

LEGISLATIVE SUMMARY SHEET

Tracking No. 0044-19

DATE: March 7, 2019

AN ACTION RELATING TO THE RESOURCES AND DEVELOPMENT COMMITTEE AND THE NAABIK'ÍYÁTÍ COMMITTEE; SUPPORTING NAVAJO TRANSITIONAL ENERGY COMPANY'S INDEPENDENT ACQUISITION OF NAVAJO GENERATING STATION AND KAYENTA MINE; STATEMENT OF POLICY REGARDING REFUSAL TO FINANCIALLY GUARANTEE OR PROVIDE WAIVERS OR RELEASES OF CLAIMS BY THE NAVAJO NATION PERTAINING TO THAT ACQUISITION

PURPOSE: The purpose of this legislation is to support the Navajo Transitional Energy Company's independent acquisition of Navajo Generating Station and Kayenta Mine and state the Navajo Nation position that no financial guarantees, waivers or releases of claims by the Navajo Nation releases shall be provided pursuant to this acquisition.

This written summary does not address recommended amendments as may be provided by the standing committees. The Office of Legislative Counsel requests each Council Delegate review the proposed resolution in detail.

PROPOSED NAVAJO NATION COMMITTEE RESOLUTION
24th NAVAJO NATION COUNCIL – First Year, 2019

INTRODUCED BY

(Prime Sponsor)

TRACKING NO. 0044-19

AN ACTION RELATING TO THE RESOURCES AND DEVELOPMENT COMMITTEE
AND THE NAABIK'ÍYÁTÍ COMMITTEE;
SUPPORTING NAVAJO TRANSITIONAL ENERGY COMPANY'S INDEPENDENT
ACQUISITION OF NAVAJO GENERATING STATION AND KAYENTA MINE;
STATEMENT OF POLICY REGARDING REFUSAL TO FINANCIALLY
GUARANTEE OR PROVIDE WAIVERS OR RELEASES OF CLAIMS BY THE
NAVAJO NATION PERTAINING TO THAT ACQUISITION

WHEREAS:

- A. The Resources and Development Committee of the Navajo Nation Council exercises oversight authority over water, land, grazing, environment, economic and community development. 2 N.N.C. § 500 (C).
- B. The Naabik'iyáti Committee of the Navajo Nation Council is the standing committee empowered to coordinate and pronounce the official position of the Navajo Nation before non-Navajo government federal, state or other entities. 2 N.N.C. § 700 (A).
- C. This legislation is a necessary response to current developments involving Navajo Transitional Energy Company's (NTEC) independent acquisition of Navajo Generating Station (NGS) and Kayenta Mine.

- 1 D. NTEC is a limited liability company organized pursuant to the Navajo Nation Limited
2 Liability Company Act, 5 N.N.C. § 3600 *et seq.*, created and enabled by Navajo
3 Nation Council Resolution No. CAP-20-13. See Exhibit A.
- 4 E. NTEC was created “to strictly limit the Navajo Nation’s and [NTEC’s] liabilities and
5 exposures...and to promote the development of the Navajo Nation’s resources...”
6 See *Id.* Section A (5).
- 7 F. Following the Navajo Nation leadership’s request that NTEC evaluate acquisition of
8 NGS and Kayenta Mine, NTEC undertook good faith negotiations with the NGS
9 Owners.
- 10 G. NTEC’s negotiations with the NGS Owners have stalled due to the demand by the
11 NGS Owners that the Nation itself provide back-up financial guarantees pursuant to
12 the purchase and assume and guaranty all liabilities associated with NGS, including
13 liabilities associated with the NGS Owners’ operation of NGS.
- 14 H. The Navajo Nation, through separate agreements with the NGS Owners, have already
15 limited the Navajo Nation’s risk and liabilities as a government.
- 16 I. The negotiations between the NGS Owners and NTEC are between separate business
17 entities and as such the Navajo Nation is not a party to these negotiations.
- 18 J. Given the importance of this issue to the Navajo Nation, the 24th Navajo Nation
19 hereby issues this Statement of Policy in support of NTEC’s independent acquisition
20 of NGS and Kayenta Mine.

21
22 **THEREFORE, BE IT RESOLVED:**

- 23
- 24 A. The Navajo Nation fully supports NTEC’s independent acquisition of NGS and the
25 Kayenta Mine, subject to the finalization of the necessary agreements.
- 26 B. The Navajo Nation shall not provide any financial guarantees pertaining to NTEC’s
27 acquisition of NGS and Kayenta Mine.
- 28 C. The Navajo Nation will not grant any waivers or release of claims to the NGS Owners or
29 NTEC pertaining to NTEC’s acquisition of NGS and Kayenta Mine.
- 30

RESOLUTION OF THE
22ND NAVAJO NATION COUNCIL

22ND NAVAJO NATION COUNCIL - THIRD YEAR, 2013

AN ACTION

RELATING TO RESOURCES AND DEVELOPMENT AND BUDGET AND FINANCE;
APPROVING: (I) THE CREATION, FORMATION, ORGANIZATION,
ESTABLISHMENT, AND OPERATION OF THE NAVAJO TRANSITIONAL ENERGY
COMPANY, LLC (HEREINAFTER, THE "COMPANY"), PURSUANT TO THE
NAVAJO NATION LIMITED LIABILITY COMPANY ACT, 5 N.N.C. § 3600 *et seq.*; (II) THE GRANT AND EXTENSION OF THE NAVAJO NATION'S
SOVEREIGN IMMUNITY TO THE COMPANY PURSUANT TO THIS ENABLING
LEGISLATION, AND NAVAJO LAW, INCLUDING WITHOUT LIMITATION, 1
N.N.C. § 551 *et seq.*, 2 N.N.C. § 101 *et seq.*, AND 5 N.N.C. §
3600 *et seq.*; (III) THE DISCRETION TO RELATE, AFFILIATE, AND
ASSOCIATE WITH AN EXISTING NAVAJO NATION SECTION 17 CORPORATION,
OR A SUBSIDIARY OF AN EXISTING NAVAJO NATION SECTION 17
CORPORATION, OR ALTERNATIVELY, WITH THE APPROVAL OF THE NAVAJO
NATION GOVERNMENT, TO INCORPORATE AS A SECTION 17 CORPORATION
PURSUANT TO 25 U.S.C. § 477, AS AMENDED; (IV) THE EMPOWERMENT OF
THE COMPANY TO EXECUTE, ENTER, AND PERFORM COMMERCIALY
REASONABLE AND ECONOMICALLY VIABLE AGREEMENTS IN THE BEST
INTERESTS OF THE COMPANY AND THE NAVAJO NATION, INCLUDING
WITHOUT LIMITATION, A STOCK PURCHASE AGREEMENT TO ACQUIRE THE
ENTIRETY-ONE-HUNDRED-PERCENT(100%)- OF THE STOCK OF A BUSINESS
ORGANIZATION OR ORGANIZATIONS, WHICH IS NECESSARY FOR THE
ACQUISITION AND OWNERSHIP OF THE NAVAJO MINE; AND (V) THE
EMPOWERMENT OF THE COMPANY TO ACT TO EFFECTUATE THE MERGER OR
MERGERS OF BUSINESS ORGANIZATIONS FOR THE ACQUISITION AND
OWNERSHIP OF THE NAVAJO MINE, AND CONTINUING OPERATION OF THE
COMPANY IN THE BEST INTERESTS OF THE NAVAJO NATION AND THE
NAVAJO PEOPLE.

BE IT ENACTED:

Section A. Approval of the creation, formation, organization,
establishment empowerment, authorization, and
operation of the Company

1. Pursuant to 5 N.N.C §102, the Navajo Nation Council hereby
approves the creation, formation, organization,

establishment, and operation of the Company, which will, subject to the limitations set forth herein, act as an arm and subordinate instrumentality of the Navajo Nation to exercise all of the powers granted herein and otherwise available, including without limitation, the benefits, protections, and defenses associated with sovereign immunity, and authorities of association and affiliation with a sovereign entity, with accountability to the Navajo People, through their elected and appointed representatives, and the Navajo Nation; and

2. The Navajo Nation's approval of the creation, formation, organization, establishment, and operation is for the protection and promotion of the Navajo People's and the Navajo Nation's economic and financial best-interests, which are tied and related to mining operations within the Navajo Nation, as a means to ameliorate the economic, financial, and social conditions of the Navajo People and the Navajo Nation; and
3. The Navajo Nation, through the approval and execution of this legislation by the Navajo Nation Council and the President of the Navajo Nation, establishes and declares the Company as an instrumentality of the Navajo Nation, which, subject to the conditions of existing Navajo law, and those set forth herein, is entitled to all of the privileges, immunities, protections, and authorities of the Navajo Nation; and
4. The Navajo Nation approves the creation, formation, organization, establishment, empowerment, and operation of the Company pursuant to Navajo law, including without limitation, the Navajo Nation Limited Liability Company Act, 5 N.N.C. §3600 et seq., 1 N.N.C. §551 et seq., 2 N.N.C. §101 et seq., and all other relevant statutes, resolutions, decisions, rules, orders, regulations, and policies; and the Company's Articles of Organization and Operating Agreement, which are attached hereto collectively as Exhibit "A" (hereinafter, referred to as the "Operating Agreement"); and
5. The Navajo Nation declares that the creation of the Company is necessary and desirable for the Navajo Nation to implement the transactions, functions, and actions contemplated by this legislation; to strictly limit the Navajo Nation's and the Company's liabilities and exposures; and to promote the development of the Navajo

Nation's resources and new sources of energy, power, transmission and attendant resources to develop the economic, financial, social and cultural well-being of the Navajo People and the Navajo Nation; to promote the economic vitality of the Navajo Nation through the production of goods and services, to facilitate management of the Navajo Nation's interests in the development of its energy portfolio and market; and to steer the Navajo Nation into a more efficient, productive, vital, and sustainable energy portfolio and market in the best interests of the future generations of the Navajo Nation; and

6. The Navajo Nation declares that the creation of the Company is also for the purposes of facilitating, assisting, promoting, and protecting the Navajo Nation's authorities, duties, and functions to protect the Navajo People and the Navajo Nation, with regard to the Navajo Nation's land, air, water, natural, and economic resources; and
7. The Company is created and enabled to support, improve, and promote the economic, financial, tax, and revenue interests of the Navajo People, the Navajo Nation, and affiliates, through management and development of the Navajo Nation's conventional, alternative, and renewable energy resources, in cooperation with other Navajo Nation entities, in accordance with full exercise of the Navajo Nation's inherent sovereignty, in furtherance of the federal government's policy of Navajo Nation economic development, self-sufficiency, self-determination, and autonomous economic development and growth, and consistent with existing and future Navajo Nation environmental, labor, and resources utilization laws, regulations, orders, rules, and policies; and
3. The Company is created to, and shall, invest and re-invest no-less-than ten-percent (10%) of Net Income, as defined in the Operating Agreement, into the research and development of renewable and alternative sources of energy, storage, and transmission technologies and facilities, with priority given to solar technologies and facilities and attendant storage and transmission capacity, and in accordance with responsible financial and commercial management of the Company's obligations and best-interests; and
9. The Company shall have, and is granted and extended, the Navajo Nation's sovereign immunity from suit, with the

authority to waive the Company's immunity from suit on a limited, transaction-by-transaction basis, in conformity with this legislation and its constituent documents, as these may be amended and supplemented from-time-to-time, including the clear and express authority to limitedly waive any defense of the Company, its directors, employees, attorneys, or agents may otherwise assert that federal, state, or tribal law requires exhaustion of tribal court and administrative remedies prior to suit against the Company in a judicial, administrative, arbitral, or other body or tribunal having proper jurisdiction over the subject matter and the parties; and

10. The Company shall have, and is granted and extended, the Navajo Nation's tax and financial status pursuant to applicable law, subject to such modifications, supplements, or restatements that may be made by the Navajo Nation; and

Section B. Approval of the Company's acquisition of business organizations to acquire the entirety of the stock of a business organization or business organizations for the acquisition and ownership of the Navajo Mine, and related actions

11. The Company is empowered and authorized to conduct and complete all necessary due diligence investigations; enter, execute, and perform all agreements necessary to implement and facilitate the acquisition and ownership of the Navajo Mine; and
12. The Company is empowered and authorized to enter, execute, and perform all commercially reasonable and economically viable agreements attendant to the acquisition and ownership of the Navajo Mine to promote the Navajo People's, the Navajo Nation's, and the Company's best-interests; and
13. The Company is empowered and authorized to effectuate acquisitions and mergers of business organizations, and if determined appropriate by the Navajo Nation and the Company, to affiliate with a Navajo Nation entity or entities, as the case may be pursuant to future circumstances, and effectuate a merger into a Section 17 Corporation chartered pursuant to 25 U.S.C. §§477, as amended, by the same name; and
14. The Company is further empowered and authorized to take appropriate actions to ensure the continuing operation of the Navajo Mine and the Company into the future, in the

most efficient, productive, and profitable manners possible, which shall be in the best-interests of the Navajo People, the Navajo Nation, and the Company; and

Section C. Approving and stating conditions associated with the Company's existence and operation

15. The Navajo Nation retains all rights, powers, authorities, and immunities possessed and enjoyed as a sovereign entity and governmental institution. Nothing herein, within the Operating Agreement, within any future documents or instruments associated with the Company, or any act or omission of the Company, shall be asserted, interpreted, or otherwise understood to constitute any waiver whatsoever of any of the Navajo Nation's rights, powers, or authorities, and immunities as a sovereign entity and governmental institution; and
16. Nothing herein, within the Operating Agreement, within any future documents or instruments associated with the Company, or any act or omission of the Company, shall be asserted, interpreted, or otherwise understood to constitute any waiver of the Navajo Nation's sovereign immunity from suit whatsoever, whether express or implied, beyond that already clearly and unequivocally provided as a matter of Navajo Nation statutory law pursuant to the Navajo Sovereign Immunity Act, 1 N.N.C. §551 et seq., and the Navajo Nation Arbitration Act, 7 N.N.C. §1101 et seq; and
17. Nothing herein, within the Operating Agreement, within any future documents or instruments associated with the Company, or any act or omission of the Company, shall create any obligation, indebtedness, or recourse to the property or assets, whether held in trust or otherwise, of the Navajo Nation whatsoever; and no action by the Company shall permit or authorize the sale, encumbrance, or transfer of any of the Navajo Nation's, or any of its entities' and affiliates' property and assets, whether held in trust or otherwise, or any interest therein whatsoever, other than those of the Company; and
18. Subject to the conditions set forth herein, in the Operating Agreement, and in any future organizational or governing documents or instruments associated with the Company, the Company, its Management Committee and Management Committee Members, as these terms are defined in the Operating Agreement, and its other officers, employees,

and agents shall be immune from suit for actions performed in an official capacity; and

19. Except as otherwise clearly and expressly provided for herein or to the extent the Company, exercising express authority in a manner provided for in this legislation or other applicable Navajo law, or the Operating Agreement, and in accordance with properly approved and executed agreements, the Company's property and assets are exempt from any levy or execution; and
20. The Company is authorized to waive the Company's immunity from suit or other compulsory dispute resolution procedure in accordance with the Operating Agreement. Any waiver of the Company's immunity from suit shall be clearly and expressly stated and consistent with the procedural and substantive requirements provided for in Sections C(20) through C(23) hereof and the Operating Agreement, and shall expressly state that such waiver does not apply to the Navajo Nation; and
21. Any limited, clearly, and expressly defined waiver of the Company's immunities from suit shall require at least ten (10) calendar days' notice of the transaction, agreement, and specific provision providing for any limited waiver being provided to the Company's Management Committee, the Office of the Speaker of the Navajo Nation Council, the Office of the President of the Navajo Nation, and the Navajo Nation Department of Justice. Any limited, clearly, and expressly defined waiver of the Company's immunities from suit shall satisfy all procedural and substantive requirements provided for herein and within the Operating Agreement; and the failure to satisfy such requirements shall render any purported waiver of the Company's sovereign immunity void *ab initio*; and
22. Approval of the same specific limited waiver of each the Company's immunities from suit shall require an affirmative vote of at least five (5) of the Company's seven (7) total Management Committee Members; and
23. Only the properties, assets, revenues, and income held by, or in the name of, the Company shall be subject (to the extent otherwise permitted herein and by law) to the debts, obligations, or other liabilities created, incurred, or guaranteed by the Company. The Navajo Nation's properties and assets, whether held in trust or otherwise, or any interest therein whatsoever, shall not be subject to, or impacted by

this legislation, the Operating Agreement, the Company's additional governing documents, its associated and approved instruments, or any transaction or agreement executed for or by the Company, including without limitation, any and all agreements or other documents entered into, issued, or made in connection with the Company's acquisition and ownership of the Navajo Mine, and the Company's continued operations and functions thereafter; and

Section D. General and Miscellaneous Provisions; Directives

24. The duration of the Company shall be perpetual; and
25. The Company is designed, created, formed, organized, established, empowered, and authorized to act as a subordinate instrumentality of the Navajo Nation, and to promote and enhance the self-determination and self-reliance of the Navajo Nation and the Navajo People with all rights, privileges, immunities, powers, protections, authorities, and purposes granted herein. The Company shall endeavor to contribute to the improvement and enhancement of the economic and financial conditions, and the standards of living for the Navajo People and the Navajo Nation; and
26. The Company is empowered to acquire, create, control, administer, operate, facilitate operation of, oversee, and develop all facilities, infrastructure, improvements, property, assets, and interests necessary, convenient, efficient, and prudent for accomplishment of the purposes herein and the Operating Agreement. The Company is empowered to control, own, operate, conduct oversight of operation, and develop energy resources, tangible and intangible property, assets, and interests within and outside the boundaries of the Navajo Nation, and on possessory interests in lands selected by the Navajo Nation pursuant to the Navajo-Hopi Land Settlement Act, meaning leasehold interests, subject to such actions being provided for, authorized by, or not otherwise prohibited by applicable Navajo Nation law; and
27. The principal place and headquarters of business and the offices of the Company shall be within the Navajo Reservation, with preference to be and operate at or near Window Rock, Navajo Nation. The Company may also establish and maintain offices at such other places as the Company, through its duly authorized officers, may from time-to-time direct, or as the activities of the Company may require; and

28. The Company is further authorized and empowered to do everything necessary, proper, advisable, or convenient for the accomplishment of the purposes herein, including, without limitation, implementation of the Operating Agreement; and to do all things incidental thereto, or connected therewith, which are not forbidden by applicable law or this legislation; and
29. The Company's seven (7) Management Committee members shall be selected in accordance with the Operating Agreement. Thereafter, the seven (7) members' appointments and confirmations shall be effectuated in accordance with the Operating Agreement; and
30. Each of the Company's Management Committee Members after the initial Members' terms have concluded, shall be selected in accordance with the Operating Agreement, and in consultation with the Company's membership representatives, which shall serve in a capacity of shareholder representatives in a corporation, and such rules as the Company may adopt, amend, or supplement in the future; and
31. The Company's Management Committee Members shall hire or ratify the Company's Management Committee Executive, as that term is defined in the Operating Agreement; and
32. Each of the Company's Management Members, officers, employees, and agents shall be subject to Navajo Nation laws and regulations; and
33. Each of the Company's Management Committee Members shall have substantial knowledge, understanding, and competency in the energy industry; and the Management Committee as a whole shall possess substantial knowledge, understanding, and competency in the energy industry, with particular knowledge, understanding, and competency in coal, alternative and renewable resources for power and energy; commercial management and operation experience in the energy industry; substantial knowledge, understanding, and competency in economics, corporate finance, accounting, law, business management, engineering, geophysics, geology, or similar disciplines; substantial knowledge, understanding, and competency in mining, production of coal, and mechanics of coal mining operations; substantial knowledge, understanding, and competency of commercial and mining operations within Navajo Indian Country; and
34. Each of the Management Committee Members shall not be a public official of the Navajo Nation as defined in 2 N.N.C.

