or biological data becomes available, the following would be updated by Williams:

- The Cultural Surveys shapefile would be updated to include newly culturally surveyed and resurveyed portions of the cultural buffer zones. Survey dates would be included in the database associated with the shapefile.
- The Cultural Sites shapefile would be updated to include newly recorded cultural sites and revisions to previously recorded cultural sites within the cultural buffer zones.
- The POAs shapefiles would be updated to include newly biologically surveyed and resurveyed portions of the Renewal Area.

At least every two years, beginning March 1, 2017, if new data has become available regarding the presence of cultural sites within or adjacent to the Renewal Area, Williams would update Appendix C (List of Cultural Sites). Such data would likely be obtained from new cultural surveys within the Renewal Area. This information can be obtained from the revised Cultural Sites shapefile.

Data Responses (DRs) from the Navajo Nation are valid for two years, and Species Accounts are occasionally updated by NNHP. Every two years, beginning March 1, 2017, Williams would contact the NNHP botanist and zoologist to determine if there have been any changes to the DR, or changes to recommended mitigation for specific species. If NNHP responds with any changes, Williams would revise Appendices A.5 (POA Maps), E (Species Protection Table), and/or the POA shapefiles, as necessary.

Farmington, NM 87401

RE: Class I File Search for the Williams ROW Renewal Resource Management Plan (RMP)

Dear Mr. Nelson:

Williams Four Corners, LLC (Williams) is renewing a resource management plan (RMP) for the Kutz Gathering System, which consists of 24.54 miles of existing pipeline located primarily on the Navajo Nation. WCRM was contacted by Nelson Consulting, Inc. on behalf of Williams to conduct a records search and provide a list and shapefile of all of the known cultural sites within or adjacent to the Williams pipeline rights-of-way (ROWs) and a shapefile of the ROW areas that do not require survey. Based on this request WCRM, made a series of assumptions, see below, in order to complete the requested tasks.

Assumptions

- The portion of the survey area located on the Navajo Indian Irrigation Project (NIIP) is under the jurisdiction of the Bureau of Indian Affairs (BIA). Therefore, identified sites must be protected, but projects within the NIIP do not require resurvey.
- Maintenance located within the NIIP boundary must go through the procedures that have been set in place by the BIA.
- Areas outside the NIIP are managed by the Navajo Nation and the Bureau of Reclamation (BOR). A small parcel of private land is also located within the project area.
- Previously surveyed areas outside the NIIP will not require further survey if the survey occurred during the last 10 years.
- Areas outside the NIIP that are on land managed by the Navajo Nation are under the jurisdiction of the Navajo Nation Historic Preservation Department (NNHPD).
- Areas outside the NIIP that are on land managed by the Bureau of Reclamation are under the jurisdiction of the BOR.
- Areas outside the NIIP that are Private fall under the jurisdiction of the landowner, unless human remains are encountered. In which case the local law enforcement agency shall notify the state medical investigator and the state historic preservation officer. If the human remains are determined to be prehistoric the State Historic Preservation Office (SHPO) then has jurisdiction.
- Variable quality of data sources need to be integrated to resolve disparities in the location and identity.
- Reconciliation of multiple data sources with differing site number systems is needed.

WCRM

Western Cultural Resource Management, Inc.

- WCRM will provide to the client shapefiles with a corresponding attribute table that depicts areas that do not require survey.
- WCRM will provide the client with an attribute table and a shapefile of all known cultural sites within or adjacent to the ROWs to a distance of 75 meters.
- No report will be generated.
- The ROW is 100 ft wide.
- It is assumed that citations from 2014 are still valid.

Methods

To complete the task, WCRM requested an in-depth electronic record search from the New Mexico state database (Archaeological Records Management System [ARMS]), which provided data on site location, eligibility for the National Register of Historic Places (NRHP) (if available), location of surveys performed, and the year the survey occurred. A physical record search was also conducted of paper records housed at the NNHPD in both Window Rock and Shiprock. This record search consisted of hand transferring (a requirement of NNHPD) the survey and site data onto paper topographic maps and photocopying the related report information. After returning from NNHPD with the paper data, the researcher scanned and geo-referenced the maps and combined them with shapefiles provided by Williams that show the location of their facilities and results of the ARMS query. The WCRM GIS department combined key data from ARMS and NNHPD data to build an attribute table that could then assist in the analysis of data. Beyond standard GIS analysis, a manual reconciliation of the available data was required.

WCRM also consulted with Tamara Billie, the acting Navajo Nation Tribal Historic Preservation Officer (THPO), to address questions that arose during the pursuit of data in order to arrive at some guidelines to better assist Williams in the execution of their maintenance.

The pipelines located within the Kutz Gathering System fall under four jurisdictional areas: Navajo Nation, BOR, NIIP, and private. All pipelines located within the NIIP boundary are under the jurisdiction of the BIA.

However, NAPI [Navajo Agricultural Products Industry] is unique, it is under the jurisdiction of the BIA, and requires a "clearance" from them. It was decided in the 1970's under a MOU that the BIA would take care of this area, they usually don't require any further work in the area. [Email from R. Maldonado, at the time acting Navajo Nation THPO. Thursday, July 10, 2014 3:49 PM. Confirmed by Tamara Billie, Acting THPO, Thursday, February 16, 2017.]

A visual inspection of the topographic maps housed at the BIA-NIIP office was also conducted to ensure sites were correctly plotted within the boundaries of the NIIP. In addition to the site locations on the topographic maps, the BIA-NIIP office provided WCRM with shapefiles that outlined areas of the NIIP that had been previously surveyed. These files, known as the "arkie boundary," have been provided to Nelson Consulting for inclusion in their recommendations.

WCRM

Western Cultural Resource Management, Inc.

Confirmation of Data Quality

Throughout the analysis of data from ARMS, NIIP, and NNHPD, the assumption that data from multiple sources would prove less than reliable as well as the assumption that multiple site-numbering systems would prove misleading became all too evident. Because the age of the records and without a field check, it was impossible to determine whether sites plotted in a similar location but with different site numbers because of varying labeling systems are indeed the same site. To protect the cultural resources, both site plots have been provided.

The original maps housed at NNHPD are a byproduct of several generations of data collection. These hand-plotted USGS 7.5' quadrangle maps were scanned to a computer. Within the project area much of the data collected for the NIIP is the basis for the NNHPD database. The primary data from the NIIP Block surveys did encounter multiple site numbers (Vogler, et al. 1993:22). Since the time of the NIIP Block Surveys, this problem has only been compounded by repeated data transfers from one map to the next both with NIIP data and from other areas. ARMS data were also generated over a number of years and compiled from a number of different data sources, thereby making the level of accuracy for plotted locations variable.

The shapefiles provided by Williams were of good quality, allowing WCRM to confidently identify areas where pipelines and sites were adjacent to one another.

