Workers Comp - Asset Allocation Review

Workers Compensation – Asset Allocation

Introduction

- The **Workers Compensation Fund** utilizes a streamlined asset allocation, consisting of the following asset classes
 - Large Cap US Equity
 - Core Fixed Income
 - Low Duration Fixed Income
- RVK recommends diversifying into additional asset classes to potentially improve the Sub-Trust's risk/return characteristics.
- Return Objective / Risk Tolerance –
 - **Workers Compensation Fund**: The fund has a primary objective of long-run preservation of capital in real terms, which suggests meeting or outperforming long-run inflation
- The Fund has a conservative risk/return threshold, but moderate spending needs and a perpetual time horizon.
 - Liquidity Needs –
 - Over the past ten years, on average the Fund has been cash flow negative, with just over \$1.2 million of net outflows a year.

Workers Compensation – Asset Allocation

Considerations and Next Steps

- The **Workers Compensation** Trust's target asset allocation can be updated to increase expected return, with a modest decrease in expected risk by diversifying into Small Cap US Equity, International Equity, Core Real Estate, Bank Loans, and GTAA. Incorporating these asset classes generally serves to improve the expected return for all risk levels
 - **Recommendation:** The “**Moderate**” portfolio is suitable for the Trust's overall risk/return profile, subject to the Investment Committee's preference.
- No new investments would be required to implement the new target asset allocations
 - if approved, the allocations can be implemented using the current Master Trust investments
 - RVK would work with the Controller's Office and Northern Trust to complete the rebalancing

Navajo Nation Workers' Compensation Fund (Sub-Policy)

STATEMENT OF INVESTMENT OBJECTIVES, GUIDELINES AND PROCEEDURES

A. General. This statement governs the investment of the Navajo Nation Workers' Compensation Fund (Fund) as a sub-policy of the Navajo Nation Master Investment Policies.

This statement is set forth in order that the Navajo Nation Council, the Budget & Finance Committee, the Investment Committee, Staff, its investment advisor and its investment managers and others entitled to such information may be made aware of the Policy of the Workers' Compensation Fund with regard to the investment of its assets and the expectations and requirements of the Investment Committee with respect to the ongoing management of the investments. The purpose of this document is to establish the investment policies, standards of prudence and performance expectations for the Fund. The Investment Committee is responsible for the fiduciary oversight of the investments and has chosen these policies as its statement of intent for achieving the investment objectives described below.

The Fund. The Navajo Nation Workers' Compensation Fund (Fund) was established by Resolution ACAU-94-78 on August 22, 1978 amended on October 23, 1997 by NNC Resolution CO-83-97. The Resolution identifies the Financial Services Department shall be custodian of the Fund and further states that internal control procedures will be established by the Financial Services Department. The Resolution states there shall be a fund maintained for the sole purpose of payment for workers' compensation and administrative costs. The Fund shall be part of the Workers' Compensation Program Account maintained on the records of the Navajo Nation Financial Services Department. Funding shall be obtained by assessment of a percentage of that amount recovered for employee benefits, in conjunction with the Financial Services Department, and/or by assessment of charges to the Navajo Nation, its Enterprises and Chapters based on a specified rate adjusted annually at the beginning of each Navajo Nation fiscal year based on the loss experience of the previous fiscal year. Collection shall be made by the Financial Services Department in conjunction with assessments approved by the Navajo Nation Insurance Commission.

The Fund is expected to be available in perpetuity so it will be invested with a long-term perspective. It is important to follow coordinated policies regarding spending and investment decisions, which will protect the principal and produce reasonable total returns.

To assure that the integrity of these assets shall be maintained to the maximum extent feasible, the Investment Committee has established the following Policies:

- To be invested in accord with The Master Investment Policy and Procedures approved by the Budget & Finance Committee.
- To preserve the purchasing power of the investments while at the same time increasing the size of the corpus in order to support growth in the Workers' Compensation Fund. Preservation of principal is of high priority and essential over the long term.