\$3743, as amended, including without limitation Navajo Nation Council delegates, Chapter officials, grazing committee members, commissioners, land board members, farm board members, or school board members; be an employee of the federal, any state, county, municipal, or any other government; be a director (or commissioner) of any other Navajo Nation owned enterprise, industry, authority, corporation, or instrumentality; provided that the requirements shall not apply to any consecutive renominations or confirmations; be any person who has been convicted or entered a plea of *nolo contendere* to any felony or gross misdemeanor in any court, including without limitation those involving dishonesty or moral turpitude, extortion, embezzlement, theft, violation of fiduciary duty, bribery, perjury, or fraud; provided, that any misdemeanor shall be limited to the last ten (10) years of such person's history; be any person who violates or has violated the requirements of the Navajo Nation Ethics in Government Law, 2 N.N.C. §3741 et seq., as amended, provided that any such violation shall be limited to the last ten (10) years of such person's history; or be any person who has declared bankruptcy or been adjudicated bankrupt or insolvent; and

35. The Company may conduct activities in the Navajo Nation and any other jurisdictions; and
36. The Company may participate with other persons in joint ventures, or other associations, transactions, or arrangements; and
37. The Company may appoint officers, agents, engineers, auditors, accountants, appraisers, counsel, and other professional consultants as may be needed from time-to-time; and also define their duties and compensation; and
38. The Company shall require the bonding of all officers, agents, or employees responsible for the handling or safeguarding of funds, property, and other assets of the Company; and
39. The Company is authorized to acquire (by purchase, exchange, lease, hire, or otherwise) use, improve, manage, operate, and sell, lease, or mortgage, either alone or in conjunction with others having an interest therein, real estate of every kind, character, and description, and any interest therein, necessary or incidental to the purposes of the Company; and

40. The Company is authorized to deal in personal property, including intangibles; and to acquire (by purchase, application, transfer, exchange, lease, hire, or otherwise), hold, own, manage, operate, mortgage, pledge, hypothecate, exchange, sell, deal in, and dispose of, either alone or in conjunction with others, personal property, including without limitation, equity securities and inventions, copyrights, trademarks, trade secrets, patents, and other intangibles, and interests therein, of every kind, character, and description; and
41. The Company is authorized and empowered to enter into, make, perform, carry out, cancel, and rescind contracts for any lawful purpose pertaining to its purposes and activities; and
42. The Company is authorized and empowered to generate revenues, raise capital, borrow money, make, guarantee and issue debt, and to secure payment thereof by pledge of, or lien on, all or any fixtures, personalty, revenues, incomes, contracts, or other property and income; and to accept grants or loans; and to expend the proceeds thereof; and
43. The Company is empowered and authorized to create subdivisions, sub-entities, and subsidiaries for purposes of separating and furthering the Company's purposes; and
44. The Company shall have, as applicable, one member, shareholder, and owner, which shall be the Navajo Nation; and any grant, sale, encumbrance, or hypothecation of shares shall be void *ab initio*; and
45. The Company shall have a Management Committee comprised of seven (7) persons, who shall be governed by 5 N.N.C. §§3640-42; and the Company's and the Navajo Nation's relationship shall be governed by 5 N.N.C. §§3650-60, the Operating Agreement, and this legislation; and
46. The Navajo Nation may capitalize the Company with an initial capital contribution to be determined by agreement between the Navajo Nation and the Company, corresponding financing agreements, and a schedule of contributions and distributions; and
47. The Navajo Nation shall be entitled to reimbursement from the Company of any capital contribution; and

Section E. Directive to the Navajo Nation Office of the Attorney General for the Creation of the Company

48. The Navajo Nation Office of the Attorney General shall immediately make application and take all actions necessary for the Navajo Nation Division of Economic Development's Business Regulatory Department to furnish a Certificate of Existence for the Navajo Transitional Energy Company, LLC, in accordance with this legislation, the Articles of Organization, and the Operating Agreement; and
49. The Navajo Nation Office of the Attorney General and the Navajo Nation Washington Office shall also immediately make application and take all actions necessary for approval by the United States of any actions necessary and convenient for the Company's acquisition and ownership of the Navajo Mine, and continued operation of the Company; and

Section F. Savings, Severability, and Survivability Clause

50. Should any provision herein be determined invalid by the Navajo Nation Supreme Court, all other provisions not determined to be invalid shall remain in force and effect; and
51. Any employee or official of the Navajo Nation with a conflict of interest shall be removed as the organizer or signor of the Articles of Incorporation, Operating Agreement or other documents before final approval and filing; and
52. NTEC shall ensure at the time of cessation of the mining activities at both Navajo and San Juan mines and closure of Four Corners Power Plant and San Juan Generating Station that water Permit #2838 shall revert to the Navajo Nation.

C E R T I F I C A T I O N

I hereby certify that the foregoing resolution was duly considered by the Navajo Nation Council at a duly called meeting in Window Rock, Navajo Nation (Arizona) at which a quorum was present and that the same was passed by a vote of 17 in favor and 4 opposed, this 29th day of April 2013.

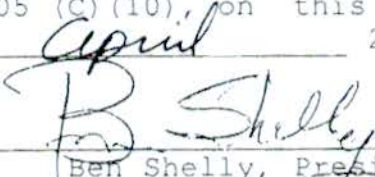

Edmund Yazzie, Speaker Pro Tem
Navajo Nation Council

Motion: Honorable Jonathan Nez
Second: Honorable LoRenzo Bates

ACTION BY THE NAVAJO NATION PRESIDENT:

1. I hereby sign into law the foregoing legislation, pursuant to 2 N.N.C. §1005 (C) (10), on this 30 day of April 2013.

Ben Shelly, President
Navajo Nation

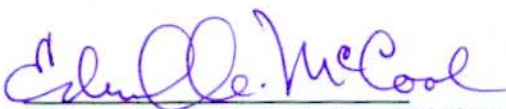

2. I hereby veto the foregoing legislation, pursuant to 2 N.N.C. §1005 (C) (11), this _____ day of _____ 2013 for the reason(s) expressed in the attached letter to the Speaker.

Ben Shelly, President
Navajo Nation

MEMORANDUM

TO: Honorable Rickie Nez
Navajo Nation Council

FROM: 
Edward A. McCool, Acting-Chief Legislative Counsel
Office of Legislative Counsel

DATE: March 7, 2019

AN ACTION RELATING TO THE RESOURCES AND DEVELOPMENT COMMITTEE AND THE NAABIK'ÍYÁTÍ COMMITTEE; SUPPORTING NAVAJO TRANSITIONAL ENERGY COMPANY'S INDEPENDENT ACQUISITION OF NAVAJO GENERATING STATION AND KAYENTA MINE; STATEMENT OF POLICY REGARDING REFUSAL TO FINANCIALLY GUARANTEE OR PROVIDE WAIVERS OR RELEASES OF CLAIMS BY THE NAVAJO NATION PERTAINING TO THAT ACQUISITION

As requested, I have prepared the above-referenced proposed resolution and associated legislative summary sheet pursuant to your request for legislative drafting. Based on existing law and review of documents submitted, the resolution as drafted is legally sufficient. As with any action of government however, it can be subject to review by the courts in the event of proper challenge. Please ensure that this particular resolution request is precisely what you want. You are encouraged to review the proposed resolution to ensure that it is drafted to your satisfaction.

The Office of Legislative Counsel confirms the appropriate standing committee(s) based on the standing committees powers outlined in 2 N.N.C. §§500, 501. Nevertheless, "the Speaker of the Navajo Nation Council shall introduce [the proposed resolution] into the legislative process by assigning it to the respective oversight committee(s) of the Navajo Nation Council having authority over the matters for proper consideration." 2 N.N.C. §164(A)(5).

If the proposed resolution is unacceptable to you, please contact me at the Office of Legislative Counsel and advise me of the changes you would like made to the proposed resolution.

The Council should vote No on this legislation. It should instead allow decommissioning to go forward, including complete clean up and reclamation.
The NN should develop a plan for reclamation and ensure that wherever possible Mine and plant workers have 1st priority in jobs and at competitive wages.
The NN should develop a plan for the upper basin CR.
The NN should protect the Navajo Aquifer from further industry use and allow it to recover
The NN should put out an invitation for proposals for the 500 mw
The NN should put out an invitation for projects for the rail road and rail cars
The NN should allow immediate remediation of the plant site and mine site full investigation of all mine wells and latest reading of USGS monitoring
The NN should allow immediate remediation of the water and have Peabody replace the water in quality and quantity.
The NN should focus its efforts on securing transition funds

Nicole Horseherder, Black Mesa

The Most Honorable Navajo Nation Council

March 11, 2019

Re: Legislation 0044-19, NTEC Acquisition of NGS & Kayenta Mine

Please accept my comments on the above subject matter. I'm opposed to the legislation wherein the Navajo Nation Council will support the acquisition of both NGS and Kayenta Mine by NTEC. The current power plant and the mine been in operation for 50 years and both been dedicated and using tremendous amount of water 35,000 AFY and up to 6,400 AFY respectively. This is over 41,400 AFY from the Upper Colorado River Basin and the N-aquifer ground water of Black Mesa. In both cases it's the sole source water, while at the same time at least 30,000 community members in both areas been without water for as long or longer.

Members of the Council these are your people, constitute and voters that put you in office. NTEC, NGS and the mine are not. Yes, they provide **some jobs and revenue**. The number of jobs was around 700 which is now probably down to around 500 and will continue to drop even if NTEC takes over. But your constitutes will continue to grow by the thousands.

The plant and the mine has had a big impact to the health of your people causing increase in asthma, heart and lung and other diseases. On the health of the water, much been wasted and contaminated. Damaging environmental impact on their ancestral land, plants, herbs that was once used for food and medication, ceremonies, for their livestock and wildlife. Beyond all this the industries has contributed tremendously to climate change which has detrimental impact on the weather causing the drought to worsen each season.

Much of what NTEC stated in the "Navajo Solution" report was intentionally unclear. But what become clear to me is that of NTEC's business plan is simply not true. NTEC will not acquire NGS for no cost. There is, according to the current owners up to \$200 million in deferred maintenance that NTEC would have to catch up on in order to operate NGS.

Perhaps the most misleading lie that NTEC is telling is about the water rights. It says that keeping NGS running can help the Navajo Nation strengthen its claim to water from the Upper Colorado River Basin, but that is simply not true. The Navajo Nation already has a right to the water used by NGS no matter what NTEC does. And in fact, the only way to provide the Nation with the opportunity to put

that water to other use is to retire the plant. Keeping the water connected to NGS does only one thing; it prevents the Navajo Nation from developing it for the people. NTEC has also said nothing about the N-aquifer of Black Mesa. There already has been major damage to the N-aquifer and continuing operations at Kayenta Mine will only further the depletion. In the future, if NTEC buys Kayenta Mine, it also is going to be responsible for the massive costs of restoring the aquifer.

As result of the breakdown in negotiation, there now appears to be several insurmountable issues that NTEC did not tell the Council. The major disagreement, is that SRP and the other owners of NGS want a complete waiver of all future liability from both NTEC and the Navajo Nation. Do not let NTEC trick you into granting that waiver, which is what it is angling for, even though it says otherwise. Doing so will expose the Nation to massive financial risk for decommissioning and clean up. NTEC is relying on the Nation to be a "backstop" for its cost, and when those costs turn out to be far higher than anyone estimated. NTEC will demand that the Nation cover the difference.

I want to compliment the work the 23rd Council did in June, 2017 in their negotiation with SRP when they extended the operation of the mine and the plant to December, 2019. I was very much opposed to the extension and preferred closure in 2017 as agreed to in the 1969 compact, but the previous Council did a commendable job of securing important concessions and payments to the Nation. Those rely on the retirement of NGS at the end of this year. I urge you to continue carrying out the agreement.

All of the current solutions to the current issues raised by NTEC are clearly spelled out in the extension agreement. The current owners have clean-up and decommissioning responsibilities stretching out another 35 years. The current owners put up the escrow and the bond to cover anticipated costs and they have for any added costs. They will assume all costs to maintain the 500 MW of transmission capacity for 10 years and give the Nation access for another 25 years. The Navajo Nation gets water rights without litigation to Upper Colorado River Basin. The Nation does not put up even a dollar for decommissioning and remediation and instead gets over \$169 million in new revenue and it gets assets valued at more than \$200 million.

SRP also has promised to provide technical assistance to the Nation to provide solar energy production using the transmission lines, which the Navajo Nation can use to sell energy to outside companies. This will provide resources to diversify the economy and provide more jobs and opportunities.

My question to you is what's wrong with the 2017 agreement? It is an arrangement with certainty and benefits for all involved. Buying NGS is exactly the opposite. It will cost the Nation millions. It will make decommissioning and clean-up uncertain. It will keep water rights tied to a power plant with no future. And it will fail. There is no way NTEC can make a deal better than what's already on the table. Coal is gone. There is no market for the expensive power provided by NGS and NTEC does not have a viable business plan to make it work. I urge you to full embrace the current lease agreement and implement what's already in your hands; preparing for the retirement of NGS at the end of the year and making plans for better, more sustainable future for the Nation. Don't throw it away. Don't waste any more time. I urge you to vote down Legislation 0044-19. Let's all heal.

Sincerely,

Percy Deal, Big Mountain

March 12, 2019

Honorable Rick Nez:

Nowadays have an a job is very important, if you wish to live a comfortable life. Not only are you proud of yourself being employed there are family members who are equally very pleased and happy.

For many years employment and your home is a luxury for the workers and family stability. The short distant drive to the worksites at NGS, San Juan, Black Mesa, Kayenta coal mines and power plants, and to return home at the end of the workday for quality family time.

Suddenly, the nightmare of becoming unemployed may be soon become reality due to various unavoidable circumstances beyond the workers control. After 50 years of family supporting jobs the unexpected for the present and future employment is the pending closure of the power plants and coal mines within the Navajo Nation.

I respectfully request of the Navajo nation 24th council delegates to support and stand with NTEC's Plan to acquire NGS Power Plant and Kayenta Coal Mine to save jobs and revenues for the Nation. Furthermore, the council continues to meet and work with the state and federal government for the development of new energy technologies.

The Navajo Nation executive and legislative branches must understand unemployment affects people's mental and physical health which includes the spouse and children.

I support the continued operation of the power plant and coal mine for the present and future employment for our Navajo people. Thank you very much

Sincerely,

Fannie Lowe Atcitty

Comments 00440-19.pdf;

Good afternoon,

Attached are the public comments regarding Legislation 0044-19: Supporting Navajo Transitional Energy Company's Independent Acquisition of Navajo Generating Station and Kayenta Mine; Statement of Policy Regarding Refusal to Financially Guarantee or Provide Waivers or Releases of Claims by the Navajo Nation Pertaining to that Acquisition.

I also, support the passage of legislation 0044-19. Let's get SRP back to the table to negotiate. We have a lot of miners that want to continue working here at the Kayenta Mine.

Thanks,

Jarvis Williams

Tribal Relations Manager – Kayenta Mine

Peabody

we have. So let's stay proud and keep what we
accomplished don't throw away billions of dollars.

Agree not to demolish the Kayenta Mica
facilities w/ be a big mistake, financial loss and waste.
Restoring the land back for what reason?

The facilities on Black Mesa should remain for use for
the tribe and as community offices, police safety
offices, training facilities.

TWIN ARROWS

CASINO RESORT.

I whole heartedly support the NGS and the Kayenta Mine continuous operation for the Navajo Nation's Benefits; future. As a Navajo born, raised and went to school on the Navajo reservation, I had no desire to move or live anywhere else. My father served his beloved Navajo people for over 50 yrs. and shared his strong love and respect for our reservation land and its resources to help its people. For the few that say coal is not good, they only think of the past and what they lost. Coal helps our future, our miners put their children through college, their children are the future. I hear comments from non Navajos about the Navajo Nation's rich environment and we should be proud of what we have. So let's stay proud and keep what we accomplished don't throw away billions of dollars.

Additional comments: To demolish the Kayenta Mine facilities will be a big mistake, financial loss and waste. Restoring the land back. For what reason?

The facilities on Black Mesa should remain for use for the NN's tribal offices, community offices, public safety offices, training facilities.

MARCH 4, 2019

CHANDLER, Ariz. – Navajo Transitional Energy Company officials outlined points to the Navajo Nation Council, on Saturday, March 2, that led to last week's stalled negotiations with Salt River Project for the acquisition of Navajo Generating Station.

Negotiations for Navajo Generating Station stalled last week due to SRP's insistence on a direct and unlimited guarantee from the Navajo Nation itself for any and all of the obligations and liabilities NTEC would assume under the acquisition. NTEC has made repeated attempts to offer alternate, and commercially reasonable assurances to SRP, including a significant bond amount. NTEC voiced opposition to SRP's demands and has publicly stated the Nation should not accept the demand for the unlimited guarantee and that the tribe created NTEC to protect the tribe's sovereignty.

The meeting lasted five hours as the NTEC board answered questions from the 18 Council delegates that attended the meeting. The purpose of the work session was to continue discussions regarding the status of NTEC's efforts to acquire Navajo Generating Station (NGS) and Kayenta Mine. NTEC's Management Committee presented to the Navajo Nation

Council. The seven-member Management Committee is comprised of Navajo professionals in various fields, including engineering, science, legal and business.

"NTEC believes all the points leading to stalled negotiations with SRP and NGS owners were explained and outlined diligently and tactfully by the board to the delegates that attended the meeting," said NTEC CEO Clark Moseley.

On Saturday, NTEC's Board informed the Council that talks with NGS majority owner Salt River project (SRP) had stalled because of SRP unreasonable demands such as having the Navajo Nation provide unlimited guarantees on the purchase of the power plant.

Some Council members stated that SRP has a monopoly in the desert southwest power grid and expressed the idea that the Navajo Nation soon could become its main competitor. Others voiced concern that SRP was protecting the 50,000-acre feet water currently assigned to SRP and that the utility would prefer to return the water rights over to the State of Arizona rather than the Navajo Nation.

Tim McLaughlin, NTEC board chair, began by stating that the Navajo leadership had requested that NTEC assess the feasibility and advisability of purchasing NGS and Kayenta. McLaughlin reported to the Council that NTEC had concluded that such an acquisition would be in the best interest of both the Navajo Nation and NTEC. He further explained that the Management Committee had directed the company to proceed with negotiations.