Results

After analysis of the compiled data was completed on the 24.54 miles of pipeline located in the Kutz Gathering System, it was found that 22.34 miles do not require future survey at present (22.32 of these miles were within the "arkie boundary" as outlined by the BIA-NIIP office and 0.014 mile was located on Navajo Nation land). During discussions with NIIP, WCRM discovered that NNHPD will approve procedures that will streamline maintenance, but NIIP and/or BIA procedures take precedence. Via correspondence with Michael Howe, a civil engineer with NIIP, it has been determined, as Mr. Maldonado indicated, that acreage listed inside the "arkie boundary" of the NIIP has been surveyed and does not require further survey. However, under an MOU signed in the 1970s, the NIIP/NAPI area is under the jurisdiction of the BIA. Despite the fact that the area does not need to be resurveyed according to NNHPD, we were informed that a request for *Archaeological and Historical Clearance* form must be filed with NIIP before final clearance is granted to Williams for work to proceed. As stated in the correspondence below, this clearance is usually granted but it does have to be reviewed by the Navajo Nation, NAPI, and the New Mexico Cultural Resources Office.

The "arkie boundary" is the only part of NIIP that has been cleared. Anything outside of that boundary has to be resurveyed. Also, anything within the NIIP boundary has [to] be cleared by our office with a request for Archaeological and Historical Clearance that we submit to the Navajo Nation, NAPI, and the NM Cultural Resources office. [Michael Howe,

WCRM

Western Cultural Resource Management, Inc.

BIA-NIIP, Tuesday, August 05, 2014 10:34 AM, Confirmed by Robert Begay, BIA, Friday, February 03, 2017.]

After integrating data from multiple sources, our GIS analyst believes that a 75-meter buffer on each side of the ROW is necessary to account for inaccurately plotted sites and surveys. Most surveys can be linked to existing facilities by their shape, even when there is a small disparity in the plotted location of the facility as compared to the survey for the location. This is not true of sites. Two site locations, near one another, and with varying shape and size, could represent either two plots of the same site or two sites. Therefore, we recommend a 75-meter buffer around each facility as necessary to protect Williams from inadvertently damaging inaccurately plotted sites. This 75-meter buffer is, moreover, an acceptable measure to NNHPD based on discussion with Ms. Billie and her understanding of the vagaries of the multiple data sources for areas outside the NIIP. A buffer of 75 meters on each side of the Williams shapefiles was used to identify which sites would be considered in proximity to the Williams pipelines and utilities.

Within NIIP, their rules make the 75-meter buffer moot. NIIP approves maintenance activities according to their current procedures. Michael Howe, NIIP, stated that the BIA-NIIP uses 100 ft as a sufficient distance between archaeological sites and project-related activity to ensure the protection of the cultural materials, about 50 ft less than the 75-meter buffer recommended elsewhere.

Fourteen site locations were identified, representing 11 archaeological sites. Six sites from the NNHPD database and eight site from the ARMS database were identified as requiring protective measures. It should be noted that some of the site identifiers represent duplicate sites in the two separate databases, although in slightly different locations. All sites across the entire project, NIIP and non-NIIP, must be protected; therefore, any time Williams is working in proximity to a known archaeological site, notification must be submitted to NNHPD for guidance.

It should be noted that the column in the accompanying attribute table/database that contains site eligibility for the NRHP contains only the descriptor "Unknown". The final determination for site eligibility will fall to the NNHPD or the New Mexico State Historic Preservation Officer, depending on land status.

Each of the data sets (NNHPD, ARMS, NIIP, Williams) exhibits varying degrees of accuracy, thereby limiting the precision of the relationship between cultural surveys and sites, and the existing rights-of-way. Because of this, NNHPD has agreed that, other than within NIIP, a 75-meter (~250 ft) buffer on each side of the Williams pipeline will be established before beginning any ground-disturbing activities to ensure that the cultural resources are protected and that additional survey need not be performed.

WCRM

Western Cultural Resource Management, Inc.

At present, there are no Traditional Cultural Properties (TCPs) documented within the project area; there are however there are six TCPs within five miles. These locations have been mapped in relation to the project area and will be presented to NNHPD in Appendix A.

Should any new survey be required then a search of the known TCPs will be performed at the NNHPD Traditional Cultural Properties office and interviews conducted with local residents about the existence of any community/local traditional cultural places. As is the policy with all new surveys, copies of the interviews, as well as maps showing the TCP locations, will be sent to the NNHPD TCP office to add to their database of known sacred places.

Guidelines

Williams should be aware that maintenance located within the NIIP boundary must still go through the procedures that have been set in place by the BIA. Areas outside the NIIP fall under the jurisdiction of either the NNHPD or the BOR.

NNHPD stated that areas outside the NIIP that have been surveyed during the last 10 years will not require further survey as a general rule. This 10-year time frame is not a written policy but a strong recommendation. It is important to note that the 10-year criterion makes this a moving target. An accompanying shapefile contains the date of survey for all previously inventoried areas outside NIIP boundaries. Williams should proceed with the knowledge that the 10-year recommendation is just that, a recommendation. Just one pipeline has been surveyed in the last 10 years (in 2013), suggesting that most surveys outside the NIIP will have to be redone.

"Our general rule of thumb for cut off is ten years, not written though." [Email from R. Maldonado, at the time acting Navajo Nation THPO. Thursday, July 10, 2014 3:49 PM. Confirmed by Tamara Billie, Acting THPO, Thursday, February 16, 2017.]

NNHPD has agreed that no notice is required for non-ground-disturbing activities (such as visual inspections while driving along existing roads); Williams need only submit notification for ground-disturbing activities. Michael Howe, BIA-NIIP, also stated in a phone conversation with WCRM that the need for notification on the NIIP is not essential for non-ground-disturbing activities (personal communication, 2014).

For any work on BOR-managed surface, there should be notification to the BOR office of maintenance, and re-survey of anything not already adequately inventoried to Bureau of Land Management (BLM) Class III [intensive inventory] standards in the last 10 years will be required. Any new cultural work must comply with ARMS/SHPO standards and may use BLM standards as a model for the details of reporting, where not in conflict (i.e., BLM standards cannot override SHPO standards off of BLM land because it is not backed by the BLM Programmatic Agreement, but the legal and regulatory requirements are the same, still being Department of Interior). If no other Federal entity is involved, BOR will be the lead agency by default.

WCRM

Western Cultural Resource Management, Inc.

Additionally, work in existing disturbance that is located outside the NIIP boundary on Navajo Nation land does not require notification or survey *but the work has to be completely restricted to the existing disturbance*. Any questions should provoke a notification.

