# Land Acquisition Trust – Asset Allocation

## Considerations and Next Steps

- The Land Acquisition Trust's target asset allocation can be adjusted to increase expected returns by diversifying into Small Cap US Equity, International Equity, Core Real Estate and GTAA. Incorporating these asset classes generally serves to improve the expected return for all risk levels.
- The "Moderate" or "Moderate Growth" portfolios are generally suitable for the Trust's overall risk/return profile, subject to the Investment Committee's preference.
- No new investments would be required to implement a new target asset allocation for the Land Acquisition Trust – if approved, the allocations can be implemented using the current Master Trust investments.
  - RVK would work with the Controller's Office and Northern Trust to complete the rebalancing.

## STATEMENT OF INVESTMENT OBJECTIVES, GUIDELINES AND PROCEDURES

**A. General.** This statement governs the investment of the Navajo Nation Land Acquisition Trust Fund (Fund) as a sub-policy of the Navajo Nation Master Investment Policies.

This statement is set forth in order that the Navajo Nation Council, the Budget & and Finance Committee, the Investment Committee, Staff, its investment advisor and its investment managers and others entitled to such information may be made aware of the Policy of the Land Acquisition Trust Fund with regard to the investment of its assets and the expectations and requirements of the Investment Committee with respect to the ongoing management of the investments. The purpose of this document is to establish the investment policies, standards of prudence and performance expectations for the Fund. The Investment Committee and its real estate advisor are responsible for the fiduciary oversight of the investments and have chosen these policies as ~~its~~ their statement of intent for achieving the investment objectives described below.

**B. The Fund.** The Navajo Nation Land Acquisition Trust Fund was established by Resolution CJY-54-94 on ~~July 20, 1994~~ August 3, 1994, which is codified at 16 N.N.C. § 201 et seq. The Resolution states that all monies deposited into the Fund shall be invested to provide revenues to ~~purchase~~ acquire land for the Navajo Nation in accordance with the Land Acquisition Policies and Procedures adopted by the Resources Committee of the Navajo Nation Council. Two percent (2%) of all ~~unrestricted~~ projected revenues of the Navajo Nation will be transferred to the Fund. Ninety percent (90%) of the Fund income shall be used for land acquisition(s). Ten percent (10%) of the Fund income shall be reinvested in the Fund to cover the rate of inflation. Fees, costs and expenses incurred in connection with actual or potential land acquisitions, including without limitation, fees, costs and expenses incurred with respect to specialty service providers, legal counsel, title insurance, appraisals, environmental studies, and physical and mechanical land inspections, may be paid from income of the Fund and, to the extent so paid, shall be netted against realized income prior to such income being invested for land acquisition and inflation protection purposes. The Navajo Nation Council resolution ~~states stipulates~~ that the principal may not be expended except pursuant to a referendum adopted by a two-thirds majority vote of the full membership of the Navajo Nation Council.

MODERATE GROWTH  
Land Acquisition Trust Fund  
Sub-policy

Fund income is defined as realized income including interest, lease payments and realized gains from investment activities within the Fund.

The Fund is expected to be available in perpetuity so it will be invested with a long-term perspective. While the Fund is expected to be perpetual in nature, the real assets held within the fund are held strictly for investment purposes. The assets held may change periodically as assets gain or lose attractiveness and other opportunities arise that are identified by the Investment Committee and its real estate advisor. It is important to follow coordinated policies regarding spending and investment decisions, which will protect the principal and produce reasonable total returns.

To assure that the integrity of these assets shall be maintained to the maximum extent feasible, the Investment Committee has established the following Policies:

To be invested in accord with The Master Investment Policy and Procedures approved by the Budget ~~&~~and Finance Committee.

To preserve the purchasing power of the investments while at the same time increasing the size of the corpus in order to support growth in the Navajo Land Acquisition Trust Fund. Preservation and maximization of principal is of high priority and essential over the long term. Reduction of principal is detrimental to the continuity of the Fund and is to be avoided.

**C. Investment Objectives.** The primary investment objectives are preservation of capital in real terms while obtaining maximum returns within reasonable and acceptable levels of risk.

The achievement of the investment objectives of the Fund will be reviewed on an annual basis. This review will focus on the continued feasibility of achieving the objectives and the continued appropriateness of the investment policy. It is not expected that the policy will change frequently; in particular, short-term changes in the financial markets should generally not require an adjustment in the policy.

**D. The Investment Committee Responsibilities.** The Investment Committee and its real estate advisor will have the responsibility and authority to oversee the investments of the Fund. The Investment Committee and its designated real estate advisor(s) will select the specific real assets reflecting judgments as to the investment environment as well as the specific needs of the Fund. The Investment Committee will discharge its duties with prudence and ethics as stated in Section 3 of the Navajo Nation Master Investment Policies.

**E. Investment Policy Guidelines.** The Budget ~~&~~and Finance Committee does not expect the Investment Committee to be reactive to short-term investment developments, recognizing that the needs for payout are long term and that investment competence must be measured normally over a meaningful period of time. While the quantitative

assessment of managerial competence will be measured normally over a complete market cycle, the Budget & and Finance Committee anticipates that the Investment Committee and its real estate advisor will make interim qualitative judgments. Specific qualitative factors will be reviewed by the Investment Committee and its real estate advisor on an ongoing basis.

Long term

The risk/return profile shall be maintained by describing a long-term "target" strategic asset allocation as set forth below.

Investment Time Horizon

In making investment strategy decisions for the Fund, the focus shall be on a long-term investment time horizon that encompasses a complete business and real estate cycle (usually three to five years). Interim evaluation will be required if a significant change in fees, manager personnel, strategy, manager ownership ~~occurs~~, or underlying fundamentals of real assets occurs.

**F. Target Asset Allocation.** ~~Allocation of Assets.~~ It shall be the policy of the Fund to be invested in accordance with the ~~maximum and minimum range~~ Target Asset Allocation for each asset class as stated below:

<u>Asset Class</u>	<u>Minimum</u>	<u>Target</u>	<u>Maximum</u>

**E.G. Performance Expectations.** The measurement period for complete evaluation will be trailing twelve-quarter periods and complete market cycles. Market cycles are defined to include both a rising and a declining leg. Therefore, a minimum period of evaluation shall be typically three to five years.

The most important performance expectation is the achievement of investment results that are consistent with the Fund's investment objective statement. Portfolio Performance will be monitored against ~~a dynamic custom index of T-Bill and NCREIF~~ a custom index based upon the Fund's target asset allocation. If applicable, the Custom Real Estate portion of the benchmark will match the Fund's real asset allocation as defined by the National Council of Real Estate Investment Fiduciaries (NCREIF). Any allocation invested in the reserve pool will be benchmarked against 90 Day T-bills.