McLaughlin also took the opportunity to explain NTEC's corporate status and purpose as a wholly-owned tribal entity. NTEC was created under Navajo Law as a separate legal entity and was formed to manage and develop the Navajo Nations energy assets. The 22nd Navajo Nation council gave NTEC full authorization and authority to pursue energy acquisitions. Most importantly the Navajo Nation wanted an entity that could assist the tribe in taking back control of its natural resources. As Mr. McLaughlin stated, the proposed acquisition of NGS/Kayenta is precisely the type of opportunity NTEC was created to pursue.

During the session, a number of participants voiced their concern that SRP, as a regulated monopoly in the desert south west power grid, was intentionally trying to block any deal to prevent the entry of a significant competitor in the market. Others voiced concern that SRP was protecting the 50,000-acre feet water currently assigned to the NGS plant and that the utility would prefer to return the water rights over to the State of Arizona rather than the Navajo Nation

"We consistently reminded the Council the acquisition is too important to the Navajo people.

Aside from breaking up Navajo families because the main bread winners would have to leave the

Navajo Nation to look for jobs, closure of NGS would have a major economic impact to the Nation. Estimates over another 10-year period of operation for NGS will yield an estimated economic impact of \$2.6 billion to Northern Arizona, the Navajo Nation, and the Hopi Tribe," Moseley said.

The meeting with the Navajo Nation Council ended with the Council proposing to have emergency legislation regarding to address several important issues: to support NTEC's proposition to acquire the assets and to inform SRP that the Navajo Nation would not agree to the demand for an unlimited guarantee from the Nation, and, to inform the Department of Interior that the Navajo Nation wishes to continue with acquiring both assets.

"We feel this vote is extremely important to the outcome of further negotiations. We are still open and optimistic that an agreement can be met between NTEC and the NGS owners and having the Navajo Council's support would help our prospects to continuing creating a strong tribal business entity that responsibly manages energy assets of the Navajo Nation. We still believe the acquisition would make the Nation stronger for the long term," Moseley said.

Dear Honorable Delegates,

Does NTEC know that NGS needs water and the State of AZ controls the water? If the State of AZ pulls the water, no water to drive the steam turbine to make electricity. No water no play. Like running a truck with no radiator fluid.

OR IMMEDIATE RELEASE

Scott Harelson, SRP, (602) 236-2500

@ScottHarelson

February 28, 2019

Owners Move Forward with Decommissioning NGS

Since the non-federal owners made the difficult decision in February 2017 that they would no longer own and operate Navajo Generating Station (NGS) after its lease ends later this year on Dec. 22, the plant's owners have granted several extensions and taken other steps to enable any interested entity to evaluate and potentially continue operation of NGS upon receipt of all necessary approvals.

Most recently, the owners in October began discussions with Navajo Transitional Energy Company (NTEC) at the request of the Navajo Nation and supported NTEC's pursuit of a possible asset transfer by making available information related to NGS and by providing access to the plant.

While the owners have been willing to explore avenues for NTEC to assume ownership of NGS, NTEC is not able to provide the required assurances to protect the plant's owners, their customers and shareholders in the event of a sale. Because of the time challenges to meet their decommissioning obligations, the owners will continue to move forward with plans to decommission NGS later this year.

The NGS owners will continue to fulfill their commitments to the Navajo Nation and the NGS employees as they prepare to cease operations of the plant. Operations at NGS continue to be conducted in a safe manner for employees and investments continue to be made to complete decommissioning of the plant within the current agreed-upon timelines with the Navajo Nation.

The utility owners of NGS include Salt River Project, Arizona Public Service Co., Tucson Electric Power Co., and NV Energy.

New U.S. power plants expected to be mostly natural gas combined-cycle and solar PV

Annual electricity utility-scale generating capacity additions (AEO2019 Reference case)
gigawatts

Source: U.S. Energy Information Administration, *Annual Energy Outlook 2019*

EIA's long-term projections show that most of the electricity generating capacity additions installed in the United States through 2050 will be natural gas combined-cycle and solar photovoltaic (PV). Onshore wind looks to be competitive in only a few regions before the legislated phase-out of the production tax credit (PTC), but it becomes competitive later in the projection period as demand increases and the cost for installing wind turbines continues to decline.

For EIA's *Annual Energy Outlook 2019* (AEO2019), EIA calculates two measures that, when used together, provide an intuitive framework for understanding the capacity expansion decisions modeled for utility-scale power plants—those with a capacity rating of 1 megawatt (MW) or greater.

The **levelized cost of electricity (LCOE)** represents the cost to build and operate a power plant, converted to a level stream of payments over the plant's assumed financial lifetime. Installed capital costs include construction costs and financing costs. Operating costs include fuel costs (for power plants that consume fuel) and expected maintenance costs. LCOEs may also include other applicable tax credits or subsidies.

The **levelized avoided cost of electricity (LACE)** accounts for the differences in the grid services each generating technology is providing (a power plant's value) to the grid. For example, natural gas combined-cycle plants and coal plants provide dispatchable baseload services to the grid and thus have similar LACE values, even if their LCOE values differ. A generator's avoided cost provides a proxy for the potential revenues from sales of electricity generated. As with LCOE, these revenues are converted to a level stream of payments over the plant's assumed financial lifetime.

The ratio of these two measures serves as a value-to-cost ratio. Power plants are considered economically attractive when their projected LACE exceeds their projected LCOE, meaning their value-cost ratio exceeds one.

The relative costs and values of several technology options are calculated for each of the 22 electricity regions in the modeling system used to inform EIA's *Annual Energy Outlook*. Calculations start in 2021 because that is the first feasible year that all three technologies are available to come online in the model, given the assumed construction lead-time and licensing requirements.

Levelized costs of electricity, levelized avoided costs, and capacity additions (2021-2050) Annual Energy Outlook 2019 Reference case

Source: U.S. Energy Information Administration, *Annual Energy Outlook 2019 and Levelized Cost and Levelized Avoided Cost of New Generation Resources in the Annual Energy Outlook 2019*.

Because both LCOE and LACE are levelized over the lifetime of the plant, these values change over time. Natural gas combined-cycle units' LCOEs increases gradually as natural gas prices rise. Utility-scale solar photovoltaic (PV) and onshore wind's LCOEs initially increase as a result of the loss of the tax credits but then decrease because of the continued decline in installed costs. Wind's LCOE may also increase as the best wind resource sites are built out and new projects must be installed in areas that have either lower wind resources or less ease of access.

Natural gas combined-cycle units are considered, on average, the marginal source of electricity generation through 2050, meaning the cost of electricity generation from this technology is most often the basis of comparison for new power plants. As natural gas prices increase, the marginal source becomes more expensive to operate, and the value to the grid of avoiding this cost by building new capacity increases, as seen in the general upward trend in LACE for natural gas combined-cycle and onshore wind.

Conversely, solar PV's LACE is generally flat to declining during the projection period. As solar penetration in the grid increases, solar capacity saturates during the midday hours, causing the value of electricity delivered in those hours to decrease.

In the AEO2019 Reference case, natural gas combined-cycle's value-cost ratio is closest to 1.0 throughout the projection, indicating that its value just covers its costs. Natural gas combined-cycle units account for the largest share of new power plants (43% of the utility-scale total from 2021 through 2050). Solar PV's value-cost ratio is slightly less than 1.0, indicating that, on average, its value does not cover its costs, but capacity is still added. In some cases, these solar PV additions may be uneconomic, but they still occur to satisfy the renewable portfolio standard (RPS) requirements in 29 states and the District of Columbia.

Onshore wind's value-cost ratio remains lower than 1.0 throughout the projection period and lower than solar PV. Consequently, little onshore wind is installed in the Reference case, except in the near term when wind capacity is built to take advantage of the available PTC.

More information about LCOE, LACE, and economic competitiveness of electricity generating technologies is available in EIA's *Levelized Cost and Levelized Avoided Cost of New Generation Resources in the Annual Energy Outlook 2019* report.

IN THE UNITED STATES DISTRICT COURT
FOR THE DISTRICT OF ARIZONA

The Hopi Tribe, *et al.*,

Plaintiffs,

v.

Central Arizona Water Conservation District,
Defendant.

No. 2:18-cv-01337-SPL

**GILA RIVER INDIAN
COMMUNITY'S REPLY
IN SUPPORT OF
MOTION TO DISMISS**

The Gila River Indian Community ("Community") hereby files this reply in support of its motion to dismiss the complaint. As shown below, the Colorado River Basin Project Act, Pub. L. 90-537, 43 U.S.C. §§ 1501-1556 ("Basin Project Act" or "Act"), authorized the Secretary of the Interior ("Secretary") to purchase capacity at a thermal generating power plant. That grant of authority, exercised by the Secretary 50 years ago to purchase capacity at the Navajo Generating Station ("NGS"), does not now require that the Central Arizona Water Conservation District ("CAWCD") and Central Arizona Project ("CAP") water users continue to buy power from NGS at above-market rates as an indirect subsidy for Plaintiffs' coal mine. Further, Plaintiffs have no right to equitable relief against CAWCD under the Basin Project Act and have no Article III standing to raise their baseless claim.

ARGUMENT

I. THE COMPLAINT FAILS TO STATE ANY COGNIZABLE CLAIM AGAINST CAWCD FOR VIOLATION OF THE BASIN PROJECT ACT

The complaint must be dismissed because CAWCD and CAP water users are not required by federal law to subsidize Plaintiffs' coal operations by purchasing uneconomical electricity generated by Plaintiffs' coal. Neither Section 303 of the Basin Project Act, 43 U.S.C. § 1523, nor the 1969 Plan submitted by the Secretary that outlined his plans to invest in NGS, requires CAWCD to purchase power from NGS. And Plaintiffs have no right under the Act to seek equitable relief against a water district such as CAWCD for an alleged violation.

A. CAWCD has no statutory duty to contract for or buy NGS power.

1. Plaintiffs attempt to conflate Congress's authorization for the Secretary to purchase the right to capacity with an indefinite mandate requiring CAP to buy that power.

In responding to the motions to dismiss, Plaintiffs rely on statutory provisions in the Basin Project Act that authorize the Secretary to obtain the right to capacity at a power plant so it is available to CAP for purchase. Ignoring the plain meaning of the statutory text, they attempt to graft onto the statute an imagined obligation on the part of CAWCD to contract for and buy that power indefinitely. Congress authorized the Secretary to provide the Central Arizona Project with a source of affordable power by purchasing the right to capacity at a power plant. That does not equate to a mandate providing coal miners, an Indian tribe, and a coal company a federal statutory guarantee that the Central Arizona Project must continue to buy power from NGS 50 years later, instead of from more affordable sources. Making NGS power available to CAP has historically served the statutory purpose of affordable water distribution, a purpose Plaintiffs implicitly acknowledge. *See* Pls.' Resp. Br., Doc. 41, at 31 n.7 ("Br.") ("NGS has provided over the

1 long term the lowest cost power for CAP.”). Requiring continued purchase of such power
2 despite its becoming uneconomical would contravene that statutory purpose.

3 Plaintiffs’ arguments are contrary to the plain language of the Basin Project Act.
4 Subsection 1523(b) is an *authorization* for the Secretary to acquire “the *right* to” whatever
5 portion of the capacity of power plants that “he determines is required in connection with”
6 operating CAP. In this provision, Congress authorized the Secretary to enter into
7 agreements to acquire the right to power-plant capacity for purposes of supplying CAP
8 with as much power as it might need: “the Secretary may enter into agreements with non-
9 Federal interests proposing to construct thermal generating powerplants whereby the
10 United States shall acquire the right to such portions of their capacity. . . as he determines
11 is required in connection with the operation of the Central Arizona Project.” 43 U.S.C. §
12 1523(b). Congress authorized the Secretary to use appropriated funds for the purchase of
13 an entitlement to capacity at NGS for the specific purpose of securing an affordable source
14 of power for CAP. This gave CAWCD the right to contract for and buy power out of the
15 United States’ entitlement to 24.3% of NGS capacity.

16 That does not mean that Congress mandated the use of that “right” in any particular
17 quantity or for any particular time period. There is no statutory mandate that CAP must
18 continue to exercise the right to that portion of capacity beyond the useful life of NGS, or
19 seek to artificially prolong the life of NGS rather than obtain power from some other
20 source. If Congress had intended such a mandate as a guarantee to coal producers, it would
21 have said so. That it did not is not surprising, because acquiring a right to power-plant
22 capacity was a means to an end: powering CAP in the most economical manner. Congress
23 required the Secretary to provide for a source of power for CAP in the 1969 Plan. But
24 Congress did not prejudge, predetermine, or mandate the useful life of that power supply.

25 Indeed, the 1969 Plan itself is focused solely on obtaining the most affordable
26 available power. As the plan makes clear, purchasing the right to capacity at NGS made
27 available a lower-cost source of power than would otherwise have been available to CAP.
28

1 The 1969 Plan summarizes the efforts the Secretary made to arrive at “[t]he most feasible
2 plan to supply the power requirements of the Central Arizona Project.” Doc. 41-1 at 7.
3 The Secretary evaluated what the lowest-cost source of available power would be, and
4 considered the possibility of “direct purchase” from existing suppliers. *Id.* at 6. Several
5 potential suppliers could not supply the needed power. *See id.* at 7. Three potential
6 suppliers offered to sell the power at prices of \$55.65 per kilowattyear, \$46-\$57 per
7 kilowattyear, and \$54 per kilowattyear respectively. *See id.* “By comparison the cost to
8 the United States by the purchase of entitlement to power is approximately \$27 per
9 kilowattyear.” *Id.* It was only after making that cost comparison that the Secretary
10 exercised his authority to use appropriations under the Act to purchase the entitlement to
11 power at NGS, effectively creating a captive supplier of power that could undercut open-
12 market options. It would be inconsistent with the logic of the 1969 Plan, nearly 50 years
13 later and in drastically different market conditions, to require purchase of NGS power at
14 above-market prices.

15 Although Plaintiffs purport to rely on the 1969 Plan, they ignore its focus on finding
16 the lowest cost power. And they point to no congressional ratification of the 1969 Plan that
17 would transform it into the mandate to buy NGS power that they seek. Indeed, in
18 submitting the 1969 Plan, the Secretary did not seek, and did not need to seek, further
19 congressional approval. Rather, the Secretary stated, “I am proceeding pursuant to Section
20 303(b) to execute the necessary agreements and contracts to implement the recommended
21 plan.” *Id.* at 8. Contrary to Plaintiffs’ arguments, that does not detract from the statutory
22 requirement that the Secretary submit the plan to Congress for it to become operative. The
23 plan was subject to further approval only if it recommended something outside the
24 authority already granted in subsection 1523(b), which it did not. *See* 42 U.S.C. § 1523(c)
25 (“Except as authorized by subsection (b) of this section, such plan shall not become
26 effective until approved by the Congress.”). Thus, the language requiring congressional
27 approval of any plan outside § 1523(b) is contingent, not surplus.

1 Nor is there support for a mandated subsidy of NGS or coal production in any of the
2 other authorities relied on by Plaintiffs. The Hoover Power Plant Act of 1984, Pub. L. 98-
3 381, merely provides for the marketing of any NGS power not sold to CAP. *Id.* § 107(a).
4 That Congress required the Secretary to sell power not used by CAP is unremarkable and
5 irrelevant. Congress did not thereby mandate that CAWCD buy NGS power for any period
6 at any price. The Navajo Power Marketing Plan likewise merely recognizes that the
7 Secretary must make the United States' NGS power available to CAP for purchase. That
8 the Secretary must do so, and that he may sell to others only what CAP does not use, is
9 consistent with Congress's evident purpose to ensure that CAP can buy from NGS what it
10 needs for its operations. It does not mean that CAP is *required* to contract for and buy such
11 power no matter the cost. The Basin Project Act and other reclamation acts are not acts to
12 keep coal-fired power plants in operation indefinitely at any cost. They are acts that
13 provide for delivery of water in arid climates through the most practicable, economical
14 means.

15 The letters Plaintiffs cite to attempt to support their arguments instead reinforce the
16 point that CAWCD's purchase of NGS power is a matter of choice, based on feasibility
17 considerations. In a letter dated November 6, 2017, the Acting Assistant Secretary for
18 Water and Science asked CAWCD to "seriously and fully *consider* NGS as being its
19 primary source of baseload power for the CAP." Doc. 41-3 at 3 (emphasis added). Thus,
20 "[t]he Department... stands ready to continue our efforts to find manners in which to
21 continue NGS operations post-2019 and *encourages* CAWCD to be a part of this effort."
22 *Id.* (emphasis added). If CAWCD had no choice but to purchase its power from NGS, there
23 would be nothing to consider. Indeed, in a letter dated June 1, 2018, the Assistant Secretary
24 for Water and Science provided an analysis of the Basin Project Act and characterized it as
25 "the applicable governing authority," but pointed to nothing in the Act requiring the
26 purchase of NGS power if it is uneconomical. Rather, the Act "must be *addressed* in any
27 decision relating to future sources of Project power. With the 1968 Act in mind, *the*

1 *Department expects to consider several options going forward, including the feasibility of*
 2 *continued use of NGS-provided power.” Doc. 23-4 at 3 (emphasis added). “Feasibility” is*
 3 *the touchstone; there is no mandate. Far from asserting or acceding to any statutory*
 4 *mandate for the purchase of NGS power, the Assistant Secretary only “look[ed] forward to*
 5 *a constructive dialogue regarding the most appropriate path forward.” Id. (emphasis*
 6 *added).*

7 **2. Plaintiffs misread the Arizona Water Settlements Act, a statute that**
 8 **reinforces the Basin Project Act’s purpose to provide affordable**
 9 **water delivery.**

10 The Community showed in its motion to dismiss that the Basin Project Plan and the
 11 Arizona Water Settlements Act of 2004, Pub. L. 108-451, 118 Stat. 3478, 43 U.S.C. § 1501
 12 note (2004) (“AWSA”), must be read in harmony, and that in particular both provide for
 13 affordable delivery of CAP water to the Community. Doc. 27 at 8-10. The Basin Project
 14 Act authorized the Secretary to obtain capacity as a means of lowering delivery costs. The
 15 AWSA provides structural subsidies and other mechanisms to lower the cost of delivering
 16 CAP water to the Community so as to make such water an adequate substitute for the on-
 17 reservation water the rights to which the United States as trustee agreed to relinquish in the
 18 Community’s water settlement. Rather than acknowledge these points and address the
 19 Community’s argument about AWSA head-on, Plaintiffs mischaracterize it as an argument
 20 “that Congress *amended* the 1969 Plan’s requirement respecting NGS when Congress
 21 enacted the AWSA.” Br. at 26 (emphasis added). There was no such requirement in the
 22 1969 Plan, and so the Community has never argued that AWSA amended it.