Conclusions

As requested by Nelson Consultants on behalf of Williams, WCRM is providing the attached shapefiles outlining which areas currently will not require future survey for cultural resources. Two additional shapefiles identify archaeological sites that are located in proximity to Williams pipelines and will require inspection by a qualified archaeologist prior to the performance of any maintenance. Additionally, WCRM has provided Williams with a shapefile showing a clear boundary of the archaeologically surveyed areas of the Navajo Indian Irrigation Project, which was provided by BIA-NIIP.

In summary, no further survey is currently required on approximately 22.34 miles of the existing pipeline, of which approximately 22.32 miles are located on land managed by the BIA-NIIP and 0.014 mile fall on land managed by the Navajo Nation. Approximately 2.20 miles of pipeline corridor will require future survey prior to any ground disturbing activity located outside the existing corridor. These 2.20 miles fall within land under the jurisdiction of the NNHPD or on private land.

The pipelines located on the NIIP must still go through the BIA-NIIP current procedures. All archaeological sites within 75 meters of the pipeline and utility corridors must be protected, and therefore consultation with NNHPD must be initiated. We suggest the site locations of these be firmly established before any and all ground-disturbing activities.

It is important to note that NNHPD has made certain concessions to the existing maintenance RMP that will expedite the upkeep of the pipeline system located on the Navajo Nation. These include waiving notification before the performance of non-ground-disturbing activity and allowing the performance of maintenance work to be done with the existing disturbance.

Sincerely,

Deborah V. Gibson
Project Manager

12-October-2016

Noel Tamboer - Environmental Scientist
Nelson Consulting, Inc.

SUBJECT: Resource Management Plan Document for Williams Four Corners LLC

Noel Tamboer,

NNHP has performed an analysis of your project in comparison to known biological resources of the Navajo Nation and has included the findings in this letter. The letter is composed of seven parts. The sections as they appear in the letter are:

1. **Known Species** – a list of all species within relative proximity to the project
2. **Potential Species** – a list of potential species based on project proximity to respective suitable habitat
3. **Quadrangles** – an exhaustive list of quads containing the project
4. **Project Summary** – a categorized list of biological resources within relative proximity to the project grouped by individual project site(s) or quads
5. **Conditional Criteria Notes** – additional details concerning various species, habitat, etc.
6. **Personnel Contacts** – a list of employee contacts
7. **Resources** – identifies sources for further information

Known Species lists "species of concern" known to occur within proximity to the project area. Planning for avoidance of these species is expected. If no species are displayed then based upon the records of the Navajo Nation Department of Fish and Wildlife (NNDFW) there are no "species of concern" within proximity to the project. Refer to the Navajo Endangered Species List (NESL) Species Accounts for recommended avoidance measures, biology, and distribution of NESL species on the Navajo Nation (http://nnhp.nndfw.org/sp_account.htm).

Potential Species lists species that are potentially within proximity to the project area and need to be evaluated for presence/absence. If no species are found within the Known or Potential Species lists, the project is not expected to affect any federally listed species, nor significantly impact any tribally listed species or other species of concern. Potential for species has been determined primarily on habitat characteristics and species range information. A thorough habitat analysis, and if necessary, species specific surveys, are required to determine the potential for each species.

Species of concern include protected, candidate, and other rare or otherwise sensitive species, including certain native species and species of economic or cultural significance. For legally protected species, the following tribal and federal statuses are indicated: NESL, federal Endangered Species Act (ESA), Migratory Bird Treaty Act (MBTA), and Eagle Protection Act (EPA). No legal protection is afforded species with only ESA candidate, NESL group 4 status, and species listed on the Sensitive Species List. Please be aware of these species during surveys and inform the NNDFW of observations. Reported observations of these species and documenting them in project planning and management is important for conservation and may

Page 1 of 11

contribute to ensuring they will not be up listed in the future.

In any and all correspondence with NNDFW or NNHP concerning this project please cite the Data Request Code associated with this document. It can be found in this report on the top right corner of the every page. Additionally please cite this code in any biological evaluation documents returned to our office.

1. Known Species (NESL=Navajo Endangered Species List, FE=Federally Endangered, FT=Federally Threatened, FC=Federal Candidate)

Species

ALFO = *Aliciella formosa* / Aztec Gilia NESL G4
 ASSA = *Asclepias sanjuanensis* / San Juan Milkweed NESL G4
 LIPI = *Lithobates pipiens* / Northern Leopard Frog NESL G2
 SCCLBR = *Sclerocactus cloveriae* ssp. *brackii* / Brack Hardwall Cactus NESL G4

2. Potential Species

Species

ALFO = *Aliciella formosa* / Aztec Gilia NESL G4
 AQCH = *Aquila chrysaetos* / Golden Eagle NESL G3
 ASSA = *Asclepias sanjuanensis* / San Juan Milkweed NESL G4
 ATCU = *Athene cunicularia* / Burrowing Owl NESL G4
 BURE = *Buteo regalis* / Ferruginous Hawk NESL G3
 CHMO = *Charadrius montanus* / Mountain Plover NESL G4
 EMTREX = *Empidonax traillii* *extimus* / Southwestern Willow Flycatcher NESL G2 FE
 FAPE = *Falco peregrinus* / Peregrine Falcon NESL G4
 MUNI = *Mustela nigripes* / Black-footed Ferret NESL G2 FE
 PUPA = *Puccinellia parishii* / Parish's Alkali Grass NESL G4
 SCCLBR = *Sclerocactus cloveriae* ssp. *brackii* / Brack Hardwall Cactus NESL G4
 VUMA = *Vulpes macrotis* / Kit Fox NESL G4

3. Quadrangles (7.5 Minute)

Quadrangles

East Fork Kutz Canyon (36107-E8) / NM
 Gallegos Trading Post (36108-E1) / NM

4. Project Summary (EO1 Mile/EO 3 Miles=elements occurring within 1 & 3 miles., MSO=mexican spotted owl PACs, POTS=potential species, RCP=Biological Areas)

5. Conditional Criteria Notes (Recent revisions made please read thoroughly. For certain species, and/or circumstances, please read and comply)