C. Investment Objectives. The primary investment objectives are preservation of capital in real terms while obtaining maximum returns within reasonable and acceptable levels of risk.

The achievement of the investment objectives of the Fund will be reviewed on an annual basis. This review will focus on the continued feasibility of achieving the objectives and the continued appropriateness of the investment policy. It is not expected that the policy will change frequently; in particular, short-term changes in the financial markets should generally not require an adjustment in the policy.

D. The Investment Committee Responsibilities. The Investment Committee will have the responsibility and authority to oversee the investments of the Fund. The Investment Committee and its designated investment advisor will then select the specific asset mix reflecting judgments as to the investment environment as well as the specific needs of the Fund. The Investment Committee will discharge their duties with prudence and ethics as stated in Section 3 of the Navajo Nation Master Investment Policies.

E. Investment Policy Guidelines. The Budget & Finance Committee does not expect the Investment Committee to be reactive to short-term investment developments, recognizing that the needs for payout are long term and that investment competence must be measured normally over a meaningful period of time. While the quantitative assessment of managerial competence will be measured normally over a complete market cycle, the Budget & Finance Committee anticipates that the Investment Committee will make interim qualitative judgments. Specific qualitative factors which will be reviewed by the Investment Committee on an ongoing basis.

Asset Allocation

The most important component of an investment strategy is the asset mix, or the resource allocation among the various classes of securities available to the Workers' Compensation Fund investments. The Investment Committee will be responsible for target and actual asset allocation for the investments that will best meet the needs of the Fund, taking into consideration the appropriate level of portfolio volatility. The Investment Committee will then submit to the Budget & Finance Committee the long-term asset allocation ranges.

Long term

The risk/return profile shall be maintained by describing a long-term "target" strategic asset allocation and is set forth below.

Investment Time Horizon

In making investment strategy decisions for the Fund, the focus shall be on a long-term investment time horizon that encompasses a complete business cycle (usually three to five years). Interim evaluation will be required if a significant change in fees, manager personnel, strategy or manager ownership occurs.

Allocation of Assets

It shall be the policy of the Fund to be invested in accordance with the maximum and minimum range for each asset class as stated below:

	<u>Target Asset</u>		
	<u>Minimum</u>	<u>Target</u>	<u>Maximum</u>
U.S. Equity	15%	20%	25%
Large Cap	14%	17%	20%
Small/Mid Cap	1%	3%	5%
Non U.S. Equity	9%	13%	17%
Core/Core Plus Fixed Income	40%	47%	54%
Core Real Estate	0%	6%	9%
Absolute Return/GI AA	0%	8%	11%
Bank Loans	0%	6%	9%
Cash Equivalents	0%	0%	10%

<u>Asset Class</u>	<u>Minimum</u>	<u>Target</u>	<u>Maximum</u>
Cash Equivalents	0%	0%	10%
Fixed Income	45%	50%	55%
Short/Intermediate	20%	25%	30%
Core Plus	70%	75%	80%
U.S. Equity	45%	50%	55%
Large Cap	40%	40%	40%
Small/Mid Cap	0%	0%	0%
Non U.S. Equity	0%	0%	0%

The asset allocation ranges established by this investment policy represent the long-term perspective. As such, rapid unanticipated market shifts may cause the asset mix to fall outside the policy ranges. Any divergence should be of a short-term nature. Staff will review the asset allocation of the Fund on a quarterly basis and rebalance to within policy ranges as necessary.

F. Performance Expectations. The measurement period for complete evaluation will be trailing twelve-quarter periods and complete market cycles. Market cycles are defined to include both a rising and a declining leg. Therefore, a minimum period of evaluation shall be typically three to five years.

The most important performance expectation is the achievement of investment results that are consistent with the Fund's investment objective statement. Performance will be monitored against a custom index of ~~50%~~ S&P 500 Index, ~~37.5%~~ Lehman Aggregate Index, and ~~12.5%~~ Lehman Government 1-5 Year Index both the target allocation and the current allocation.