23 Plaintiffs argue that because Congress specified that certain non-CAP works be
 24 powered with “the least expensive source of power available,” this means Congress did not
 25 care about the cost of power for CAP. Br. at 31. But the provision they cite, AWSA §
 26 203(d)(1)(B), contradicts their argument. It requires the Secretary to “provide electric
 27 power for San Carlos Irrigation Project wells and irrigation pumps at the Secretary’s direct
 28

1 cost of transmission, distribution, and administration, using the least expensive source of
2 power available.” *Id.* Plaintiffs miss that the San Carlos Irrigation Project (“SCIP”) is
3 responsible for delivering to the Community’s Reservation a large proportion of the water
4 to which it is entitled under the AWSA, water from the Gila River and the San Carlos
5 Reservoir. *See In re General Adjudication of All Rights to Use Water in the Gila River*
6 *System and Source*, 224 P.3d 178, 187 (Ariz. 2010) (en banc). Congress had previously
7 taken steps in the Basin Project Act to facilitate lowest-cost delivery of CAP water to the
8 Community, as the Plaintiffs acknowledge. *See Br.* at 31 n.7 (“NGS has provided over the
9 long term the lowest cost power for CAP.”). It is nonsensical to view Congress’s explicit
10 guarantee of low-cost delivery for another component of the Community’s entitlement,
11 SCIP water, as any indication that Congress disclaimed such concern for the cost of
12 delivery for CAP water. Rather, this provision of the AWSA for non-CAP water
13 complements and reinforces Congress’s concern for keeping the costs of delivery for CAP
14 water affordable, which is evident in the Basin Project Act and structurally reinforced in
15 AWSA by the subsidies given to the Community for fixed operation and maintenance
16 charges for delivery of Community CAP Water. *See AWSA* §§ 205(a)(6), 205(a)(7),
17 205(a)(8), 205(e), 208. Plaintiffs’ arguments to the contrary defy logic.

18 **B. Under *Long v. Salt River Valley Water Users’ Ass’n*, Plaintiffs cannot**
19 **bring a private equitable claim to enforce the Basin Power Act against**
20 **CAWCD.**

21 In response to the motion to dismiss their complaint to enforce the Basin Project
22 Act, Plaintiffs concede that “Congress did not create a remedy to enforce the Basin Project
23 Act against the States or their subdivisions” such as CAWCD. *Br.* at 26. Indeed, as *Long*
24 *v. Salt River Valley Water Users’ Ass’n*, 820 F.2d 284, 288 (9th Cir. 1987), squarely held,
25 there is no private right of action under the Basin Project Act, so Plaintiffs’ suit here against
26 CAWCD cannot proceed. In an attempt to rescue the complaint, Plaintiffs disclaim any
27 attempt to sue directly under the Basin Project Act: “Plaintiffs do not purport to assert a
28

1 claim under the Basin Project Act.” Br. at 24. Instead they characterize it as an equitable
2 action raising a judge-made claim to enjoin future violations of federal law—the Basin
3 Project Act—by a “state actor” (CAWCD).

4 As shown above, the Basin Project Act does not impose any duties on CAWCD, and
5 therefore Plaintiffs have not pleaded any violation of the Act that can be enjoined. But
6 even if federal law imposed a duty on the Secretary to require CAWCD to buy power from
7 NGS as long as it remains open, *Long* still precludes the Plaintiffs from enforcing the Basin
8 Project Act by any means other than an APA claim against the Secretary.

9 In *Long*, acknowledging the possibility of injunctive relief against the Secretary
10 under the APA, the Ninth Circuit specifically noted that “to say that [plaintiff] may have a
11 right of action under the APA to compel *the Secretary’s* compliance with reclamation law
12 does not mean that reclamation law provides a right of action against *parties other than the*
13 *Secretary.*” *Long*, 820 F.2d at 287 n.5 (citing *Legal Aid Soc’y v. Brennan*, 608 F.2d 1319,
14 1332 (9th Cir. 1979)) (emphasis added). Plaintiffs have not invoked the APA here; the
15 complaint makes no mention of it and the Plaintiffs have chosen not to sue the Secretary.

16 Contrary to Plaintiffs’ arguments, *Armstrong v. Exceptional Child Ctr., Inc.*, 135 S.
17 Ct. 1378 (2015), does not support their position; it refutes it. *Armstrong* held that “[t]he
18 power of federal courts of equity to enjoin unlawful executive action is subject to express
19 and implied statutory limitations,” and that a plaintiff “cannot, by invoking [a federal
20 court’s] equitable powers, circumvent Congress’s exclusion of private enforcement” of a
21 federal statute. *Id.* at 1385. *Armstrong’s* analysis echoes and reinforces the Ninth Circuit’s
22 conclusion in *Long*. The Supreme Court cited two reasons the statute at issue precluded
23 claims for equitable relief by private parties. First, the statute already provided a specific
24 remedy for its violation, and the “express provision of one method of enforcing a
25 substantive rule suggests that Congress intended to preclude others.” *Id.* Second, the
26 statute conferred discretion on the federal official in question to administer the statute. *Id.*
27 Years earlier, *Long* applied this same analysis and likewise held that Congress excluded
28

1 private enforcement of the reclamation acts. On the first point, *Long* held that Congress's
 2 creation of a right for states to sue the Secretary directly in the Supreme Court under the
 3 reclamation statutes "suggests its intent not to provide [another] remedy." *Long*, 820 F.2d
 4 at 288. On the second point, the Ninth Circuit cautioned that "private suits against parties
 5 other than the Secretary" to enforce the Act "could very well undermine the discretion the
 6 Secretary enjoys in distributing water under the reclamation statute." *Id.* It would violate
 7 *Armstrong* and *Long* to allow a private party to sue CAWCD in equity to impose duties
 8 under the Basin Project Act.

9 The complaint alleges that any purported duty of CAWCD to buy power from NGS
 10 is derivative of the Secretary's duties under the Basin Project Act. See Complaint ¶ 2.
 11 Plaintiffs allege that CAWCD has agreed contractually "to operate and maintain" CAP and
 12 that "[c]onsistent with its principal's obligation under federal law to obtain CAP's power
 13 requirements from NGS," CAWCD is required to do so as well. *Id.* Plaintiffs cannot
 14 enforce the Secretary's alleged duties, and end run seeking whatever relief might be
 15 available under the APA, by suing a water district instead. There is no private cause of
 16 action here, equitable or otherwise, against CAWCD to enforce the Basin Project Act.

17 **II. PLAINTIFFS FAIL TO SHOW THEY HAVE STANDING**

18 The Plaintiffs have failed to meet their burden, as the parties invoking federal
 19 jurisdiction, to "clearly ... allege facts demonstrating" that they "have (1) suffered an injury
 20 in fact, (2) that is fairly traceable to the challenged conduct of the defendant, and (3) that
 21 is likely to be redressed by a favorable judicial decision." *Spokeo, Inc. v. Robins*, 136 S.Ct.
 22 1540, 1547 (2016) (alteration original) (citations omitted). "It is the responsibility of the
 23 complainant clearly to allege facts demonstrating that he is a *proper party* to invoke judicial
 24 resolution of the dispute and the exercise of the court's remedial powers." *Warth v. Seldin*,
 25 422 U.S. 490, 518 (1975) (emphasis added). The Plaintiffs are not the proper parties to
 26 bring the claim they assert.

1 Plaintiffs ignore that “[s]tanding, unlike other jurisdictional doctrines, ‘focuses on
 2 the party seeking to get his complaint before a federal court and not on the issues he wishes
 3 to have adjudicated.’” *Pritkin v. Department of Energy*, 254 F.3d 791, 796 (9th Cir. 2001)
 4 (quoting *Simon v. Eastern Ky. Welfare Rights Org.*, 426 U.S. 26, 38 (1976)). “To establish
 5 injury in fact, a plaintiff must show that he or she suffered ‘an invasion of a legally
 6 protected interest’ that is ‘concrete and particularized’ and ‘actual or imminent, not
 7 conjectural or hypothetical.’” *Spokeo*, 136 S.Ct. at 1548 (quoting *Lujan v. Defenders of*
 8 *Wildlife*, 504 U.S. 555, 560 (1992)). Here the Plaintiffs assert an injury to an “on-going
 9 sale process” (Br. at 17) *in which they are neither buying nor selling*. Even assuming that
 10 some absent party could sue for such an injury, the Plaintiffs cannot.

11 Plaintiffs’ reliance on *Bryant v. Yellen*, 447 U.S. 352 (1980), ignores the distinction
 12 between participants in a sale process who have standing and third parties who do not,
 13 evident in the lower court decisions in *Bryant*. In *Bryant* the district court held that certain
 14 lands were not subject to irrigation restrictions asserted by the United States under the
 15 Boulder Canyon Project Act, 43 U.S.C. §§ 617-617v—a victory for landowners which
 16 improved the value of their lands. The United States did not appeal, but the Ninth Circuit
 17 held that parties who sought to purchase the lands at a discount if the restriction were
 18 applied could intervene and appeal. *U.S. v. Imperial Irrigation Dist.*, 559 F.2d 509, 521-
 19 22 (9th Cir. 1977) (affirmed in part, vacated in part). The Ninth Circuit compared the case
 20 to *Bowker v. Morton*, 541 F.2d 1347 (9th Cir. 1976), where “a group of small family farmers
 21 in one area of California” lacked standing “to compel the government to apply” the same
 22 statutory limitation “to an irrigation project in another area of California.” *Id.* at 517 (citing
 23 *Bowker*, 541 F.2d at 1349). The Ninth Circuit distinguished *Bowker* because there “the
 24 plaintiffs sought only to force landowners in another area to sell their land at prices
 25 determined by the application of [reclamation laws]. They did not desire to purchase this
 26 land, even if the price were to be reduced, and those plaintiffs were therefore not injured
 27 by higher land prices.” *Id.* at 522. The Supreme Court briefly considered the standing
 28

1 issue on appeal and affirmed the Ninth Circuit's standing analysis because the price of the
2 lands respondents *wished to purchase* would be affected by the outcome of the case.
3 *Bryant*, 447 U.S. at 368.

4 Under the Ninth Circuit's analysis in *Bryant*, Plaintiffs lack standing. Plaintiffs
5 allege that CAWCD's power-purchasing decisions "have harmed the on-going sale
6 process" of NGS. Br. at 17. But Plaintiffs allege no ownership interest in NGS, nor any
7 interest or ability to purchase NGS. Thus, their claims fall outside the scope of *Bryant*,
8 where the Court affirmed the Ninth Circuit's analysis that the intervenors had standing
9 precisely because they sought to purchase the land at issue in the case.

10 Similarly, in *Clinton v. City of New York*, 524 U.S. 417 (1998), the Supreme Court
11 held that an effect on a sale process could constitute injury-in-fact to participants. There,
12 a farm cooperative "was formed ... to assist Idaho potato farmers in marketing ... and
13 stabilizing prices, in part through a strategy of acquiring potato processing facilities," to
14 take advantage of an anticipated amendment to the capital gains tax that would favor such
15 acquisitions. *Id.* at 426. The farm cooperative "was engaged in negotiations with the owner
16 of an Idaho potato processor that would have qualified for the tax benefit" but these
17 negotiations ended when President Clinton used the Line-Item Veto Act to cancel that
18 portion of the legislation. *Id.* The Supreme Court held that the farm cooperative had
19 standing and noted "three critical facts": (1) the legislation had the "specific purpose" of
20 benefiting "a defined category of potential purchasers of a defined category of assets"; (2)
21 the canceled benefit was one of only two tax benefits singled out for cancellation; and (3)
22 "the [farm cooperative] was organized for the very purpose of acquiring processing
23 facilities, it had concrete plans to utilize the benefits of § 968, and it was engaged in
24 ongoing negotiations" *Id.* at 432.

25 Plaintiffs here share none of these characteristics. Congress enacted the Basin
26 Project Act "to provide federal financing, construction, and operation of water storage and
27 distribution projects throughout the United States," not to confer any benefit on the
28

1 Plaintiffs or the Kayenta Mine. *Smith v. Central Ariz. Water Cons. Dist.*, 418 F.3d 1028,
2 1030 (9th Cir. 2005). Moreover, the Plaintiffs were not organized to participate in the
3 attempts to sell NGS, nor do they allege any direct interest in participating in the NGS sale
4 process. Rather, they ask this Court decide issues that could be presented, if at all, only by
5 a potential buyer or seller of NGS.

6 Nor does *CAWCD v. EPA*, 990 F.2d 1531 (1993), support Plaintiffs. In *CAWCD*,
7 standing rested on CAWCD's direct contractual obligations to pay the costs that the
8 litigation would impose. CAWCD had standing to challenge environmental regulations at
9 NGS as though it were an owner, "given their obligation to repay BOR's share of the costs
10 imposed by the Final Rule." *Id.* at 1538. In contrast, here, the Plaintiffs do not and cannot
11 allege that they would be contractually obligated to bear the cost of an NGS closure on
12 behalf of an owner. Rather, they would be only indirectly and incidentally affected as
13 suppliers of coal to NGS. If Plaintiffs were to have standing on the ground of indirect
14 economic effects, so too would all of "those entities that currently benefit directly and
15 indirectly from NGS, including Tribal Nations and millions of people and thousands of
16 businesses in the State of Arizona." Doc. 41-3 at 2.

17 Moreover, the distinctions between Plaintiffs' relationship to the potential sale of
18 NGS and CAWCD's contractual obligations in *CAWCD v. EPA* illustrate how Plaintiffs fail
19 to show causation and redressability here. In *CAWCD v. EPA*, the Ninth Circuit found that
20 the Final Rule was the direct cause of CAWCD's liability. "While CAWCD's contractual
21 obligations may provide the basis for its economic liability for the increased costs imposed
22 by the Final Rule, that hardly means that the Final Rule itself is not the direct cause of that
23 liability." *CAWCD v. EPA*, 990 F.2d at 1538. There, CAWCD had a legal relationship with
24 an owner of NGS which obligated it to bear the cost of compliance with the Final Rule at
25 issue in the case. Further, the Ninth Circuit found that CAWCD's "economic injury [was]
26 likely to be redressed by a favorable decision since elimination of the Final Rule would
27 necessarily eliminate the increased financial burden the rule causes." *Id.* Plaintiffs do not
28

1 and cannot allege such a causal link here between their interests and the relief sought;
 2 where Plaintiffs are not involved in the sale process, a harm to the “process” that is not an
 3 actual and proximate cause of NGS closure does not harm them. “[W]here the causal chain
 4 involves numerous third parties whose independent decisions collectively have a
 5 significant effect on plaintiffs’ injuries, ... the causal chain is too weak to support
 6 standing.” *Washington Environmental Council v. Bellon*, 732 F.3d 1131 (2013) (quoting
 7 *Native Vill. Of Kivalina v. ExxonMobil Corp.*, 696 F.3d 849, 867 (2012) (alterations
 8 original)). Indeed, Middle River, the potential buyer that Plaintiffs reference 20 times in
 9 their response, has backed out of negotiations to purchase NGS.¹

10 The Plaintiffs have not met their burden in pleading the “irreducible constitutional
 11 minimum” requirements for Article III standing. *See Lujan*, 504 U.S. at 560. Rather, they
 12 have alleged that CAWCD’s purchasing decisions cause injury to a sale process in which
 13 they claim no legal interest. Accordingly, Plaintiffs fail to establish this Court’s Article III
 14 jurisdiction to hear this case.

15 **III. THE COMPLAINT SHOULD BE DISMISSED FOR FAILURE TO JOIN A** 16 **REQUIRED PARTY UNDER FED. R. CIV. P. 19**

17 The Community showed in its motion to dismiss that the United States is required
 18 to be joined and cannot be joined here. Doc. 27 at 16-17. Plaintiffs do not squarely dispute
 19 that the United States is a required party. Plaintiffs argue instead that the Secretary of the
 20 Interior, the Secretary of Energy, the Navajo Nation, and “CAP Water Buying Tribes” are
 21 not required parties, Br. at 34-35. And even as to the Secretary of the Interior, the Plaintiffs’
 22 arguments are incorrect.

23 First, Defendants argue that the Secretary cannot be “required” under Rule
 24 19(a)(1)(B) unless he affirmatively claims an interest in the litigation. Br. at 33. But Rule
 25 19 requires only that the absent party “claim[] an interest *relating to the subject of the*

26
 27 ¹ See Sept. 20, 2018 Press Release, *available at* <https://www.srpnet.com/newsroom/releases/092018.aspx>.
 28

1 action,” not that it claim an interest in the litigation directly. *See* Fed. R. Civ. P. 19(a)(1)(B).
 2 Thus, in *EEOC v. Peabody Western Coal Co.*, 610 F.3d 1070, 1081-82 (9th Cir. 2010), the
 3 Ninth Circuit held that the Secretary of the Interior was a “required” party under Rule
 4 19(a)(1)(B) despite not claiming an interest in the litigation itself and not being a party to
 5 the leases at issue. *Accord, e.g., Shermoen v. United States*, 982 F.2d 1312, 1317 (9th Cir.
 6 1992) (“[T]he finding that a party is necessary to the action is predicated only on that party
 7 having a claim to an interest.”). In *Northrop Corp. v. McDonnell Douglas Corp.*, 705 F.2d
 8 1030 (9th Cir. 1983), cited by Plaintiffs, the Court itself analyzed the Government’s
 9 unasserted interest: “The Government ... has never asserted a formal interest in either the
 10 subject matter of this action *or* the action itself” so the Court “will take a closer look at the
 11 nature of the Government’s interest in this dispute.” *Id.* at 1044 (emphasis added). And
 12 “the United States has a concrete interest in the judicial interpretation of the statutes and
 13 agreements” that govern CAWCD acting as operating agent of the CAP. *Ak-Chin Indian*
 14 *Community v. CAWCD*, No. CV-17-00918-PHX-DGC, 2017 WL 3190783 at *4 (D. Ariz.
 15 July 27, 2017) (slip op.).

16 Plaintiffs also suggest that the Secretary is necessary only “in cases seeking to
 17 enforce contracts” to which the Secretary is a party. Br. at 35. In making this argument,
 18 Plaintiffs ignore the language of the only case they cite: “There is no precise formula for
 19 determining whether a particular nonparty should be joined under Rule 19(a) ... The
 20 determination is heavily influenced by the facts and circumstances of each case.” *Cachil*
 21 *Dehe Band of Wintun Indians of the Colusa Indian Cmty. v. California*, 547 F.3d 962 (9th
 22 Cir. 2008)² (quoting *Bakia v. County of Los Angeles*, 687 F.2d 299, 301 (9th Cir. 1982) (per
 23 curiam)). They also ignore the explicit contractual foundation for their own complaint
 24

25 ² Plaintiffs cite *Cachil Dehe Band of Wintun Indians of Colusa Indian Cmty. v.*
 26 *California*, 536 F.3d 1034 (9th Cir. 2008), but that opinion was amended and superseded
 27 on denial of rehearing in *Cachil Dehe Band of Wintun Indians of the Colusa Indian Cmty.*
 28 *v. California*, 547 F.3d 962 (9th Cir. 2008).

1 against CAWCD, which is based solely on CAWCD having contractually assumed the
2 Secretary's duties. *See* Doc. 1 ¶ 2.