- A. **Biological Resource Land Use Clearance Policies and Procedures (RCP)** - The purpose of the RCP is to assist the Navajo Nation government and chapters ensure compliance with federal and Navajo laws which protect, wildlife resources, including plants, and their habitat resulting in an expedited land use clearance process. After years of research and study, the NNDFW has identified and mapped wildlife habitat and sensitive areas that cover the entire Navajo Nation. The following is a brief summary of six (6) wildlife areas:
1. **Highly Sensitive Area** – recommended no development with few exceptions.
 2. **Moderately Sensitive Area** – moderate restrictions on development to avoid sensitive species/habitats.
 3. **Less Sensitive Area** – fewest restrictions on development.
 4. **Community Development Area** – areas in and around towns with few or no restrictions on development.
 5. **Biological Preserve** – no development unless compatible with the purpose of this area.
 6. **Recreation Area** – no development unless compatible with the purpose of this area.
- None** - outside the boundaries of the Navajo Nation
- This is not intended to be a full description of the RCP please refer to the our website for additional information at <http://www.nndfw.org/clup.htm>.
- B. **Raptors** – If raptors are known to occur within 1 mile of project location: Contact Chad Smith at 871-7070 regarding your evaluation of potential impacts and mitigation.
- o **Golden and Bald Eagles**- If Golden or Bald Eagle are known to occur within 1 mile of the project, decision makers need to ensure that they are not in violation of the Golden and Bald Eagle Nest Protection Regulations found at http://nnhp.nndfw.org/docs_reps/gben.pdf.
 - o **Ferruginous Hawks** – Refer to "Navajo Nation Department of Fish and Wildlife's Ferruginous Hawk Management Guidelines for Nest Protection" http://nnhp.nndfw.org/docs_reps.htm for relevant information on avoiding impacts to Ferruginous Hawks within 1 mile of project location.
 - o **Mexican Spotted Owl** - Please refer to the Navajo Nation Mexican Spotted Owl Management Plan http://nnhp.nndfw.org/docs_reps.htm for relevant information on proper project planning near/within spotted owl protected activity centers and habitat.

- C. **Surveys** – Biological surveys need to be conducted during the appropriate season to ensure they are complete and accurate please refer to NN Species Accounts http://nnhp.nndfw.org/sp_account.htm. Surveyors on the Navajo Nation must be permitted by the Director, NNDFW. Contact Jeff Cole at (928) 871-7068 for permitting procedures. Questions pertaining to surveys should be directed to the NNDFW Zoologist (Chad Smith) for animals at 871-7070, and Botanist (Andrea Hazelton) for plants at (928)523-3221. Questions regarding biological evaluation should be directed to Jeff Cole at 871-7068.
- D. **Oil/Gas Lease Sales** – Any settling or evaporation pits that could hold contaminants should be lined and covered. Covering pits, with a net or other material, will deter waterfowl and other migratory bird use. Lining pits will protect ground water quality.
- E. **Power line Projects** – These projects need to ensure that they do not violate the regulations set forth in the Navajo Nation Raptor Electrocution Prevention Regulations found at http://nnhp.nndfw.org/docs_reps/repr.pdf.
- F. **Guy Wires** – Does the project design include guy wires for structural support? If so, and if bird species may occur in relatively high concentrations in the project area, then guy wires should be equipped with highly visual markers to reduce the potential mortality due to bird-guy wire collisions. Examples of visual markers include aviation balls and bird flight diverters. Birds can be expected to occur in relatively high concentrations along migration routes (e.g., rivers, ridges or other distinctive linear topographic features) or where important habitat for breeding, feeding, roosting, etc. occurs. The U.S. Fish and Wildlife Service recommends marking guy wires with at least one marker per 100 meters of wire.
- G. **San Juan River** – On 21 March 1994 (Federal Register, Vol. 59, No. 54), the U.S. Fish and Wildlife Service designated portions of the San Juan River (SJR) as critical habitat for *Ptychocheilus lucius* (Colorado pikeminnow) and *Xyrauchen texanus* (Razorback sucker). Colorado pikeminnow critical habitat includes the SJR and its 100-year floodplain from the State Route 371 Bridge in T29N, R13W, sec. 17 (New Mexico Meridian) to Neskahai Canyon in the San Juan arm of Lake Powell in T41S, R11E, sec. 26 (Salt Lake Meridian) up to the full pool elevation. Razorback sucker critical habitat includes the SJR and its 100-year floodplain from the Hogback Diversion in T29N, R16W, sec. 9 (New Mexico Meridian) to the full pool elevation at the mouth of Neskahai Canyon on the San Juan arm of Lake Powell in T41S, R11E, sec. 26 (Salt Lake Meridian). All actions carried out, funded or authorized by a federal agency which may alter the constituent elements of critical habitat must undergo section 7 consultation under the Endangered Species Act of 1973, as amended. Constituent elements are those physical and biological attributes essential to a species conservation and include, but are not limited to, water, physical habitat, and biological environment as required for each particular life stage of a species.
- H. **Little Colorado River** - On 21 March 1994 (Federal Register, Vol. 59, No. 54) the U.S. Fish and Wildlife Service designated Critical Habitat along portions of the Colorado and Little Colorado Rivers (LCR) for *Gila cypha* (humpback chub). Within or adjacent to the Navajo Nation this critical habitat includes the LCR and its 100-year floodplain from river mile 8 in T32N R6E, sec. 12 (Salt and Gila River Meridian) to its confluence with the Colorado River in T32N R5E sec. 1 (S&GRM) and the Colorado River and 100-year floodplain from Nautuloid Canyon (River Mile 34) T36N R5E sec. 35 (S&GRM) to its confluence with the LCR. All actions carried out, funded or authorized by a federal agency which may alter the constituent elements of Critical Habitat must undergo section 7 consultation under the Endangered Species Act of 1973, as amended. Constituent elements are those physical and biological attributes essential to a species conservation and include, but are not limited to, water, physical habitat, and biological environment as required for each particular life stage of a species.

