Class of 2017 Postsecondary Locations

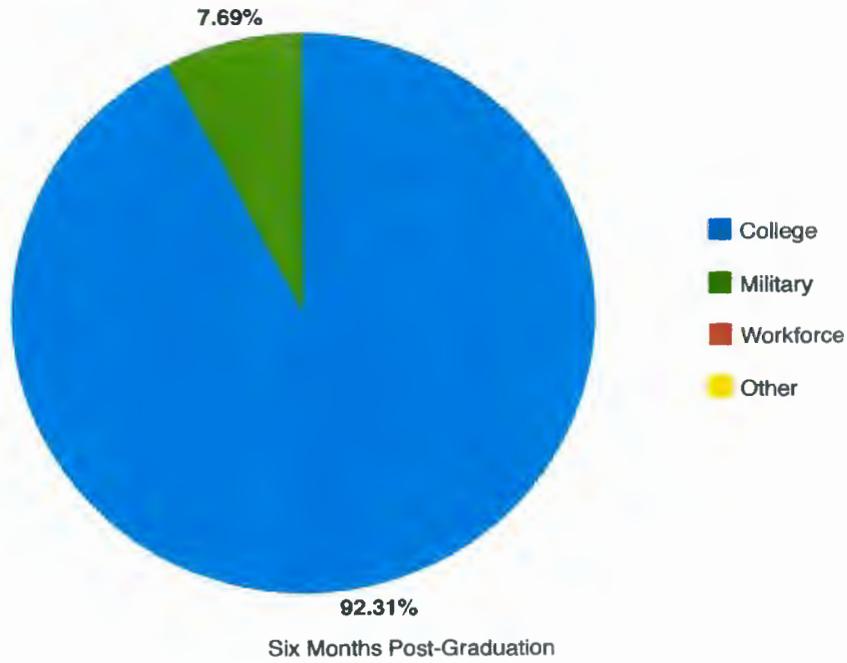

The following graphic displays disaggregate the information recorded above. As present trends show, more than eighty-two percent of Middle College's 2017 graduates are attending college six months after graduation. This timeframe is significant because it demonstrates retention beyond their first semester away from Middle College High School.

In addition to looking at the overall total, it is instructive to examine the school's data by ethnicity. Of significance is the success of the school's minority students, particularly Native American and Hispanic, who represent the school's two largest ethnic groups.

Navajo Nation Board of Education
Department of Diné Education
Post Office Box 670
Window Rock AZ 86515

Dear Honorable Diné Education Board Members:

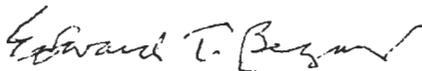

I am writing this letter in support of Middle College High School. This school is recognized as the 12th best public high school in the state of New Mexico, based on data collected by the US Department of Education. I am familiar with the school and the success of its Native American students who move onto higher education. It concerns me that the Gallup McKinley County School District is threatening to shut down this school. The decision appears to be based on politics and money.

As I reported to the Rock Springs Chapter last week, the Gallup McKinley County School Board is responsible for looking after the best interests of all of our students, not the wishes of its superintendent. They have been elected to be our voice in supervising the operation of the district. It seems they may have gotten things backwards because they are listening to the superintendent instead of the superintendent listening to them. They need to remember that it is our people who support the local economy through sales taxes and that it is because of this that the people at the district have their jobs.

Local school districts are funded from state money. This pot of money gets divided between all the local districts. The threat to close Middle College and steal its students is a trickery by Gallup McKinley Schools to get a larger portion of this pot of money. It is motivated by greed. Who is looking out for the interests of the students? Who is looking out for our families right to choose where their children get to go to school?

I am asking for your support of Middle College High School. Please consider joining the action of several Chapter Houses that have passed resolutions mandating the continuation of the school. A resolution from the Department of Diné Education would remind the Gallup district of its obligation to meet the needs of all of our students. In my days as Speaker of the Council, we enacted the practice of fundamental law to ensure that our sovereignty was recognized in all policy decisions. Please take action to honor this commitment. It is important that the Gallup McKinley School District understands that it has a responsibility to our people.

Ahe'hee,

Edward T. Begay