3 Plaintiffs argue further that the Secretary is not necessary because CAWCD asserts
4 authority to make power purchasing decisions without the Secretary's consent. But the
5 scope of the purchasing authority claimed by CAWCD does not change the United States'
6 interests, or the fact that the allegations here are based on the Secretary's duties under the
7 Basin Project Act. *See id.*

8 Finally, Plaintiffs argue that the United States could be joined pursuant to the waiver
9 of sovereign immunity in the Administrative Procedure Act. Br. at 36. But the complaint
10 does not plead a claim under that Act and therefore the waiver of sovereign immunity there
11 does not apply. It is not feasible to join the United States here, and equity and good
12 conscience weigh in favor of dismissal to protect the United States' sovereign immunity.
13 *See* Fed. R. Civ. P. 19(b).

14 **CONCLUSION**

15 The complaint should be dismissed.

16 RESPECTFULLY SUBMITTED this 24th day of October 2018.

17 GILA RIVER INDIAN COMMUNITY

Subject: No on 0044-19

Dear Honorable Delegates,

Does NTEC know that NGS needs water and the State of AZ controls the water? If the State of AZ pulls the water, no water to drive the steam turbine to make electricity. No water no play. Like running a truck with no radiator fluid.

Vincent H. Yazzie

are additional aquifers, and then there are coal shale layers, several hundred feet thick, lying above the water-bearing formations from which Peabody draws its water.

Highest of these water-bearing formations is the Entrada, which begins at about 2,300 feet below the ground surface. Below that are the Navajo-Kayenta-Wingate formations, with the Navajo sandstone providing by far the largest supply of water. The Navajo formation is similar to a giant saucer which lies deep beneath Black Mesa at its center and which in some places rises and outcrops on the surface in the lower lands surrounding the mesa. The town wells of Kayenta, for example, draw from the Navajo sandstone where it comes to the surface on the plain north of the mesa.

The Navajo formation is recharged by rainwater from the north. This water migrates very slowly through the sandstone, and as it travels downward toward the center of the saucer-like formation, it builds up pressure which forces the water before it out to the south. Thus, the water travels south and southwest through the entire formation, rather than gathering at the low point in the middle.

Peabody has drilled five wells into the deep aquifers, to depths of 3,535, 3,559, 3,596, 3,636 and 3,737 feet. They were put down about two miles apart. The Indian leases prohibit Peabody from drawing water at levels less than 1,000 feet from the surface, but to make sure that surface water will not be affected, Peabody has sealed the well shafts with concrete down to the 2,000-foot level.

With the pipeline operating at full capacity, 3,200 acre feet per year would be required. With the loads now anticipated over the 35-year contract period, an average of 2,400 acre feet is expected to be drawn annually from the wells.

It is estimated that there are some 10,000,000 acre feet of water in the Navajo-Kayenta-Wingate formations. Even if the slurry operation requires 100,000 acre feet over a 35-year period, that would be only 1% of the estimated water in storage. Assuming that nature will recharge these water sources in some degree, it is likely that the net withdrawal will be even less.

Peabody has taken every precaution to safeguard the local water supply of the Navajos and Hopis. Nevertheless, the company must either provide the Indians with water in quantity and quality equal to that formerly available to them or obtain water for slurry operations from another source if the Secretary of the Interior finds at any time that the local supply is endangered. A monitoring program is now being established by the U.S. Geological Survey

at the request of the Bureau of Indian Affairs, to ensure compliance with this provision in the Indian leases.

Peabody also will monitor its operations to guarantee this performance.

Peabody's wells thus far have proved beneficial to Indians living on Black Mesa. They take water free for personal use and for their stock from the company's deep wells instead of traveling to the more distant tribal wells on the mesa or to Kayenta, 35 miles away. When mining operations are completed, the five deep wells will be turned over to the tribes.

Preserving Black Mesa's History

Black Mesa was largely an archaeological mystery until Peabody's mining plans stimulated exploration of the area, beginning in 1968. Until then, the only scientific exploration had been conducted as a minor element of the 1936-37 Rainbow Bridge-Monument Valley expedition. The mesa has been considered a possible source of answers to many questions which have developed in the course of exploring the surrounding area. These questions concerned the Southwest's prehistoric period, which extends to the arrival of Spanish explorers and the beginning of recorded history in the area.

Under the terms of the Federal Antiquities Act of 1906, 10 public lands must be evaluated for their archaeological value before the surface can be disturbed. So Peabody secured the expert services of the Archaeological Survey at Arizona's Prescott College, directed by Dr. George J. Gumerman. The Survey is an integral part of the college's Center for Man and Environment and is charged with exploring the areas which are to be used and with preserving whatever data and artifacts might be discovered. The first Prescott College field survey was conducted in the summer of 1968, and there have been further surveys each year since then. Peabody has paid for the field work and for the reports which have been published as a result.

Prescott's archaeologists have reconnoitered the area by helicopter and by foot. They have located 138 sites, and 29 of them have been considered valuable enough to excavate. The ruins indicate an ancient Pueblo people lived on Black Mesa between 600 A.D. and 1200 A.D., probably a group known as the Kayenta Anasazi Indians. They apparently were farmers, living simple lives even for those times. They were found in small, scattered communities which consisted at the most of a few extended families.

The most distinctive artifacts found have been pieces of

...looking and heating
...pendants and similar jewelry also have been
...the excavations.
...the twelfth century, the Anasazi had
...Black Mesa in an apparently orderly departure.
...reasons are not yet clear, although it is possible that
...arid highland environment, with its short growing
...season, was finally regarded as too inhospitable.

The Center for Man and Environment is continuing its
work, a process called salvage archaeology. This
technique involves the salvage of all data and material of
scientific interest from an area that is to be altered by
some new activity such as mining. The support of the
company is helping to generate new knowledge from an
area that might not otherwise have been explored for many
years. And the work is being done before the prehistoric
sites on Black Mesa fall victim to the increasingly serious
archaeological hazard of vandalism.

Indian artifacts are carefully removed by
Prescott College specialists during
archaeological surveys of areas to be mined.

Peabody is scheduled to mine the land. They conduct their
reconnaissance, decide which sites merit excavation, then
excavate, photograph, measure and otherwise preserve
every detail of the site. All items of scientific value are
removed, then the land is released for mining. Along with
studies of Black Mesa's prehistoric people, the Prescott
archaeologists are examining manifestations of Navajo
life in recent centuries.

On a contemporary level, the National Science Foundation
is sponsoring a continuing study of present Navajo life on
Black Mesa which will monitor changes stimulated by the
new industrial activity there.

Parallel to its basic scientific function, the program has
developed considerable educational value as an
archaeological field school. Undergraduates have
received on-the-job training in field work which they
normally would not get until they entered graduate school.

New Environmental Advisory Council

Black Mesa is a part of the Colorado Plateau, an area rich
in resources which lies in parts of Arizona, New Mexico,
Utah and Colorado.

Orderly development of the resources of the Colorado
Plateau calls for the cooperation and good will of many
people and organizations. It is essential to have one central
place in which all of the scientific, engineering and
environmental material can be brought together and
coordinated. A forum for expressing ideas concerning the
entire area is equally important. Some guidance must also
be provided for additional studies and research projects
relevant to the proper development of the region.

The Museum of Northern Arizona, under the direction
of its Board of Trustees and director, Dr. Edward B.
Danson, has taken the initiative in creating such an
organization. It is called the Colorado Plateau
Environmental Advisory Council (CPEAC). Its
membership is open to any person interested in the
Colorado Plateau, and more specifically includes
representatives of institutions of higher education,
federal, state and local government, conservation groups,
business organizations, and those public and private
entities engaged in industrial development of the plateau.

The principals in the Navajo Project, the steam plant to be
constructed near Page, Arizona, adjacent to Lake Powell,
...studies

Peabody has also provided copies of its geologic and hydrologic studies, on which it has predicated its proposed groundwater development in Black Mesa. The company will continue to deposit relevant documentation of its operations with the museum. CPEAC will advise the public of this information bank, and will invite inspection of the documents lodged with it.

The council will hold meetings of its membership to discuss pertinent environmental subjects and to make progress reports concerning industrial developments on the Colorado Plateau. In addition, it will seek to promote educational research projects concerning the area and its environmental well-being.

Any person interested in reviewing the documents discussed here, as well as other materials made available by those concerned with the environment of the Colorado Plateau, may visit the Museum of Northern Arizona on Fort Valley Road in Flagstaff, Arizona, or write to the Museum at P.O. Box 13889, Flagstaff, Arizona 86001. The telephone number is 602-774-2433.

Conclusion

Peabody will continue to mine coal to meet the nation's fuel demands with a full understanding of the environmental constraints relating to its operations. The company believes that development of Black Mesa's resources is beneficial to the Navajo and Hopi Indians who have granted the leases, as well as to Indian and non-Indian workers who will mine the coal and operate the power plants, and to the shareholders who have made possible the large capital investment required. Black Mesa's resources ultimately will benefit millions of people in the Southwest who require a steadily increasing flow of electric power.

With the assistance of CPEAC and others, these objectives can and will be attained within an environmental framework conducive to the best interests of everybody concerned with the Colorado Plateau and its proper development.

Peabody Coal Company will welcome comments and questions concerning the Black Mesa mine or any other phase of its operations. The company is determined that the Black Mesa mine will be the finest development of its kind anywhere.

Colorado Plateau, including Black Mesa, is the focus of CPEAC, an environmental council formed in 1970.

...attractively...
...costs of only one-tenth...

...distance between mine and power...
...power plant must be adjacent to a cooling water supply and fairly close to the mine if coal is to be economical to use.

Coal is one of the major natural resources of the Navajo and Hopi Indian reservations, location of several new power plants in the Southwest makes it possible for the tribes to put these resources to work for the 120,000 Navajos and more than 5,000 Hopis who live there. The Black Mesa mine is the fourth to be leased for operation on the reservations, and it joins oil and gas production, forest products, light manufacturing plants and tourism as important elements in the economic development of the tribes. The mine is the first major source of industrial jobs in the western part of the reservations.

Economic Benefits

Distinct economic benefits flow to the Hopi and Navajo tribes generally through the royalty terms of the leases negotiated with the two tribal councils between 1962 and 1966. Peabody met with local councilmen and residents as well as top tribal officials while working out the agreements. They will bring total payments as high as \$250,000 a year to the two tribes.

The lease, signed February 1, 1964, with the Navajo Tribal Council covers mineral rights, except for oil and gas, on 24,858 acres within the Navajo Reservation. It calls for Peabody to pay the tribe 25 cents a ton — a higher royalty than had ever been negotiated for coal developed on Indian or public lands — for coal used on the reservation and 20 cents a ton for coal used on the reservation. If the price of coal should rise above \$4 a ton, the lease provides for increasing the royalties.

Provisions for royalties on uranium and any other minerals Peabody might develop.

The 19,000 acres were signed in 1962 by the Navajo and Hopi councils. These leases have been historically as the Executive Order 11644. This area, which was long disputed by the Navajo and Hopi councils now have designated the area as a reservation. The leases have been signed

...payments on a scale similar to the earlier Navajo...
...Peabody will pay the tribes \$6.67 for each acre foot

...leased are substantially...
...years...
...combined approximately...
The annual flow of royalties depends on the output of the two power plants. The Mohave plant is scheduled to start operation in 1976, the Navajo plant is scheduled to start operation in 1977. The Mohave plant is expected to produce an annual rate of 5,000,000 tons, and the Navajo plant is scheduled to use 8,000,000 tons a year. If both plants draw the anticipated total of 13,000,000 tons from the area, paying 25 cent royalty, the two tribes will receive \$3,250,000 a year during that period. Royalties will be lower at times when the two power plants are not operating at peak capacity, but the payments will average \$3,000,000 annually through the anticipated 35-year operating lives of the plants if the plants average 85% of their operating capacity. This will total approximately \$100,000,000.

All three leases were negotiated and executed by the respective tribal councils and received the approval of officials of the U.S. Department of the Interior.

Along with revenues to the Indians, Black Mesa mining operations also will be a source of tax income to the State of Arizona, the county and any special tax districts associated with the area.

Revenues from royalties and other payments go directly to the tribal councils and benefit all members of both tribes. But Peabody's operations on Black Mesa increasingly will bring economic benefits directly to individual Indians as well. The company favors and is committed to hiring qualified Navajos and Hopis and to using Indian contractors whenever it can. Indian employees will receive prevailing industry wages and benefits, and the company has pledged to make a special effort to move them up into skilled technical and other higher-level positions. Indian employment has averaged about 75% of the total work force as Peabody has built up to the 150-man crew required to supply coal to the Mohave plant. When the mines for both plants are in full operation, the work force will increase to 375, with about 80% scheduled to be Indians. Right now, new men are learning on the job, but special courses might be established later to prepare Indian employees for the various skilled jobs required in surface mining operations.

The Indians employed at the mine earn about \$10,000

income of just over \$3,000, and they also enjoy medical, dental and other normal Peabody employee benefits. With 300 Indians at work, the Peabody payroll will contribute about \$3,000,000 annually to the reservation economies. Applying standard economic projections, this amount will be increased by perhaps another \$8,000,000 in income to those providing goods and services to the Peabody wage earners.

The work crew at the Black Mesa pipeline facility is expected to total 33 when the pipeline is in full operation. About two-thirds are expected to be Indians.

Exploration is continuing. If new deposits are found, new leases may be negotiated which undoubtedly would contain benefits to the parties involved similar to those in present leases, as well as appropriate provisions for protecting the Indian tribes in the development of their resources.

Mining Operations

Coal on Black Mesa is close enough to the surface to be removed through surface or strip mining methods, which permit 100% recovery of the mineral. At some points the coal seams reach the surface, but in most areas they are covered by shale and rock up to 120 feet deep.

The coal coming from these deposits is a bituminous variety which is superior to most types of western coal. It is rated at 11,000 BTU per pound; has an ash content of 8% and sulfur content of 0.5%. This means that compared with other western coals, it will produce more heat per pound while generating considerably less fly ash and sulfur dioxide. Although some eastern and midwestern coals have higher BTU ratings, their sulfur content may range above 1%.

The coal seams vary from four feet to 30 feet thick. To reach them, the overlying rock and shale, known as overburden, is stripped away by dragline equipment. The coal is mined and loaded by power shovels into an conveyor trucks which can haul 120 tons at a time. These trucks haulers will carry coal from the open-pit mine to the processing center.

The system consists of a truck receiving hopper, conveyor and a rotary breaker which will break the coal into one-inch size and remove rock and shale. The system also includes a conveyor which will carry the coal to a storage pile.

stockpile site. A 90 by 210 foot building houses offices, maintenance shop, garage and other facilities.

Adjacent to the processing center, Black Mesa Coal Company has built a plant to grind coal and mix it with coal slurry which is transported to the Mohave plant. An airstrip has been constructed near the processing center.

Power lines have been built to bring in electricity for the processing center and the mining operations, where the power shovels and draglines are to be electrically powered. Small plots have been leveled to accommodate transformers, switch houses and oil circuit breakers. This equipment will be moved as mining progresses.

The mining operation will be duplicated when a second area is established to supply the Navajo station with coal by unit train. The company has identified 42 separate coal deposits, and mining operations will move to a new deposit as each active deposit is finally depleted.

These deposits lie under a total of nearly 14,000 acres within the 64,858-acre lease area. The coal areas, scattered throughout the lease territory, are the only sections where the surface will be affected. This means that an average of about 400 acres will be mined in any one year. The deposit now being mined for the Mohave plant, for example, covers 525 acres and contains about 24,500,000 tons of coal. It will take five years to mine this deposit.

Of the 78 Navajo families living within the leased area, 53 have their homes on coal deposits. Provisions have been made by the tribal council to relocate these families gradually over the 35-year period. Many live in the traditional Navajo hogans, although there also are a few modern structures on Black Mesa. In either case, the families are to be compensated by Peabody for the improvements they have made on their homesites, and they will be assisted in moving elsewhere on the mesa. The company has agreed to prepare the land at the new homesites. So far, only one family has relocated.

Compensation to the relocated Navajo families is guaranteed by the tribe. Peabody has agreed to reimburse the tribe for all awards made to individual Indians.

The tribes have retained surface rights in the entire area. They can put the land to other uses, and the industrial development which can be done is only to have significant impact on the environment.

Introduction

Coal mining on a major scale brings many changes to Black Mesa. It means increased activity on a highland traditionally used for raising livestock and develops an important part of the natural resources of the Navajo and Hopi tribes, making a contribution to their efforts to advance their economies. Black Mesa coal will have a large role in helping meet the rapidly rising power needs of Arizona and neighboring states. And growing out of this mining activity, archaeological research is beginning to put together the first picture of prehistoric life on the mesa.

It is clear that coal cannot be mined without some impact on the land and life of Black Mesa. This impact can be kept to a minimum and mined land can be returned to traditional uses in a condition similar to its natural state. Through careful grading and planting, it is even possible to make the land more useful than it was originally. Mining operations will not disturb the water supplies now used on the mesa, which are close to the surface. Water for coal transportation will be drawn from separate sources far below the mesa, but these deep reserves will not be significantly reduced. The following pages contain a full discussion of these and other matters.

Black Mesa, its inhabitants and its environment are comprehensively protected by the terms of leases between Peabody and the Hopi and Navajo tribes, as well as the laws of the tribes and the United States. Peabody Coal Company intends not only to meet these requirements, but to do all the things which good will and common sense indicate are best for everybody living and working on Black Mesa.

Mining on Black Mesa

Black Mesa is a massive highland in northeast Arizona which rises gently northeast from the Little Colorado River to a peak altitude of 8,110 feet at its northern rim. There, it drops abruptly to the surrounding plain along an uneven wall as high as 2,000 feet. Most of the 2-million-acre mesa is rolling country covered with sagebrush and grass, with piñon and juniper growing along the slopes and ridges. Wildlife is largely limited to rabbits, lizards and snakes. Near the north rim, the highland is broken by canyons which form the beginnings of washes draining to the southwest. The piñon and juniper are denser in the canyons, and they are joined by stands of pine and fir, giving the mesa the dark appearance which leads to its name.

Black Mesa lies on both the Navajo and the Hopi Indian reservations, as well as on land reserved for the joint use of the two tribes. Navajo families graze sheep, goats and cattle on the northern part of the mesa, while Hopis farm the land some 60 miles to the south of the mine.

Just south of the northern rim, Peabody Coal Company has opened a surface mine which began supplying coal in 1970 to the new Mohave electric power plant in southern Nevada. The mine later will be expanded to produce coal for a second power plant, now under construction on the Navajo Reservation at Page, Arizona. Although Indians have mined coal commercially on the mesa, the new Peabody installation represents the first major industrial activity there.

The company is operating under leases with the Navajo and Hopi tribes which award mineral rights on 64,858 acres. There is coal under approximately 14,000 acres, about seven tenths of one percent of Black Mesa, and the tribes have granted Peabody rights to sufficient use of the surface to remove it. The company expects to be mining an average of 400 acres of land in the course of each year of operation. Contracts to supply the power plants run for 35 years.