- I. **Wetlands** – In Arizona and New Mexico, potential impacts to wetlands should also be evaluated. The U.S. Fish & Wildlife Service's National Wetlands Inventory (NWI) maps should be examined to determine whether areas classified as wetlands are located close enough to the project site(s) to be impacted. In cases where the maps are inconclusive (e.g., due to their small scale), field surveys must be completed. For field surveys, wetlands identification and delineation methodology contained in the "Corps of Engineers Wetlands Delineation Manual" (Technical Report Y-87-1) should be used. When wetlands are present, potential impacts must be addressed in an environmental assessment and the Army Corps of Engineers, Phoenix office, must be contacted. NWI maps are available for examination at the Navajo Natural Heritage Program (NNHP) office, or may be purchased through the U.S. Geological Survey (order forms are available through the NNHP). The NNHP has complete coverage of the Navajo Nation, excluding Utah, at 1:100,000 scale; and coverage at 1:24,000 scale in the southwestern portion of the Navajo Nation. In Utah, the U.S. Fish & Wildlife Service's National Wetlands Inventory maps are not yet available for the Utah portion of the Navajo Nation, therefore, field surveys should be completed to determine whether wetlands are located close enough to the project site(s) to be impacted. For field surveys, wetlands identification and delineation methodology contained in the "Corps of Engineers Wetlands Delineation Manual" (Technical Report Y-87-1) should be used. When wetlands are present, potential impacts must be addressed in an environmental assessment and the Army Corps of Engineers, Phoenix office, must be contacted. For more information contact the Navajo Environmental Protection Agency's Water Quality Program.
- J. **Life Length of Data Request** – The information in this report was identified by the NNHP and NNDFW's biologists and computerized database, and is based on data available at the time of this response. If project planning takes more than two (02) years from the date of this response, verification of the information provided herein is necessary. It should not be regarded as the final statement on the occurrence of any species, nor should it substitute for on-site surveys. Also, because the NNDFW information is continually updated, any given information response is only wholly appropriate for its respective request.
- K. **Ground Water Pumping** – Projects involving the ground water pumping for mining operations, agricultural projects or commercial wells (including municipal wells) will have to provide an analysis on the effects to surface water and address potential impacts on all aquatic and/or wetlands species listed below NESL Species potentially impacted by ground water pumping: *Carex specuicola* (Navajo Sedge), *Cirsium rydbergii* (Rydberg's Thistle), *Primula specuicola* (Cave Primrose), *Platanthera zothecina* (Alcove Bog Orchid), *Puccinellia parishii* (Parish Alkali Grass), *Zigadenus vaginatus* (Alcove Death Camas), *Penstemon specuicola* (Alcove Rock Daisy), *Symphotrichum welshii* (Welsh's American-aster), *Coccyzus americanus* (Yellow-billed Cuckoo), *Empidonax traillii extimus* (Southwestern Willow Flycatcher), *Rana pipiens* (Northern Leopard Frog), *Gila cypha* (Humpback Chub), *Gila robusta* (Roundtail Chub), *Ptychocheilus lucius* (Colorado Pikeminnow), *Xyrauchen texanus* (Razorback Sucker), *Cinclus mexicanus* (American Dipper), *Speyeria nokomis* (Western Seep Fritillary), *Aechmophorus clarkii* (Clark's Grebe), *Ceryle alcyon* (Belted Kingfisher), *Dendroica petechia* (Yellow Warbler), *Forzana carolina* (Sora), *Catostomus discobolus* (Bluehead Sucker), *Cottus bairdi* (Mottled Sculpin), *Oxytoma kanabense* (Kanab Ambersnail)

Williams will not assume authorization if NNHP has not replied within 15 days.
Wildlife - Amphibians						
Northern leopard frog (<i>Lithobates pipiens</i>)	G2	Known	Indefinitely	Current year only	If activity location within POA and, Activity will be ground-disturbing or will involve vegetation maintenance and Activity location is within 200 feet of wetlands with permanent water and aquatic vegetation (including irrigation ditches, streams, small ponds, and rivers)	If individual(s) identified: Williams will consult with NNHP for minimum site-specific mitigation. Consultation and authorization from NNHP will occur prior to proceeding with activity. Williams will not assume authorization if NNHP has not replied within 15 days.

Species	Status (Navajo & Federal)	Occurrence within Renewal Area ¹	Length of Time for Which Previous Negative Habitat Surveys Remain Valid ²	Length of Time for Which Previous Negative Species Surveys Remain Valid ³	When Biological Survey Required ⁴	If Species or Appropriate Habitat Identified During Habitat Survey, Minimum Mitigation
Wildlife – Birds⁵						
Burrowing owl (<i>Athene cunicularia</i>)	G4	Potential	10 years	Current year only	If activity location within POA and Activity will be ground-disturbing or will involve vegetation maintenance and, Prairie dog colony (active or abandoned) is present and Activity will occur between March 1 and August 15	If active nest burrow(s) identified: Williams will consult with NNDFW for minimum site-specific mitigation. Consultation and authorization from NNHP will occur prior to proceeding with activity. Williams will not assume authorization if NNHP has not replied within 15 days.
Ferruginous hawk (<i>Buteo regalis</i>)	G3	Potential	Indefinitely	Current year only	If activity location within POA and Activity is ground- disturbing or a nest is identified on a power pole in vicinity of activity location and Activity will occur between March 1 and July 31	If active nest identified: Between March 1 and July 31 (or until 30 days post-fledging if the age of young have been accurately determined), some activities will be prohibited within 1 mile of nest (see Ferruginous Hawk Management Guidelines ⁶). If general habitat identified near activity location: General mitigation will occur (see Ferruginous Hawk Management Guidelines ⁶).

Species	Status (Navajo & Federal)	Occurrence within Renewal Area ¹	Length of Time for Which Previous Negative Habitat Surveys Remain Valid ²	Length of Time for Which Previous Negative Species Surveys Remain Valid ³	When Biological Survey Required ⁴	If Species or Appropriate Habitat Identified During Habitat Survey, Minimum Mitigation
Golden eagle (<i>Aquila chrysaetos</i>)	G3	Potential	Indefinitely	Current year only	<p>If activity location within POA and Activity is ground-disturbing and Activity will occur between January 15 and July 15</p>	<p>If active nest identified: Between February 1 and July 15, some activities will be prohibited within 0.8 mile of nest (see Golden and Bald Eagle Nest Protection Regulations⁷).</p> <p>If appropriate habitat identified near activity location: General mitigation will occur (see Golden and Bald Eagle Nest Protection Regulations⁷).</p>
Mountain plover (<i>Charadrius montanus</i>)	G4	Potential	Indefinitely	Current year only	<p>If activity location within POA and Activity will be ground-disturbing or will involve vegetation maintenance and Activity location is within grassland or badland area and Activity will occur between April 1 and July 15</p>	<p>If nest with eggs identified: All activities within 660 feet of nest will be delayed 37 days.</p> <p>If nest with flightless chicks identified: All activities within 660 feet of a nest will be delayed 7 days.</p> <p>If occupied habitat identified: Between April 1 and July 15, ground-disturbing activities will be prohibited within habitat.</p>

Species	Status (Navajo & Federal)	Occurrence within Renewal Area ¹	Length of Time for Which Previous Negative Habitat Surveys Remain Valid ²	Length of Time for Which Previous Negative Species Surveys Remain Valid ³	When Biological Survey Required ⁴	If Species or Appropriate Habitat Identified During Habitat Survey, Minimum Mitigation
Peregrine falcon (<i>Falco</i> <i>peregrinus</i>)	G4	Potential	Indefinitely	Current year only	If location within POA and Activity is ground-disturbing and Activity will occur between March 1 and July 31	If active nest identified: Between March 1 and July 31, all activities will be prohibited within 0.5 mile of nest.
Southwestern willow flycatcher (<i>Empidonax</i> <i>trillii</i> ssp. <i>extimus</i>)	G2 Federally Endanger ed	Potential	10 years	Current year only	If location within POA and Activity will be ground-disturbing or will involve vegetation maintenance and Activity will occur between May 1 and August 31	If active nest identified: Between May 1 and August 31, all activities will be prohibited within 0.2 mile of nest. Buffer may be reduced after Williams consults with NNHP; in such a case, consultation and authorization from NNHP will occur prior to proceeding with activity. Williams will not assume authorization if NNHP has not replied within 15 days. If appropriate migratory habitat identified: Between May 1 and June 15, all activities within habitat will be prohibited. If no survey conducted during appropriate survey period: Between May 1 and August 31, all activities will be prohibited within 0.3 mile of potential habitat.

