Part 2. Expenditure Plan details.

(a) Describe the Program(s) and/or Project(s) to be funded, including how the funds will be used, for what purposes, the location(s) to be served, and what COVID-related needs will be addressed:

An inappropriately designed and sized transfer station contributes to the poor health of many of our community members. The Pine Hill Health Center operates a Public Health System, and Emergency Medical System that have been dealing with Community wide COVID 19 Pandemic. The two programs have reports large volumes of trash at residencies. Debris and trash near homes allows rodents to live close to people, increasing exposure to Hantavirus, food borne diseases and Leptospirosis. A properly sized and designed transfer station will limit exposure to any health diseases for the Ramah Navajo Community members.

(b) Explain how the Program or Project will benefit the Navajo Nation, Navajo communities, or the Navajo People:

This Project will benefit the approximately 5,000 citizens who reside within the Ramah Navajo Community area and others, such as visitors. There are many issues with illegal dumping and littering occurring in this area. Construction of a transfer station will address these issues and help to advance the health of the community. Dumping also creates a safety hazard if materials are liquid and they contaminate groundwater or poison surrounding livestock.

Navajo Nation TIF Selection Committee,

The Pine Hill Health Center strongly supports the efforts of the Ramah Navajo Chapter and their application for Tribal Infrastructure Funds. The Pine Hill Health Clinic recognizes the need for funding assistance to meet the needs of our community with a transfer station that is sized appropriately for the chapter. Currently the Ramah Chapter is served by a small transfer station with limited capabilities.

An inappropriately designed and sized transfer station contributes to the poor health of many of our community members. The Pine Hill Health Center operates a Public Health System, an Emergency Medical System, and a Housing Improvement Program. All three programs report large volumes of trash at residencies. Debris and trash near homes allows rodents to live close to people, increasing exposure to Hantavirus, food borne diseases, and Leptospirosis. A properly sized and designed transfer station will limit exposure to Hantavirus, food borne diseases, and Leptospirosis by accommodating household debris, including household trash, which is frequently cached near homes.

A larger transfer station and associated services will positively affect the quality of life for the Ramah Navajo Chapter.

Sincerely,

Ramah Navajo Collection/Transfer Station

Background

The Ramah Navajo Chapter has been planning a for Collection/transfer station for approximately 10 years. There is significantly issues of dumping and littering occurring in this area. Construction of a transfer station will address littering which damages the aesthetic beauty of this area and advance to a healthier community. Dumping also creates a safety hazard if materials are liquid that may contaminate groundwater or poison surrounding livestock and humans. This Project will benefit the citizens (5,000) residing within the Ramah Navajo Community area and other.

Land Status Information

Ramah Navajo Tribal Band Land is being used, land Withdrawal was approved by Chapter Resolution. Easements and right-of-ways, archaeological and environmental studies for the project site are completed/secured.

Recyclables are diverted to a recycling center. One of these three types of MSW are diverted, the remaining material is termed Household Standard Waste (HSW).

Construction and demolition (C & D) typically consists of concrete, masonry, wood, roofing materials, sheetrock, plaster, metal, and fire stamps. Sometimes these materials are managed separately from MSW. Asbestos containing materials are prohibited.

Materials that can be accepted depends on having a facility that will accept the materials your Center collects. Regulation requires a listing of the material categories that will be collected and where they will be disposed of.