The leases, in addition to specifying royalties for each tribe, require Peabody to operate in a safe and workmanlike manner and avoid waste on the land. The mined areas must be returned to a condition compatible with the surrounding mesa. All users of Black Mesa water supplies are completely protected. The company will hire as many Navajo and Hopi Indians as it can, pay them prevailing mining wages and work them into higher-level jobs.

The Black Mesa mine has been launched by a firm with

Corporation in 1968. In addition to Black Mesa, the company operates coal mines in Alabama, Arkansas, Colorado, Illinois, Indiana, Kentucky, Missouri, Montana, Ohio and Oklahoma, as well as in Australia.

Peabody has become the nation's largest coal producer by following a course of innovation in mining, transportation and marketing. The company has pioneered the long-term contracting of coal supplies for electric utilities, a market that today dominates industry sales. Advanced concepts in transportation are reflected in the underground pipeline which will ship coal 275 miles from Black Mesa to the Mohave plant. Peabody also has pioneered in land reclamation, and its Operation Green Earth provides for restoration of all 6,000 acres the company surface mines annually.

The Mohave plant is a 1,500-megawatt installation located in Nevada, near the state's southern tip. It is jointly owned by the Southern California Edison Company, the Los Angeles Department of Water and Power, the Nevada Power Company and the Salt River Project Agricultural Improvement and Power District. Each of the owners will transmit a share of the Mohave power to customers in its service area.

The Navajo Generating Station near Page, Arizona, is being built under a similar arrangement. In this case, the joint owners are the U. S. Bureau of Reclamation, Salt River Project, Los Angeles Department of Water and Power, Arizona Public Service Company, Nevada Power Company and Tucson Gas & Electric Company. Three 770-megawatt units will be installed, to begin operating in 1974, 1975 and 1976.

The two plants produce enough power to meet the normal needs of a city of 3,750,000 people.

Why Coal for Western Power

Large-scale coal mining and the construction of power plants in isolated areas of the West are encouraged by the constantly rising demand for electricity, which has been doubling every 10 years. When participants studied their power needs in the Southwest before launching the Navajo Generating Station project, they discovered they would be short of electricity even with the 2,310 megawatts projected for the Navajo project. Total load with 15% reserves anticipated for 1973 was 10,569 megawatts, while resources were estimated at 10,133 megawatts. For 1976, the requirements were projected as 13,089 megawatts and resources at 10,615 megawatts. The gap between the two was 2,474 megawatts.

The older residents take the right-of-way on Black Mesa.

Navajo and Hopi tribes get \$3½ million in royalties

Many of the Navajos don't understand some of their instructions, so they wing it. Many of those interviewed in the Black Mesa area gave answers that indicated they didn't really understand the question. Some gave no answers at all. Others discussed questions with another Navajo in their native tongue before answering.

Most of the stories in national magazines quoted older, more traditional Navajos as being against the strip mine. The April 16, 1971 issue of Life, for example, offered the following: "Buck Austin, a 64-year-old Navajo who has always lived on the windy crest of Black Mesa, paused in the building of a new hogan to tell me through a translator that Navajo Mountain, an important tribal shrine that had been visible 50 miles to the north as long as he could remember, had simply vanished in the filthy air."

Just as the film in the air on Black Mesa is gone and on some days, at least, it doesn't ob-
scure the view of Navajo Mountain. Even some
of the younger Navajos are concerned about the
loss of the mountain's sacredness.

The Navajo and Hopi tribes have received \$3½ million in royalties from the sale of uranium ore on Black Mesa. The money is being used to develop a health center and a school. The tribes are also planning to build a new hogan on Black Mesa. The hogan is a traditional Navajo dwelling. It is a circular structure made of brush and mud. The hogan is used for religious and social purposes. The Navajo and Hopi tribes are proud of their hogan. They consider it a sacred place. The hogan is a symbol of their culture. The Navajo and Hopi tribes are determined to preserve their hogan. They are planning to build a new hogan on Black Mesa. The hogan is a traditional Navajo dwelling. ...people have the usual gripes about too much drinking
and not enough law enforcement.

A lot of them work three or four months and quit'

has developed at the junction of the highway and
the road leading up the mesa to the mines. He
said there is no bank for the Navajos to deposit
checks, so they get cash and spend it.

"They want a bank, but even though it's been
talked about for two and a half years, nothing's
been done," he said.

There also is a housing problem. There's no
private ownership of land on the reservation, and
he said the Navajo tribal chapter won't
allow business to build homes on the mesa.

He said, "A lot of them work
three or four months and quit. They
have no money to save, so they can't
buy anything because they're
out of money."

The stores at the mesa are closed because
they are out of cash, and that, many spend
their money on liquor. The older people have
no money to spend for much drinking and not
enough to live on. He said, "but they
are the fact in the employ people. These
people are out of money."

The view to the Grand Canyon from a 1920s bus.

nearby Copper, is the world's largest coal mining firm. Public relations brochures and brochures were designed to persuade the public Peabody had no intention of mining the Navajo land, but was bringing prosperity to the tribe. Photographs of Peabody's past success in reclamation, mined land and showing it with more desirable vegetation than exists before their shovels came.

Black Mesa is a two million-acre area of juniper, piñon and scrub 250 miles northwest of Phoenix. The sparse grass has for centuries provided grazing for Navajo sheep, horses and cattle. Part of the mesa is Navajo and the rest is public land. The Navajo learn the hard way unless south of the Peabody mine. The company has leases on 64,500 acres on the mesa's northern edge.

From the air, the strip mining operation first appeared from fifty miles away as smoke rising. The coal companies' replies to mail and letters underground when it has been forward. The original Black Mesa mine has a mine, the Kayenta mine, a few miles away from the strip mine.

Striping, which were very mining the public land of coal at earth, cannot be coal mines.

Black Mesa mountains on Black Mesa landscape.

loaded as slurry 275 miles to the Mohave power plant in the southern tip of Nevada, or loaded onto the conveyor that sends it down the wall of the mesa to be railroaded eighty miles to the new Navajo power plant in Page.

The Navajos and Hopis in the area don't fly above the mesa, but see it from below where the smoke and dust and new mountains aren't visible. They walk, drive pickup trucks or ride horses and when the coal train comes along they look up for a moment. At Cow Springs, beside the highway from Tuba City to Kayenta, only one Navajo had a bad opinion of the mine. He said he lives only eight miles from it, on the mesa. "I think the young will not live to be old anymore," Silas Glaw said. He was loading water into a fifty gallon drum. "There is coal dust in the air and the wind will bring bad air from Page, now." He said he has herded sheep and cattle all his life and is now afraid others will move Peabody onto the reservation.

Inside the trading post, owner Tom Hoyt, an Anglo, said most of the local Navajos don't say anything about the mine. "They don't like it or dislike it," he said. "The only time we have any trouble is when somebody from outside comes in because these people don't care whether that strip mine is there or not. The only trouble I've had is my telephone hasn't worked right since they changed the lines on that electric line out there."

For a comparatively few people there's more to it than that. They are the people who live on the mesa and see things which can't be translated into their native tongue. King Mike, a Navajo

Figure 1 displays a sequence of 16 grayscale images arranged in a 4x4 grid, illustrating the process of super-resolution and denoising. The images show a progression from a low-resolution, blurry input face (top-left) to a high-resolution, sharp output face (bottom-right). The sequence includes intermediate steps of super-resolution and denoising, demonstrating the effectiveness of the proposed method in enhancing image quality.

ONE FUTURE

Safety Through Teamwork

Safety Performance Achievements

Accident incidence rate measures the number of reportable injuries per 200,000 employee hours worked.

This index measures compliance efforts by the number of citations per MSHA inspection day.

These charts are a constant reminder that safety is our top priority.

1. U.S. Coal Industry	14.56	14.56
2. West Virginia	13.56	13.56
3. Powder River Coal	12.56	12.56
4. Pittston	11.56	11.56
5. Cyprus	10.56	10.56
6. Mingo	9.56	9.56
7. Sun Coal	8.56	8.56
8. Exton	7.56	7.56
9. Massey	6.56	6.56
10. Island Creek	5.56	5.56
11. Zeigler	4.56	4.56
12. Peabody Group	3.56	3.56
13. USX	2.56	2.56
14. Costain	1.56	1.56
15. Eastern Associated	0.56	0.56
16. Peabody Coal Company	0.19	0.19

This shows how Peabody Group's operating companies rank in safety against other top coal producers in terms of accident incidence rate. It also shows how Peabody Group as a whole stacks up against competitors.

The bottom line message: Safety is our top priority.

to everyone who has watched the film, they know they have seen a great work of art and a great work of science.

Comment on legislation 0044-19

Robyn Jackson <chooshgai.bitsi@gmail.com>

Tue 3/12/2019 5:35 PM

To: Rickie Nez <rickienez@navajo-nsn.gov>; comments <comments@navajo-nsn.gov>;

Honorable Council Delegate Rickie Nez,

Concerning Legislation 0044-19:

I respectfully request that you withdraw this legislation.

Why do you want to invest in a coal plant and mine in this day and age when making electricity from coal is no longer profitable?

Although it is commendable that this legislation does not take on SRP's liabilities, the rest of this legislation supports NTEC purchasing NGS and Kayenta Mine. NTEC is a tribal enterprise, which means ultimately it is under the Navajo Nation. Should NTEC acquire NGS and Kayenta Mine, the Navajo Nation will ultimately be responsible for these facilities and operations.

How can the council proceed in supporting a purchase by a tribal enterprise (NTEC) that has not fully informed the council of how it can profitably run, when this matter will have huge financial, legal, and environmental consequences for the entire Navajo Nation?

If you really want to help out the remaining plant workers, miners, and Navajo Nation budget, the best effort you could make is to support and develop a transition plan for renewable and sustainable forms of economic development that our communities can actually benefit from.

Sincerely,
Robyn Jackson
Wheatfields, AZ

To: Elmer P. Begay <elmerbegay@navajo-nsn.gov>; comments <comments@navajo-nsn.gov>;

Honorable Council Delegate Elmer Begay,

Concerning Legislation 0044-19:

I respectfully request that you vote down this legislation.

The Navajo Nation Council and public has not received detailed and evidence-based data from the Navajo Transitional Energy Company on how they could successfully and profitably operate NGS.

Why has the council not demanded full disclosure and information from NTEC?

How can the council proceed in supporting a tribal enterprise (NTEC) that has not fully informed the council, when this matter will have huge financial, legal, and environmental consequences for the entire Navajo Nation?

SRP has stated that it cannot continue to operate NGS profitably because it is more economical and profitable to operate using natural gas, solar or wind energy. Around the country and world, utility companies like SRP are closing their coal plants. In cases where coal plants still exist, the owners have laid off employees, they have taken money out of retiree benefits, and/or the plants are shut down in a few years anyway.

None of these options will help the Navajo Nation with its budget shortfall. Investing in a coal plant will only bring continued debt to the Navajo Nation. It is your responsibility to ensure the success and economic viability of our community, which is why I voted you in.

If you really want to help the plant workers, miners, and Navajo Nation budget. The best effort you could make is to support and develop a transition plan for renewable and sustainable forms of economic development.

Public Comment on Legislation 0044-19

Robyn Jackson <chooshgai.bitsi@gmail.com>

Tue 3/12/2019 5:58 PM

to Herman Daniels, Jr. <hdaniels@navajo-nsn.gov>; comments <comments@navajo-nsn.gov>,

Honorable Council Delegate Herman Daniels,

Concerning Legislation 0044-19:

I respectfully request that you vote down this legislation.

Why do you want to invest in a coal plant and mine in this day and age when making electricity from coal is no longer profitable?

Although it is commendable that this legislation does not take on SRP's liabilities, the rest of this legislation supports NTEC purchasing NGS and Kayenta Mine. NTEC is a tribal enterprise, which means ultimately it is under the Navajo Nation. Should NTEC acquire NGS and Kayenta Mine, the Navajo Nation will ultimately be responsible for these facilities and operations.

How can the council proceed in supporting a purchase by a tribal enterprise (NTEC) that has not fully informed the council of how it can profitably run, when this matter will have huge financial, legal, and environmental consequences for the entire Navajo Nation?

If you really want to help out the remaining plant workers, miners, and Navajo Nation budget, the best effort you could make is to support and develop a transition plan for renewable and sustainable forms of economic development that our communities can actually benefit from.

Sincerely,
Robyn Jackson

Legislation 0044-19

Adella Begaye <alleda.kay@gmail.com>

Tue 3/12/2019 7:13 PM

to: comments <comments@navajo-nsn.gov>;

I am respectfully requesting legislation 0044-19 be voted down. Following are just a few reasons for voting this down:

NTEC purchasing NGS and Kayenta Mine will put the Navajo Nation in a bind and bankruptcy. Even though NTEC is claiming they are profitable, they have yet to disclose full financial records to the Navajo Nation Council and the Public.

The Public and Navajo Nation Council have not seen NTEC's full due diligence report for the proposal to buy NGS. NTEC has yet to show full compliance with the NEPA standards, such as providing scoping meeting for the communities. The resolution that NTEC is presenting at the chapters as a process to satisfy a NEPA process as informing the communities is lacking all the required information.

Power Plants and coal as a source of energy to sell to the outside states or countries is no longer an option. The corporations buy energy that is cheaper.

Everyone is moving towards clean/renewable energy, because it is less hazardous and cheaper.

We encourage Navajo Nation council to begin making plans for transition to renewable energy. It is time to move forward for the betterment of all our Dine' citizens.

Thank you

Adella Begaye

Wheatfields Chapter.

Honorable Members of the 24th Navajo Nation Council Delegates

Concerning Legislation 0044-19:

I urge you to vote against this legislation. I believe it is a very simple decision to make if you ask yourself "What do I value most - Life or Money?"

We have heard heartfelt cries and pleas from the grassroots people whom are living daily with breathing in this dirty air that has been forced upon them for 50 years. It is time to help them with much cleaner air (renewables) they have never experienced. We are losing precious lives that are now only painful memories because of the coal plant and mines. I strongly believe the NTEC/NGS/SRP and any Company associated with coal plants and mines should be made liable and compensate families for the loss of all their loved ones.

SRP and those Companies who have contemplated their take-over and backed down are smart to let NGS decommission because they are the experts. They know it is no longer profitable to them. Yes, it is said the plant has about 10 viable years maybe less. You will once again be faced with these same town halls that is causing division among families even for those living under the same roof. If you are wise, hopefully you would have allowed the current employees be retrained or relocated as is their option offered to them by SRP. I hope all of you, our leaders have honesty and integrity and not have accepted any under-the-table monies.

We as Dine' are taught that "Life is Precious" and it can never be replaced, it can never be seen again once it is gone.

I respectfully request that you stand with the grassroots people and say NO to NGS!!!

Sincerely,
Linda Curley

Duane Chili Yazzie <chili_yazzie@hotmail.com>

Tue 3/12/2019 11:01 PM

To: comments <comments@navajo-nsn.gov>;

I stand in opposition to proposed legislation 0044-19 due to the following reasons;

1. The owners of NGS have determined the NGS shutdown is only viable option for them since coal is a dying industry and is no longer economically feasible and as such the Navajo Generating Station (NGS) is scheduled to shut down operations in December of 2019 along with its feeder mine, the Kayenta Mine, and
2. All previous buyers of power from the NGS have cancelled all purchase of power and are opting for a more economical source of power. NGS has no more customers, and
3. The Navajo Transitional Energy Company (NTEC) has been exploring the possibility of purchasing the NGS and the Kayenta Mine and NTEC has not found any new customers for NGS if the power plant were to continue, and
4. NTEC has not found any new partners for the proposed purchase of NGS and the Kayenta Mine is relying on the Navajo Nation to provide the funds necessary to make the proposed purchase, and
5. NTEC will be forced to accept the burden and responsibility of paying for all remediation and land restoration costs, Peabody Coal Company does not want to be liable for these costs, when they need to be held responsible, and
6. The tremendous amounts of pristine water depleted from the Navajo Aquifer can never be replaced and what water remains must be kept for our future generations, and
7. This massive cost to assume these responsibilities will require money which NTEC does not have and is relying on the Navajo Nation to guarantee. The Navajo Nation Council Budget and Finance Committee Chairman has stated that "this could involve ALL Navajo Nation assets as well as the Permanent Trust Fund", and
8. The guarantee by the Navajo Nation of this proposed venture by NTEC will force the "pawning" of these Navajo financial assets and jeopardize the financial future of our grandchildren, and
9. The trends of energy development in the United States and the world is moving away from coal burning energy and transitioning to renewable energy and the Navajo Nation must do the same.

I strongly advise the members of the Navajo Nation Council to vote in opposition of legislation 0044-19.

Cc: Jefferson Begay <rezbldr@gmail.com>; Jt Willie <jt.willie@yahoo.com>;

Good morning Honorable Council Delegates, I respectfully request you to vote "No" on this Legislation 0044-19 Supporting NTEC acquiring NGS & Kayenta Mine.

There has been enough monies that have been spent so far that points in the direction of "No" to coal-fired power plants because it is not profitable. Money saved can be used to support the young generation educational scholarship needs where the demand is very high semester after semester.

It is my belief that one of the greatest decision the 24th NNC can make is to establish a more highly respected national tribal leaders by joining the worldwide movement where countries are or will decommission coal-fired power plants. The worldwide movement in this direction is in response to the climate change.

In the U.S. it is also the case where major energy companies have scheduled decommissioning of coal-fired power plants. See the list below to guide your thinking and decision. In this case, it is competition from natural gas that is the reason why energy companies and their owners have made such a decision. In its place they are moving their money toward investment in renewable energy.

Table 1. 10 largest companies by coal capacity (MW) with announced retirements 2016 to 2020.

Dear Sir,

Attached are Navajo Transitional Energy Company's (NTEC) support documentation for Legislation No: _0044-19, Navajo Generating Station and Kayenta Mine.

NTEC feels these supporting documents, such as the resolutions, petitions, and support letters are needed to show how much support the Navajo communities and people have provided towards the acquisition of NGS and Kayenta by NTEC.

If you have any questions, please contact our office

Sincerely,

Navajo Transitional Energy Company

As the President of the Navajo Nation and Speaker of the Navajo Nation Council, we write this important letter to inform you that we remain committed to keeping the Navajo Generating Station ("NGS") operating beyond 2019. We take this position because of the great impact to the Navajo Nation including the Navajo families currently employed at the NGS and Kayenta Mine.

With that, we have directed the Navajo Transitional Energy Company ("NTEC") to immediately start negotiations to acquire all assets associated with NGS. In addition, NTEC is directed to start immediate negotiations with Peabody Energy. NTEC is also authorized to begin discussions with owners of the transmission and switchyard assets, this will allow for NTEC to sell power into the open market. NTEC will also take the lead role in analyzing the local energy market, potential PPA's and merchant sales.

Therefore, we ask for your attention to this important task. NTEC has our full support in bringing these negotiations to the Navajo Nation Council and the President's Office for final action.