Species	Status (Navajo & Federal)	Occurrence within Renewal Area ¹	Length of Time for Which Previous Negative Habitat Surveys Remain Valid ²	Length of Time for Which Previous Negative Species Surveys Remain Valid ³	When Biological Survey Required ⁴	If Species or Appropriate Habitat Identified During Habitat Survey, Minimum Mitigation
Wildlife - Mammals						
Black-footed ferret (<i>Mustela nigripes</i>)	G2 Federally Endanger ed	Potential	10 years	Current year only	If location within POA and Activity will be ground-disturbing and Activity location is within a prairie dog colony that meets the habitat requirements listed in the USFWS and Navajo Nation guidelines ⁸ .	If individual(s) identified: Williams will contact NNHP for minimum site-specific mitigation. Consultation and authorization from NNHP will occur prior to proceeding with activity. Williams will not assume authorization if NNHP has not replied within 15 days ^{8 and 9} .
Kit fox (<i>Vulpes macrotus</i>)	G4	Potential	Indefinitely	Current year only	NNHP, when consulted, requests a survey or Williams personnel observe potential den-site near activity location	If known den-site identified: No ground-disturbing activities will occur year-round within 200 feet. Between December 1 and August 31, no activity will occur within 660 feet of active den.

¹ Information provided in NNHP Data Response.

² Negative habitat surveys are field surveys that indicate "no appropriate habitat" for a particular species is present.

³ Negative species surveys are field surveys during which a particular species was not identified as being present.

⁴ Information provided during consultation with NNHP.

Appendix F. Cultural Resources Protection Guide

Williams' Cultural Resources Protection Guide for Ground-Disturbing Activities within Renewal Area

A. Determine Activity Location (using NIIP shapefile)

1. If within NIIP
Proceed to Step C.
2. Otherwise
Proceed to Step B.

B. Determine Activity Location Footprint

1. If not within NIIP and will be entirely within a previously ground-disturbed area
No surveys or notifications required. Proceed to Step H.
2. Otherwise
Proceed to Step C.

C. Determine Cultural Survey Status (Using Cultural Surveys shapefile)

1. If within NIIP and has been previously surveyed at any time
OR
If outside of NIIP and has been surveyed within the last 10 years
No survey required. Proceed to Step E.
2. Otherwise
Survey required. Proceed to Step D

D. Conduct Cultural Survey

If the activity location is within a previously unsurveyed area or a non-NIIP area that hasn't been surveyed within 10 years:

- Arrange for a qualified archaeologist to conduct a literature review (including an investigation of traditional cultural property information for the area) and archaeological survey for the activity location.
- Ensure the archaeologist submits a cultural report to NNHPD (via email) with the results of the literature review and survey.
- Update the Cultural Maps, Cultural Surveys shapefile, and Cultural Sites shapefile to indicate the newly surveyed locations, new survey dates, and location of cultural resources identified during the survey.
- Proceed to Step E.

E. Submit Notification to NIIP

If the activity location is within NIIP:

- Submit a request for an Archaeological and Historical Clearance form to NIIP via email.
- Proceed to Step F.

F. Determine Cultural Sites Status (using Cultural Sites shapefile)

1. If no cultural sites in vicinity of activity location
NNHPD notification not required. Proceed to Step I.
2. Otherwise
NNHPD notification required. Proceed to Step G.

G. Submit Notification to NNHPD

If cultural sites have been identified within the vicinity of the activity location:

- Submit notification of the activity to NNHPD via email. The notification will include the following information:
 - General description of the activity
 - Activity location (legal location, coordinates, and narrative [e.g., “immediately west of the U.S. Highway 550 corridor”])
 - Approximate size of the activity location (e.g., “300 by 40 feet”)
 - Expected start date and duration of the activity
 - Description of known cultural resources within proximity of the activity location, including whether each identified site is known eligible, potentially eligible, or not eligible for NRHP listing
 - Suggested mitigation (such as fencing or monitoring) to protect cultural resources
- Proceed to Step H.

H. Receive Activity Authorization

- If notification was submitted to NNHPD, expect a response within 15 calendar days of the notification. If no response is received within 15 days, it is assumed that NNHPD authorizes Williams to proceed with the activity. If a response is received, incorporate requested mitigation measures (if any) into procedures.
- If notification was submitted to NIIP, ensure that authorization is received.
- Once authorization is received/assumed from NNHPD and/or NIIP, proceed to Step I.

I. Proceed with Activity

Proceed with the activity, assuming that all other procedures discussed in Chapter 5 of the RMP (Resource-Protection Procedures) have been addressed. Ensure that general and site-specific cultural resources protection procedures occur as described in notifications and responses (if required). At minimum, if the activity would be ground-disturbing and a site that is eligible or potentially eligible for NRHP listing is close enough to the activity location to be potentially impacted by the activity, temporary fencing would be placed around the site.

Appendix G. Cultural Sites Shapelles

Williams_RMP_Sites_Within_75_Meters_of_CL_2_6_17.zip

Williams_RMP_Lines_Survey_Requirments_as_of_1_30_17.zip

Appendix H. NESL Species Protection Guide

Species Protection Guide for Activities within Renewal Area

A. Identify POAs within Activity Location

POAs are included in the shapefiles created by NNHP for the RMP, and are shown on the Maps in Appendix A.5 of the RMP. Refer to the Species Protection Table in Appendix E to complete this step; take previous survey validation periods into account.

1. If the activity does not meet the criteria for a biological survey, based on the information provided in the Species Protection Table in Appendix E

Proceed to Step C.

2. Otherwise

Proceed to Step B.

B. Conduct Biological Survey(s)

If the Species Protection Table in Appendix E indicates that a biological survey is required:

- Arrange for a qualified biologist to conduct a biological survey for NESL-listed species habitat within the activity location. Habitat surveys can occur at any time of year.
- If appropriate habitat is present for any NESL-listed species, ensure that the biologist conducts a species survey for the associated species. Species survey windows and methods are provided in the NNHP Species Accounts (http://nnhp.rndfw.org/sp_account.htm). The species survey can be conducted at the same time as the habitat survey, if the survey window coincides with the habitat survey date. If for some reason a species survey cannot occur during the survey window, contact NNHP to discuss alternatives.
- If an NESL-listed species is observed during a survey, ensure that the biologist immediately notifies NNHP. The following information will be reported:
 - Location (including map[s]) of the individual(s),
 - Vegetation community,
 - Date of observation ,
 - Condition/health of individual(s), and
 - A brief narrative.
- Following the completion of all of the biological surveys associated with an activity location, ensure that the biologist submits a brief report to Williams with the following information regarding each species associated with the POA(s) in which the activity location is found:
 - Whether or not appropriate habitat for the species is present,
 - Whether or not the activity may have an adverse effect on the species, and
 - Suggested mitigation (minimum mitigation measures for each species are provided in the Table in Appendix E)

- Update the POAs shapefiles and POA Maps to indicate if appropriate habitat for each species is or is not present within the activity location.