Sincerely,

RE: Support for the Navajo Nation and NGS

Dear President Nez,

I believe you are aware of my long-standing commitment to the Navajo Nation and your right of self-determination. I suspect that you have also been made aware of the work I have done to protect a prime economic development driver in your portfolio, namely the Navajo Generating Station and the Kayenta Mine, for the last 4-years.

As Chairman of the Federal Relation Committee I chose to sponsor and hear a House Concurrent Memorial (HCM-2001) on Wednesday February 20th, 2019. The HCM adopted much of the content of Naabik 'Iyáti' Committee of the Navajo Nation Council. This action was taken to demonstrate the on-going commitment to support you and your nation from the Arizona Legislature, and your desire to maintain the income revenue necessary to provide essential services to Dine'. It is not lost on me that this helps to demonstrate to the Federal government, and more specifically to President Trump's energy advisors, that the Legislature is indeed supporting the Navajo Nation in their bid to acquire NGS.

What is astonishing to me is that every Democrat member of the Federal Relations Committee voted against the bill, while every Republican voted to support the bill. I am including a representation of the Committee vote count for your inspection. If you would like to watch what happened in the hearing, the link is included below. It can also be found at the AZLEG.GOV web site by clicking the Federal Relations Agenda for 20 February 2019.

http://azleg.granicus.com/MediaPlayer.php?view_id=13&clip_id=22148

Mr. President, I am doing what I can to support you, but it appears that Democrats are doing everything they can to undercut your position. I would like to ask that you call on them to demand support for the Navajo Nation and this important project. I would be pleased to meet with you at your earliest convenience to extend my personal support for the success of N-TEC regarding the acquisition venture that they are engaged in. I am willing to fight for you, I need your help as well.

Kindest Regards,

A handwritten signature in black ink, appearing to read "Mark Finchem", written over a horizontal line.

Rep. Mark Finchem

CC: Speaker Seth Damon
Bernard Masters, NTEC

PROPOSED

HOUSE OF REPRESENTATIVES AMENDMENTS TO H.C.R. 2001

(Reference to printed resolution)

1 Page 1, strike lines 1 through 21, insert:

2 "Whereas, the Navajo Generating Station (NGS), located on tribal
3 trust lands leased from the Navajo Nation, provides reliable and
4 cost-effective electricity to customers in Arizona and Nevada by operating
5 a 2,250 megawatt power station burning low sulfur bituminous coal from the
6 Peabody Western Coal Company's Kayenta Mine, both of which employ hundreds
7 of workers and contribute millions of dollars to the economy on an annual
8 basis; and

9 Whereas, the NGS is a significant source of employment and revenue
10 for members of the Navajo Nation and, through the Kayenta coal mine that
11 supplies coal for the NGS, for members of the Hopi Tribe as well. Coal
12 mining operations also contribute \$92 million each year in wages, benefits,
13 royalties, business transactions and scholarships; and

14 Whereas, in February 2017, the current owners of the NGS abruptly
15 announced that they would not operate the NGS past December 2019; and

16 Whereas, in June 2017, the Navajo Nation Council approved an
17 extension lease between the Navajo Nation and Salt River Project, Arizona
18 Public Service Company, Tucson Electric Power and NV Energy, which allows
19 NGS operations through December 2019 and decommissioning of the NGS and
20 remediation of the NGS site thereafter; and

21 Whereas, given the negative consequences to this state, the Navajo
22 Nation and Hopi Tribe and local governments of the cessation of the NGS and
23 Kayenta mining operations, the Navajo Nation began an extensive search for
24 a potential new owner for the NGS. The Naabik'iyáti' Committee of the

1 Navajo Nation Council also issued an official resolution that passed
2 overwhelmingly on December 27, 2018, supporting the ongoing effort to find
3 a new owner for the NGS; and

4 Whereas, all men have a right to self-determination and a right to
5 work to their collective good with the blessings bestowed on them by the
6 grace of God; and

7 Whereas, the Legislature has a longstanding history of collaboration
8 and cooperation on matters that promote the enhanced quality of life of the
9 citizens of the State of Arizona and the United States; and

10 Whereas, there remains a question of law regarding the authority of
11 operators to decommission the NGS before the congressionally mandated
12 decommissioning date of December 22, 2044; and

13 Whereas, premature termination of the NGS would have a devastating
14 effect on the local economy, including lost tax revenue to the Arizona
15 budget and both a direct and indirect economic impact of billions of
16 dollars, as reported by the Arizona State University W.P. Carey School of
17 Business.

18 Therefore"

19 Page 1, strike everything after the resolving clause and insert:

20 "That the Members of the Legislature fervently support the
21 continuation of the Navajo Generating Station and the Navajo Nation's
22 ongoing endeavors in negotiating a new acquisition and extension deal, in
23 furtherance of their right to self-determination."

24 Amend title to conform

RESOLUTION OF THE
NAABIK'ÍYÁTI' STANDING COMMITTEE OF THE
23rd NAVAJO NATION COUNCIL -- Fourth Year, 2018
AN ACTION

RELATING TO THE NAABIK'ÍYÁTI' COMMITTEE; STATEMENT OF POLICY
REGARDING CONTINUED OPERATIONS OF THE NAVAJO GENERATING STATION
AND KAYENTA MINE

WHEREAS:

- A. The Navajo Nation established the Naabik'iyáti' Committee as a Navajo Nation Council standing committee and, as such, empowered Naabik'iyáti' Committee to coordinate with all committees, Chapters, branches and entities concerned with all Navajo appearances and testimony before Congressional committees, and departments of the United States government. See 2 N.N.C. §§ 164 (A)(9), 700 (A), 701 (A)(8).
- B. The Navajo Generating Station (NGS), located in LeChee Chapter, provides electricity to customers in Arizona and Nevada by operating a 2,250 megawatt power station burning low sulfur bituminous coal from the Peabody Western Coal Company's Kayenta Mine, both of which employ hundreds of Navajo workers and contribute millions of dollars to the Navajo Nation government on an annual basis.
- C. In February 2017, the current owners of NGS abruptly announced that they would not operate NGS past December 2019.
- D. In June 2017, the 23rd Navajo Nation Council approved a lease between the Navajo Nation and Salt River Project Agricultural Improvement and Power District, Arizona Public Service Company, Tucson Electric Power Company, Nevada Power Company d/b/a NV Energy, and Department of Water and Power of City of Los Angeles (the "NGS owners"), which would allow NGS operations through December 2019 and decommissioning of NGS and remediation of the NGS site post-2019 ("Extension Lease"). The Extension Lease was executed by the Nation and the NGS owners, and was approved by the Secretary of the Interior on November 29, 2017.
- E. Given the large negative economic impacts the Navajo Nation would experience if NGS and the Kayenta Mine were to shut

down next year, the Nation immediately began a search for a potential new owner for NGS. After negotiations with a potential new owner fell through this past fall, the Navajo Nation leadership requested that the Navajo Transitional Energy Company, LLC ("NTEC") step in and try to negotiate a deal for the acquisition of NGS and the Kayenta Mine. This would allow operations beyond December 2019 and preserve crucial Navajo jobs and revenue to the Navajo Nation government.

- F. The Naabik'iyáti' Committee realizes understands that NTEC's discussions with key NGS stakeholders are ongoing, including discussions with the Navajo Nation government, the NGS owners and the United States. The Committee also realizes that a great deal of work must be done, including NTEC's due diligence efforts related to NGS and the Kayenta Mine and the necessary environmental reviews. The Naabik'iyáti' Committee also understands and respects that it will be the decision of the 24th Navajo Nation Council to approve or not approve any agreements resulting from NTEC's acquisition of NGS and the Kayenta Mine and will make a thoughtful decision on the matter.
- G. Given the importance of this issue to the Navajo Nation, and given the fact that it was this 23rd Navajo Nation Council that approved the Extension Lease, the Naabik'iyáti' Committee feels compelled to issue this Statement of Policy in support of NTEC's efforts.

NOW, THEREFORE, BE IT RESOLVED:

The Naabik'iyáti' Committee of the 23rd Navajo Nation Council fully supports NTEC's ongoing efforts in exploring the possibility of NTEC acquiring NGS and the Kayenta Mine and negotiating such a deal, subject to the finalizing of the necessary agreements, including those agreements that need to be approved by the Navajo Nation and the 24th Navajo Nation Council.

CERTIFICATION

I, hereby, certify that the foregoing resolution was duly considered by the Naabik'iyáti' Committee of the 23rd Navajo Nation Council at a duly called meeting in Window Rock, Navajo Nation (Arizona), at which a quorum was present and that the same was passed by a vote of 09 in Favor, and 00 Opposed, on this 27th day of December 2018.

Jonathan Perry, Chairman Pro Tem
Naabik'iyáti' Committee

Timothy Nuvangyaoma
CHAIRMAN

Clark W. Tenakhongva
VICE-CHAIRMAN

February 11, 2019

Assistant Secretary Dr. Timothy R. Petty
US Department of Interior
1849 C Street, NW
Washington, DC 20240

Assistant Secretary Petty:

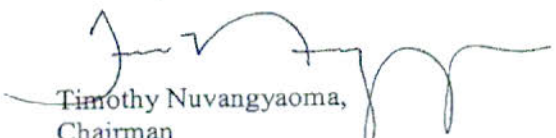

The Hopi Tribe is concerned over the fate of the Navajo Generating Station and Kayenta Mine. The closure of the mine and power plant would have a devastating impact on the Hopi Tribe and our Hopi-Tewa people. Decades ago, the federal government, the State of Arizona and the non-government owners of the Navajo Generating Station made a commitment to the Hopi Tribe to provide financial support through use of mining Hopi coal.

The closure will significantly impact the Hopi Tribe. Economic studies show a negative effect of over \$2 Billion in Northern Arizona from the closure of the power plant and mine. The financial revenue provides living wage jobs to hundreds of Hopi-Tewa people. Royalties received provide 85% of the Tribe's general revenue. Closure will cause significant reductions to the Hopi tribal budget and ability to provide critical services to our people.

Navajo Transitional Energy Company ("NTEC"), a proven coal mine operator and energy marketer in Southwest energy markets, has come forward to acquire the mine and power plant.

The Hopi Tribe supports the acquisition of the Navajo Generating Station by NTEC, to sustain the Hopi Tribe's economic stability and the preservation of jobs.

Sincerely,

Timothy Nuvangyaoma,
Chairman
The Hopi Tribe

cc: Navajo Nation President Jonathan Nez
Navajo Nation Speaker Seth Damon

Chapter Resolution

RESOLUTION NO. KY19-403-02

THE KAYENTA CHAPTER SUPPORTS THE NAVAJO TRANSITIONAL ENERGY COMPANY'S (NTEC) ACQUISITION OF NAVAJO GENERATING STATION (NGS) AND THE KAYENTA MINE

WHEREAS,

1. Kayenta is a certified Chapter of the Navajo Nation pursuant to Navajo Tribal Council Resolution N. CAP-34-98 and is delegated authority with respect to local matters consistent with Navajo Nation Law, including custom, tradition, and fiscal matter; and
2. The current owners and participants of both the NGS power plant and Kayenta Mine have announced plans to cease all operations as of December 22, 2019. Both the plant and the mine were originally permitted to operate through 2044. Despite this, the owners have decided to abandon their original plans of operation and close both facilities. The closure of the plant and mine will result in the loss of 700 jobs on the Nation and \$40 Million dollars of annual revenue to the Navajo Nation; and
3. The Navajo Nation created the Navajo Transitional Energy Company, L.L.C. ("NTEC") in 2013 and charged it with responsibility to develop the economic, financial, social, and cultural well-being of the Navajo People, the Navajo Nation Requested NTEC to evaluate the possible acquisition of NGS and Kayenta Mine in order to preserve their operations; and
4. The continued operation of both NGS and Kayenta Mine are crucial to the public welfare, jobs and prosperity of the Navajo Nation, and therefore a matter of critical local concern; and
5. On December 27, 2018 the Naabik'iyati issued a resolution (supporting continued efforts by NTEC to acquire NGS and Kayenta Mine). On December 29, 2018, NTEC reported to the Council that its Management Committee had approved continued negotiations and due diligence for the purpose of concluding a deal to acquire both NGS and Kayenta Mine.

NOW, THEREFORE, BE IT RESOLVED THAT:

1. The Kayenta Chapter and its community and members hereby support the acquisition of NGS and Kayenta Mine by the Navajo Nation and NTE in order to preserve their operations.
- 2.
3. The Navajo Nation receives benefits to various community members in the form of jobs for our people, scholarships and summer jobs for college students, and other financial assistance to the local government units from the operations of NGS and Kayenta Mine and these benefits would be lost if they cease operation.
4. The Navajo Nation also receives benefits from the operation of NGS and Kayenta Mine to the General Funds of the Navajo Nation in the form of royalties, taxes, lease and rights-of-way, scholarships payments and AML funds, which in turn, are used to supplement governmental programs of the Navajo Nation including the Kayenta Chapter.

CERTIFICATION

WE hereby certify that the foregoing resolution was duly considered by the Kayenta Chapter, Kayenta, Navajo Nation, Arizona, at which a quorum was present and that the same was passed by a vote of 50 in favor, 00 opposed, and 07 abstaining, this 20th day of February, 2019.

Motioned By: Sara Blackwater

Seconded By: Analita Osif

Stanley Clitso, Kayenta Chapter President

**RESOLUTION
OF THE
EASTERN NAVAJO AGENCY COUNCIL
THE NAVAJO NATION**

No. ENAC-12-2018-003

URGING THE 24TH NAVAJO NATION COUNCIL, THE NAVAJO NATION GOVERNMENT, AND NAVAJO TRANSITIONAL ENERGY COMPANY, LLC (NTEC) TO EMPLOY PRUDENT DECISION-MAKING INCLUDING EXTENSIVE FACT BASED DUE-DILIGENCE AND LONG-TERM EFFECTIVE ASSESSMENTS WHEN CONSIDERING THE ACQUISITION OF THE NAVAJO GENERATING STATION (NGS) AND THE KAYENTA MINE

WHEREAS:

1. The Eastern Navajo Agency Council is established under the Legislative Branch of the Navajo Nation and certified by Resolution IGRS-251-01; and
2. Pursuant to 26 N.N.C. Section 103 (D) (4), the Eastern Navajo Agency Council, a consortium of elected Chapter Officials representing thirty-one (31) certified Navajo Nation Chapters, agree to address and undertake common goals and interests for the benefit of the Eastern Navajo Agency Chapters; and
3. Pursuant 2 N.N.C. SECTION: 402B; the Eastern Navajo Agency Council is vested with government authority to review all matters affecting the community to make most appropriate recommendations when necessary to the Navajo Nation, County, State, Federal and other local agencies; and
4. NTEC is promoting and actively seeking supporting resolutions for acquisition from Navajo Chapters and the Navajo People without providing the essential information required for such a significant purchase/investment/decision.

NOW, THEREFORE BE IT RESOLVED THAT:

1. The Eastern Navajo Agency Council hereby urges the 24th Navajo Nation Council, the Navajo Nation Government, and Navajo Transitional Energy Company, LLC (NTEC) to employ prudent decision-making including extensive fact based due-diligence, and long-term effective assessments when considering the acquisition of the Navajo Generating Station (NGS) and the Kayenta Mine - more specifically, study:
 - a. Accuracy of asking/purchase price
 - b. Firm commitments of from where the funds will come
 - c. Associated Costs (clean-up, upgrade, etc.)
 - d. Realistic long-term financial value of purchase
 - e. Sources of valuation presented by seller(s)?
 - f. Guarantees return on investment?
 - g. Stability and long-term forecast of the Coal Industry with particular view of the U.S. movement to alternative energy sources (solar, electric, wind, etc.)
 - h. What are other businesses and growth opportunities that the Nation should be exploring and undertaking?
 - i. Methods to assure any decision (large or small) are not political, with the potential use of outside assessment by uninterested parties

CERTIFICATION

I hereby certify that the foregoing resolution was approved by the Eastern Navajo Agency Council at a duly called meeting at Prewitt, Navajo Nation, New Mexico, at which a quorum was present and the same was passed by a vote of 39 in favor, 00 opposed, 28 abstained, this 2nd day of March 2019.

RESOLUTION OF THE BACA/PREWITT CHAPTER BPC/19/02/30

THE BACA/PREWITT CHAPTER SUPPORTS THE NAVAJO TRANSITIONAL ENERGY COMPANY'S (NTEC) ACQUISITION OF NAVAJO GENERATING STATION (NGS) AND THE KAYENTA MINE

WHEREAS:

1. Baca/Prewitt Chapter is a certified Chapter of the Navajo Nation pursuant to Navajo Tribal Council Resolution No. CAP 34-98 and is delegated authority with respect to local matters consistent with Navajo Nation Law, including custom, tradition and fiscal matters; and
2. The current owners and participation of both the NGS power plant and Kayenta Mine has announced plans to cease all operations as of December 22, 2019. Both the plant and the mine were originally permitted to operate through 2044. Despite this, the owners have decided to abandon their original plans of operation and close both facilities. The closure of the plant and mine will result in the loss of 700 jobs on the Nation and \$40 million dollars of annual revenue to the Navajo Nation; and
3. The Navajo Nation created the Navajo Transitional Energy Company, L.L.C. ("NTEC") 2013 and charged it with responsibility to develop the economic, financial, social and cultural well-being of the Navajo People, the Navajo Nation, and its future generation through the development of its energy portfolio. In October 2018, in furtherance of this responsibility, the Navajo Nation requested NTEC to evaluate the possible acquisition of NGS and Kayenta Mine in order to preserve their operations; and
4. The continued operation of both NGS and Kayenta Mine are crucial to the public welfare jobs and prosperity of the Navajo Nation, and therefore a matter of local concern; and
5. On December 27, 2018 the Naabikiyati issued a resolution supporting continued effort by NTEC to acquire NGS and Kayenta Mine. On December 28, 2018 NTEC reported to the Council that its Management Committee had approved continued negotiations and the diligence for the purpose of concluding a deal to acquire both NTEC and Kayenta Mine.

NOW THEREFORE BE IT RESOLVED THAT:

1. The Baca/Prewitt Chapter and its community and members hereby supports the acquisition of NGS and Kayenta Mine by the Navajo Nation and NTEC in order to preserve their operations.
2. The Navajo Nation receives benefits to various community members in the form of jobs for our people, scholarships and summer jobs for college students, and other financial needs.

The closure of the plant and mine will result in the loss of 700 jobs on the Nation and \$40 Million dollars of annual revenue to the Navajo Nation; and
3. The Navajo Nation created the Navajo Transitional Energy Company, LLC ("NTEC") in 2013 and charged it with responsibility to develop the economic, financial, social, and cultural well-being of the Navajo People, the Navajo Nation, and its future generations through the development of its energy portfolio. In October of 2018, in furtherance of that responsibility, the Navajo Nation requested NTEC to evaluate the possible acquisition of NGS and Kayenta Mine in order to preserve their operations; and
4. The continued operation of both NGS and Kayenta Mine are crucial to the public welfare, jobs and prosperity of the Navajo Nation, and therefore a matter of critical local concern; and
5. On December 27, 2018 the Naabik'íyatí issued a resolution [supporting continued efforts by NTEC to acquire NGS and Kayenta mine]. On December 29, 2018, NTEC reported to the Council that its Management Committee had approved continued negotiations and due diligence for the purpose of concluding a deal to acquire both NGS and Kayenta Mine.