C. Submit notification to NNHP (at least 15 days prior to activity)

Submit notification of the activity to NNHP via email and hard-copy letter. The notification will include the following information:

- General description of the activity,
- Activity location (legal location, coordinates, and narrative (e.g., "immediately west of the U.S. Highway 550 corridor"),
- Approximate size of the activity location (e.g., "300 by 40 feet"),
- Expected start date and duration of the activity,
- RCP Area in which the activity will be located ,
- POA(s) in which the activity will be located (if any),
- Whether or not a biological survey occurred,
- Whether or not appropriate habitat for NESL-listed species is present (if POA[s] present),
- Whether or not NESL-listed species were identified (if survey occurred),
- Whether or not the Williams activity may have an adverse effect on NESL-listed species, and
- Suggested mitigation (minimum mitigation measures for each species are provided in the Species Protection Table)

D. Receive Activity Authorization

- If consultation with NNHP is a minimum mitigation measure for the activity (per Species Protection Table in Appendix E), complete consultation and authorization prior to proceeding with the activity. Incorporate requested surveys and/or mitigation measures (if any) into procedures.
- If a response is received, incorporate requested surveys and/or mitigation measures (if any) into procedures.

E. Proceed with Activity

Proceed with the activity, assuming that all other procedures discussed in Chapter 5 of the RMP (Resource-Protection Procedures) have been addressed. Ensure that general and site-specific cultural and biological resource protection procedures occur as described in notifications and responses (if required). If a monitor is required as mitigation, ensure that the monitor has a copy of the list of site-specific cultural and/or biological mitigation required for the activity. The monitor would be authorized to stop activities that are in violation of such mitigation.

Appendix I. Revegetation Plan

Williams Revegetation Plan for Ground-Disturbing Activities within Renewal Area

Prevention of Noxious Weeds

Construction equipment will be inspected and cleaned prior to entering the activity location, and immediately after leaving the activity location.

Activities with more than 1 acre of surface disturbance:

1. Seedbed Preparation

- a. The seedbed will be firm and free of competing vegetation.
- b. If rainfall occurs prior to seeding, the surface crust will be broken using a drag, disc, or other approved method.

2. Seeding

- a. If possible, seeding will occur between early June and early July. If this is not possible, seeding will occur following activity completion.
- b. Seed mix will be chosen based on feasibility of growth and appropriate vegetation community.
- c. Seed mix will be certified weed-free seed.
- d. Seed labels from seed bags will be available for inspection during seeding activities.
- e. Drilling will be used whenever possible. Drills will be equipped with hoppers that can properly meter out seed. If seeds are fluffy, special agitators or bulking agents (such as rice hulls or cracked corn) will be used. A control, such as depth bands, will be used with the drills to ensure that seeding isn't too deep; drills will plant seed 0.5 to 1.0 inch deep (this will apply to most range grasses). The drills will be equipped with packer wheels, or the area will be rolled immediately after seeding.

EXHIBIT "D"
NAVAJO NATION RIGHTS-OF-WAY TERMS AND CONDITIONS

WILLIAMS FOUR CORNERS LLC (GRANTEE)

1. The term of the rights-of-way (ROWs) shall be for twenty (20) years, beginning on the date the ROWs are approved by the Navajo Nation.
2. Consideration for the ROWs is assessed at \$1,470,000.00 and shall be paid in full to the Controller of the Navajo Nation, in lawful money of the United States, and a copy of the receipt of such payment provided to the Navajo Nation Minerals Department, or its successor, within ten (10) days of approval and consent to the grant of the ROWs by the Navajo Nation. This assessment does not include \$85,312.13 which was deposited by Gas Company of New Mexico and held in the Suspense Deposit System of the U.S. Department of Interior and shall be credited to the Navajo Nation for this application following approval of these ROWs.
3. The Grantee may develop, use and occupy the ROWs for the purpose(s) of operating and maintaining existing oil and gas pipelines, as identified in Exhibit A-1 and Exhibit A-2. The Grantee may not develop, use or occupy the ROWs for any other purpose, nor allow others to use or occupy the ROWs for any other purpose, without the prior written approval of the Navajo Nation and the Secretary of the Interior. The approval of the Navajo Nation may be granted, granted upon conditions or withheld in the sole discretion of the Navajo Nation. The Grantee may not develop, use or occupy the ROWs for any unlawful purpose.
4. In all activities conducted by the Grantee within the Navajo Nation, the Grantee shall abide by all laws and regulations of the Navajo Nation and of the United States, now in force and effect or as hereafter may come into force and effect, including but not limited to the following:
 - a. Title 25. Code of Federal Regulations, Part 169; subject to the terms of these ROWs; and
 - b. All applicable federal and Navajo Nation antiquities laws and regulations, with the following additional condition: In the event of a discovery all operations in the immediate vicinity of the discovery must cease and the Navajo Nation Historic Preservation Department must be notified immediately. As used herein, "discovery" means any previously unidentified or incorrectly identified cultural resources, including but not limited to archeological deposits, human remains, or location reportedly associated with Native American religious/traditional beliefs or practices; and
 - c. The Navajo Nation Preference in Employment Act, 15 N.N.C. §§ 601 et seq., and the Navajo Nation Business Opportunity Act, 5 N.N.C. §§ 201 et seq.; and
 - d. The Navajo Nation Water Code. 22 N.N.C. § 1101 et seq. Grantee shall apply for and submit all applicable permits and information to the Navajo Nation Water Resources Department, or its successor.
5. The Grantee shall ensure that the air quality of the Navajo Nation is not jeopardized due to violation of applicable laws and regulations by its operations pursuant to the ROWs.
6. The Grantee shall clear and keep clear the lands within the ROWs to the extent compatible with the purpose of the ROWs, and shall dispose of all vegetation and other materials cut, uprooted, or otherwise accumulated during any surface disturbance activities.
7. The Grantee shall reclaim all surface lands disturbed related to the ROWs, as outlined in a restoration and

- revegetation plan, which shall be approved by the Navajo Nation Environmental Protection Agency (NNEPA) prior to any surface disturbance. The Grantee shall comply with all provisions of such restoration and revegetation plan and shall notify the Director of the NNEPA immediately upon completion of the surface disturbance activities so that a site inspection can be made.
8. The Grantee shall at all times during the term of the ROWs and at the Grantee's sole cost and expense, maintain the land subject to the ROWs and all improvements located thereon and make all necessary and reasonable repairs.
 9. The Grantee shall obtain prior written permission to cross existing ROWs, if any, from the appropriate parties.
 10. The Grantee shall be responsible for and promptly pay all damages when they are sustained.
 11. The Grantee shall indemnify and hold harmless the Navajo Nation and the Secretary of the Interior and their respective authorized agents, employees, land users and occupants, against any liability for loss of life, personal injury and property damages arising from the development, use or occupancy or use of ROWs by the Grantee.
 12. The Grantee shall not assign, convey, transfer or sublet in any manner whatsoever, the ROWs or any interest therein, or in or to any of the improvements on the land subject to the ROWs, without the prior written consent of the Navajo Nation and the Secretary of the Interior. Any such attempted assignment, conveyance or transfer without such prior written consent shall be void and of no effect. The consent of the Navajo Nation may be granted, granted upon conditions or withheld in the sole discretion of the Navajo Nation.
 13. The Navajo Nation may terminate the ROWs for violation of any of the terms and conditions stated herein. In addition, the ROWs shall be terminable in whole or part by the Navajo Nation for any of the following causes:
 - a. Failure to comply with any terms and conditions of the grant or of applicable laws or regulations; or
 - b. A non-use of the ROWs for the purpose for which it is granted for a consecutive two-year period; or
 - c. The use of the land subject to the ROWs for any purpose inconsistent with the purpose for which the ROWs is granted; or
 - d. An abandonment of the ROWs.
 14. At the termination of this ROWs, the Grantee shall peaceably and without legal process deliver up the possession of the premises, in good condition, usual wear and tear excepted. Upon the written request of the Navajo Nation, the Grantee shall provide the Navajo Nation, at the Grantee's sole cost and expense, with an environmental audit assessment of the premises at least sixty (60) days prior to delivery of said premises.
 15. Holding over by the Grantee after the termination of the ROWs shall not constitute a renewal or extension thereof or give the Grantee any rights hereunder or in or to the land subject to the ROWs or to any improvements located thereon.
 16. The Navajo Nation and the Secretary of the Interior shall have the right, at any reasonable time during the term of the ROWs, to enter upon the premises, or any part thereof, to inspect the same and any improvements located thereon.

17. By acceptance of the grant of ROWs, the Grantee consents to the full territorial legislative, executive and judicial jurisdiction of the Navajo Nation, including but not limited to the jurisdiction of the Navajo Nation, including but not limited to the jurisdiction to levy fines and to enter judgments for compensatory and punitive damages and injunctive relief, in connection with all activities conducted by the Grantee within the Navajo Nation or which have a proximate (legal) effect on persons or property within the Navajo Nation.
18. By acceptance of the grant of ROWs, the Grantee covenants and agrees never to contest or challenge the legislative, executive or judicial jurisdiction of the Navajo Nation on the basis that such jurisdiction is inconsistent with the status of the Navajo Nation as an Indian nation, or that the Navajo Nation government is not a government of general jurisdiction, or that the Navajo Nation government does not possess full police power (i.e., the power to legislate and regulate for the general health and welfare) over all lands, persons and activities within its territorial boundaries, or on any other basis not generally applicable to a similar challenge to the jurisdiction of a state government. Nothing contained in this provision shall be construed to negate or impair federal responsibilities with respect to the land subject to the ROWs or to the Navajo Nation.
19. Any action or proceeding brought by the Grantee against the Navajo Nation in connection with or arising out of the terms and conditions of the ROWs shall be brought only in the Courts of the Navajo Nation, and no such action or proceeding shall be brought by the Grantee against the Navajo Nation in any court of any state.
20. Nothing contained herein shall be interpreted as constituting a waiver, express or implied, of the sovereign immunity of the Navajo Nation.
21. Except as prohibited by applicable federal law, the law of the Navajo Nation shall govern the construction, performance and enforcement of the terms and conditions contained herein.
22. The terms and conditions contained herein shall extend to and be binding upon the successors, heirs, assigns, executors, administrators, employees and agents, including all contractors and subcontractors, of the Grantee, and the term "Grantee," whenever used herein, shall be deemed to include all such successors, heirs, assigns, executors, administrators, employees and agents.
23. There is expressly reserved to the Navajo Nation full territorial legislative, executive and judicial jurisdiction over the ROWs and all lands burdened by the ROWs, including without limitation over all persons, including the public, and all activities conducted or otherwise occurring within the ROWs; and the ROWs and all lands burdened by the ROWs shall be and forever remain Navajo Indian Country for purposes of Navajo Nation jurisdiction.
24. The Navajo Nation reserves the right to grant ROWs within the ROWs referenced herein for utilities, provided that such ROWs do not unreasonably interfere with the Grantee's use of the ROWs.

MEMORANDUM

TO: Document Reviewers

FROM:

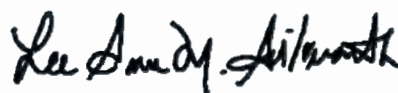

April Quinn, Attorney
Natural Resources Unit, Department of Justice

DATE: February 7, 2018

SUBJECT: Document No. 008642

The above referenced document has been deemed legally sufficient. Upon discussion with the Navajo Nation Minerals Department and the rights-of-way applicant, Williams Four Corners LLC, I have edited the proposed resolution enclosed as a component of this document packet. Redlined and clean versions of the proposed resolution are enclosed in the packet for your reference.

Tier 2 Document Voting Results

User Name (Facility)	Job Title	Department	Vote Cast	Comments	Replies	Vote Date	Signature
Bidtah N. Becker (FBFA)	FBFA Users	FBFA Action Team	Approved	1. GLDD: As you know, I "issue a vote" on a package after all the Tier 2 voters have "issued a vote." In this instance, there is one Tier 2 Reviewer who has not yet "issued a vote" and that is Richard Begay, Tribal Historic Preservation Officer (THPO). Sue to my schedule, I am marking this package sufficient at this time so long as THPO Begay marks the package as sufficient. While I anticipate THPO Begay will mark the package sufficient based on the review of Ms. Tamara Billie, he may not. If THPO Begay marks the package insufficient, please let me know immediately so that I can review and adjust my "vote" if necessary. Thanks.	1. No Reply	08-Dec-2017

Patricia Maples, Environmental Specialist
NNEPA Leaking Storage Tank Program

Date : September 1, 2017

Ref: Navajo Land Title Data System Electronic 164 Process Review
Rights of Way Klutz Gathering System for Natural Gas

Pkt #: 003_H005_00008642__zip_17_01_35

To Whom it May concern

Navajo Nation Environmental Protection Agency Leaking Storage Tank Program (NNEPA/LSTP) would like the developer to be aware that leaking petroleum contaminated sites may be present within the proposed areas.

NNEPA/LSTP must be notified immediately if petroleum contamination is discovered during any activities anywhere within the specified Right of Way area(s).

If you have any questions, please call the program at 928-871-7993.