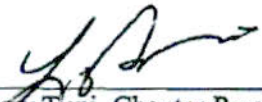

NOW, THEREFORE, BE IT RESOLVED THAT:

1. The Dennehotso Chapter and its community and members hereby support the acquisition of NGS and Kayenta Mine by the Navajo Nation and NTEC in order to preserve their operations.

2. The Navajo Nation receives benefits to various community members in the form of jobs for our people, scholarships and summer jobs for college students, and other financial assistance to the local government units from the operations of NGS and Kayenta Mine and these benefits would be lost if they cease operation.
3. The Navajo Nation also receives benefits from the operation of NGS and Kayenta Mine to the General Funds of the Navajo Nation in the form of royalties, taxes, lease and rights-of-way, scholarships payments and AML funds, which in turn, are used to supplement governmental programs of the Navajo Nation including the Dennehotso Chapter.
4. NGS and the Kayenta Mine have complied with all environmental regulations and permits issued for the operation of the facilities and have contributed to the economy and well-being of the Navajo Nation and the southwestern United States.

CERTIFICATION

I certify that the foregoing resolution was duly considered by the Dennehotso Chapter, at a duly called meeting, in Dennehotso (Navajo Nation), Arizona at which a quorum was present and that same was passed by a vote of; 14 in favor 07 opposed, 08 abstained, this 10th day of February, 2019

Continuing the legacy of brilliant leadership through best improvement since 1906.

Resolution No: KTCF-12-19

RESOLUTION OF THE KAYENTA TOWNSHIP COMMISSION

THE KAYENTA TOWNSHIP SUPPORTS THE NAVAJO TRANSITIONAL ENERGY COMPANY'S (NTEC) ACQUISITION OF NAVAJO GENERATING STATION (NGS) AND THE KAYENTA MINE

WHEREAS,

1. The Kayenta Township Commission ("Commission") is a home-rule municipality of the Navajo Nation with the general authority and responsibility to govern for the welfare of the Kayenta Township ("Township"), the Township's employees, and its residents, including the enactment of such ordinances, rules and regulations as it deems in the best interest of the Township. See 2 N.N.C. §§ 4081-4086, as amended; and
2. The current owners and participants of both the NGS power plant and Kayenta Mine have announced plans to cease all operations as of December 22, 2019. Both the plant and the mine were originally permitted to operate through 2044. Despite this, the owners have decided to abandon their original plans of operation and close both facilities. The closure of the plant and mine will result in the loss of 700 jobs on the Nation and \$40 Million dollars of annual revenue to the Navajo Nation; and
3. The Navajo Nation created the Navajo Transitional Energy Company, LLC ("NTEC") in 2013 and charged it with responsibility to develop the economic, financial, social, and cultural well-being of the Navajo People, the Navajo Nation, and its future generations through the development of its energy portfolio. In October of 2018, in furtherance of that responsibility, the Navajo Nation requested NTEC to evaluate the possible acquisition of NGS and Kayenta Mine in order to preserve their operations; and
4. The continued operation of both NGS and Kayenta Mine are crucial to the public welfare, jobs and prosperity of the Navajo Nation, and therefore a matter of critical local concern; and
5. On December 27, 2018 the Naabik'iyatf issued a resolution [supporting continued efforts by NTEC to acquire NGS and Kayenta Mine]. On December 29, 2018, NTEC reported to the Council that its Management Committee had approved continued negotiations and due diligence for the purpose of concluding a deal to acquire both NGS and Kayenta Mine.

NOW, THEREFORE, BE IT RESOLVED THAT:

1. The Kayenta Township and its community and members hereby support the acquisition of NGS and Kayenta Mine by the Navajo Nation and NTEC in order to preserve their operations.
2. The Navajo Nation receives benefits to various community members in the form of jobs for our people, scholarships and summer jobs for college students, and other financial assistance to the local government units from the operations of NGS and Kayenta Mine and these benefits would be lost if they cease operation.

3. The Navajo Nation also received benefits from the operation of NGS and Kayenta Mine to the General Funds of the Navajo Nation in the form of royalties, taxes, lease and rights-of-way, scholarships payments and AML funds, which in turn, are used to supplement governmental programs of the Navajo Nation including the Kayenta Chapter.
4. NGS and the Kayenta Mine have complied with all environmental regulations and permits issued for the operation of the facilities and have contributed to the economy and well-being of the Navajo Nation and the southwestern United States.

CERTIFICATION

I hereby certify that the foregoing resolution was considered by the Kayenta Township Commission at a duly called meeting at Kayenta, Navajo Nation (Arizona), at which a quorum was present and that the same was passed by a vote of 3 in favor, 0 opposed, and 2 abstained, this 11th day of February, 2019.

RESOLUTION # 2019-033-001:

THE NOST REGIONAL COUNCIL SUPPORTS THE NAVAJO TRANSITIONAL ENERGY COMPANY'S (NTEC) ACQUISITION OF NAVAJO GENERATING STATION (NGS) AND THE KAYENTA MINE

WHEREAS,

1. The NOST Regional Council is a certified Chapter of the Navajo Nation pursuant to Navajo Tribal Council Resolution No. CAP-34-98 and is delegated authority with respect to local matters consistent with Navajo Nation Law, including custom, tradition, and fiscal matters; and
2. The current owners and participants of both the NGS power plant and Kayenta Mine have announced plans to cease all operations as of December 22, 2019. Both the plant and the mine were originally permitted to operate through 2044. Despite this, the owners have decided to abandon their original plans of operation and close both facilities. The closure of the plant and mine will result in the loss of 700 jobs on the Nation and \$40 Million dollars of annual revenue to the Navajo Nation; and
3. The Navajo Nation created the Navajo Transitional Energy Company, LLC ("NTEC") in 2013 and charged it with responsibility to develop the economic, financial, social, and cultural well-being of the Navajo People, the Navajo Nation, and its future generations through the development of its energy portfolio. In October of 2018, in furtherance of that responsibility, the Navajo Nation requested NTEC to evaluate the possible acquisition of NGS and Kayenta Mine in order to preserve their operations; and
4. The continued operation of both NGS and Kayenta Mine are crucial to the public welfare, jobs and prosperity of the Navajo Nation, and therefore a matter of critical local concern; and
5. On December 27, 2018 the Naabik'iyati issued a resolution [supporting continued efforts by NTEC to acquire NGS and Kayenta mine]. On December 29, 2018, NTEC reported to the Council that its Management Committee had approved continued negotiations and due diligence for the purpose of concluding a deal to acquire both NGS and Kayenta Mine.

NOW, THEREFORE, BE IT RESOLVED THAT:

1. The NOST Regional Council and its community and members hereby support the acquisition of NGS and Kayenta Mine by the Navajo Nation and NTEC in order to preserve their operations.
2. The Navajo Nation receives benefits to various community members in the form of jobs for our people, scholarships and summer jobs for college students, and other financial assistance to the local government units from the operations of NGS and Kayenta Mine and these benefits would be lost if they cease operation.
3. The Navajo Nation also receives benefits from the operation of NGS and Kayenta Mine to the General Funds of the Navajo Nation in the form of royalties, taxes, lease and rights-of-way, scholarships payments and AML funds, which in turn, are used to supplement governmental programs of the Navajo Nation including the NOST Regional Council.
4. NGS and the Kayenta Mine have complied with all environmental regulations and permits issued for the operation of the facilities and have contributed to the economy and well-being of the Navajo Nation and the southwestern United States.

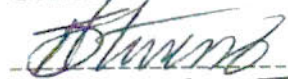

CERTIFICATION

We hereby certify that the forgoing resolution was duly considered by the NOST Regional Council of the Navajo Nation, at a duly called meeting at which a quorum was present and that same was passed by a vote of 5 in favor, 0 opposed, and 1 abstained on this 2nd day of February, 2019 at the Naa T'sis Aan Chapter, Navajo Mountain, Utah.

**RESOLUTION OF TSE CH'IZHI (ROUGH ROCK) CHAPTER SUPPORTS THE
NAVAJO TRANSITIONAL ENERGY COMPANY'S (NTEC) ACQUISITION OF
NAVAJO GENERATING STATION (NGS) AND THE KAYENTA MINE
CHAPTER RESOLUTION NO. 2052019 - 05**

WHEREAS:

1. The Tse Ch'izhi (Rough Rock) Chapter is a certified Chapter of the Navajo Nation pursuant to Navajo Tribal Council Resolution No. CAP-34-98 and is delegated authority with respect to local matters consistent with Navajo Nation Law, including custom, tradition, and fiscal matters; and
2. The current owners and participants of both the NGS power plant and Kayenta Mine have announced plans to cease all operations as of December 22, 2019. Both the plant and the mine were originally permitted to operate through 2044. Despite this, the owners have decided to abandon their original plans of operation and close both facilities. The closure of the plant and mine will result in the loss of 700 jobs on the Nation and \$40 Million dollars of annual revenue to the Navajo Nation; and
3. The Navajo Nation created the Navajo Transitional Energy Company, LLC ("NTEC") in 2013 and charged it with responsibility to develop the economic, financial, social, and cultural well-being of the Navajo People, the Navajo Nation, and its future generations through the development of its energy portfolio. In October of 2018, in furtherance of that responsibility, the Navajo Nation requested NTEC to evaluate the possible acquisition of NGS and Kayenta Mine in order to preserve their operations; and
4. The continued operation of both NGS and Kayenta Mine are crucial to the public welfare, jobs and prosperity of the Navajo Nation, and therefore a matter of critical local concern; and
5. On December 27, 2018 the Naabik'iyati issued a resolution (supporting continued efforts by NTEC to acquire NGS and Kayenta Mine). On December 29, 2018, NTEC reported to the Council that its Management Committee had approved continued negotiations and due diligence for the purpose of concluding a deal to acquire both NGS and Kayenta Mine.

NOW, THEREFORE, BE IT RESOLVED THAT:

1. The Tse Ch'izhi (Rough Rock) Chapter and its community and members hereby support the acquisition of NGS and Kayenta Mine by the Navajo Nation and NTEC in order to preserve their operations.
2. The Navajo Nation receives benefits to various community members in the form of jobs for our people, scholarships and summer jobs for college students, and other financial

assistance to the local government units from the operations of NGS and Kayenta Mine and these benefits would be lost if they cease operation.

3. The Navajo Nation also receives benefits from the operation of NGS and Kayenta Mine to the General Funds of the Navajo Nation in the form of royalties, taxes, lease and right-of-way, scholarship payments and AML funds, which in turn, are used to supplement governmental programs of the Navajo Nation including the Tse Ch'izhi (Rough Rock) Chapter.
4. NGS and the Kayenta Mine have complied with all environmental regulations and permits issued for the operation of the facilities and have contributed to the economy and well-being of the Navajo Nation and the southwestern United States.

CERTIFICATION

We, hereby certify that the foregoing resolution was considered by the Tse Ch'izhi (Rough Rock) Chapter at a duly called Chapter meeting in Rough Rock, Navajo Nation, Arizona at which a quorum of Chapter members was present and that the foregoing was passed by a vote of 20 in favor, 0 opposed and 7 abstained. The foregoing was passed this 11th day of February, 2019.

RESOLUTION OF THE NAVAJO NATION UPPER FRUITLAND CHAPTER
THE UPPER FRUITLAND CHAPTER SUPPORTS THE NAVAJO TRANSITIONAL
ENERGY COMPANY'S (NTEC) ACQUISITION OF NAVAJO GENERATING
STATION (NGS) AND THE KAYENTA MINE

WHEREAS:

1. Pursuant to 26 N.N.C. § 3(A), the Upper Fruitland Chapter is a certified Chapter of the Navajo Nation as listed under 11 N.N.C., Part 1, P10; and,
2. Pursuant to 26 N.N.C. §1(B), the Upper Fruitland Chapter is delegated the governmental authority to make decisions over local matters consistent with Navajo Law, Custom, and Tradition and under 11 N.N.C. Part, P10 and also delegated authority to make local decisions in the best interest and welfare of the community members; and,
3. Pursuant to 26 N.N.C. §102(A); Upper Fruitland Chapter met the requirements under the Five Management System Policies & Procedures and,
4. Pursuant to 26 N.N.C. §103(d) (1), the Resources and Development Committee certified Upper Fruitland Chapter as Governance Certified who shall exercise authorities pursuant to 26 N.N.C., Section 103, with exceptions of Land Administration Authority beginning February 28, 2012; and,
5. Upper Fruitland Chapter is a certified Chapter of the Navajo Nation pursuant to Navajo Tribal Council Resolution No. CAP-34-98 and is delegated authority with respect to local matters consistence with Navajo Nation Law, including custom, tradition, and fiscal matters; and
6. The current owners and participants of both the NGS power plant and Kayenta Mine have announced plans to cease all operations as of December 22, 2019. Both the plant and the mine were originally permitted to operate through 2044. Despite this, the owners have decided to abandon their original plans of operation and close both facilities. The closure of the plant and mine will result in the loss of 700 jobs on the Nation and \$40 Million dollars of annual revenue to the Navajo Nation; and
7. The Navajo Nation created the Navajo Transitional Energy Company, LLC ("NTEC") in 2013 and charged it with responsibility to develop the economic, financial, social, and cultural well-being of the Navajo People, the Navajo Nation, and its future generations through the development of its energy portfolio. In October of 2018, in furtherance of

that responsibility, the Navajo Nation requested NTEC to evaluate the possible acquisition of NGS and Kayenta Mine in order to preserve their operations; and

8. The continued operation of both NGS and Kayenta Mine are crucial to the public welfare, jobs and prosperity of the Navajo Nation, and therefore a matter of critical local concern; and
9. On December 27, 2018 the Naabik'iyatí issued a resolution [supporting continued efforts by NTEC to acquire NGS and Kayenta mine]. On December 29, 2018, NTEC reported to the Council that its Management Committee had approved continued negotiations and due diligence for the purpose of concluding a deal to acquire both NGS and Kayenta Mine.

NOW, THEREFORE, BE IT RESOLVED THAT:

1. The Upper Fruitland Chapter and its community and members hereby support the acquisition of NGS and Kayenta Mine by the Navajo Nation and NTEC in order to preserve their operations.
2. The Navajo Nation receives benefits to various community members in the form of jobs for our people, scholarships and summer jobs for college students, and other financial assistance to the local government units from the operations of NGS and Kayenta Mine and these benefits would be lost if they cease operation.
3. The Navajo Nation also receives benefits from the operation of NGS and Kayenta Mine to the General Funds of the Navajo Nation in the form of royalties, taxes, lease and rights-of-way, scholarships payments and AML funds, which in turn, are used to supplement governmental programs of the Navajo Nation including the Upper Fruitland Chapter.
4. NGS and the Kayenta Mine have complied with all environmental regulations and permits issued for the operation of the facilities and have contributed to the economy and well-being of the Navajo Nation and the southwestern United States.

CERTIFICATION

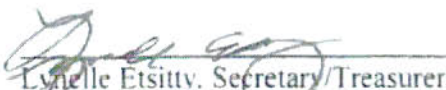

WE HEREBY CERTIFIED that the foregoing resolution was approved by the Upper Fruitland Chapter at a duly called meeting held at Upper Fruitland Chapter (Navajo Nation), N.M. A motion to approve was made by Lenora Williams and seconded by Ted Decker and the same was passed by a vote of 18 in favor, 12 opposed, 6 abstained, this 26th day of February, 2019.

Wed 3/13/2019 12:18 PM

To: comments <comments@navajo-nsn.gov>;

Please do not jeopardize our assets by allowing NTEC to purchase NGS. There is way too much risk involved and lack of expertise. Be wise. VOTE NO TO NGS.

Jeff Begay, Chairman
Dineh Chamber of Commerce

Dear Honorable Council Delegates:

RE: LEGISLATION NO: _0044-19__ SPONSOR: Rickie Nez

TITLE: An Action Relating To The Resources And Development Committee And The NAABIK'IYATI' Committee; Supporting Navajo Transitional Energy Company's Independent Acquisition Of Navajo Generating Station And Kayenta Mine; Statement Of Policy Regarding Refusal To Financially Guarantee Or Provide Waivers Or Releases Of Claims By The Navajo Nation Pertaining To That Acquisition

I respectfully urge you to vote against this legislation. We have no information on just how this would make an income for the Navajo Nation. Most important to have secured a buyer of the electricity with a contract signed for one to two years and there is none because NGS electricity is too expensive.

The Navajo Nation needs to secure what is already on the table from Navajo Generating Station owners and walk away and let NGS close. We would then take possession of the \$168 million cash plus the \$244 million in additional assets, together totally more than **412 MILLION DOLLARS** in revenues and assets.

There are more millions to be made from three of the assets listed:

- 1.) Access to the 500 megawatts of existing transmission lines;
- 2.) The 1,500 acre-feet per year of NGS water;
- 3.) And the 950 acre-feet per year water for the LeChee Chapter.

With these assets we can build a better future for the Navajo people. The Navajo Nation needs to take what is already on the table and walk away from NGS, rather than foolishly gamble that coal powered energy generation has any future in the 21st century.

Sincerely,

Lori Goodman
Dilkon voter

0044-19

Leon Spencer <l.spencer@navajo-nsn.gov>

To comments <comments@navajo-nsn.gov>;

I'm thinking about the 700 families is there going to be out in the cold December.

They are going to shut it down decommissioned but they're going to take their time they're not going beyond 10 years will be headed towards renewable anyways.

Today solar panels and renewables haven't brought any funds to the Navajo Nation we haven't determined if it's actually sustainable on the Navajo Nation yet.

Yes to purchase of NGS + Peabody.

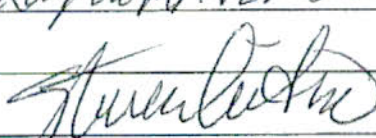

Additional Comment(s): Residents, Peabody retirees + children old + not of age don't really understand the situation + the state of Peabody + N.G.S. If you flash cash to anyone they will reach for it w/o asking question till its too late to change anything. I'm a 40 yr employee of Peabody, UMW Member, Navajo resident of Kayenta. I think this is a good opportunity for our Navajo Nation to do our own investment in coal mining + run our power plant with the best coal in whole U.S.A. I've learn alot from Peabody learning to operate now 8750, 8200, 1266. Draglines, coming out of high school in 1978. I started as labor to operating differt equipments to getting to the Draglines. Never have I had to leave the reservation, I'm grateful that we have Peabody + N.G.S. Thank You 24th Council, God Bless

Name: Steven Chis

Thanking
Mr. Du

Position: 8750^{#2} Dragline Oper. 3rd Shift

Address: POB #1594
Kayenta, Az. 86033

Signature: 

There are some former employees of Peabody + Relatives of Peabody + N.G.S. complaining about employment + such, but there are rules + regulation about safety, safety work place. These people are angry because their own use of absentes, use of illegal substance and Alcohol. Do you delegates, approve of this behavior in your work place.
